This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today's populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the

changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

Qur'anic exegesis has become the battleground of political Islam and theological conflict among various Muslim schools of thought. Using comparative and contrastive methodology, examples from the Qur'an are investigated in the light of various theological views to delineate the birth, development and growth of Qur'anic exegesis. The political status quo, in the past and at present, has impinged upon Qur'anic exegesis more than on any other discipline in Islamic studies. This book illustrates the dichotomy between mainstream and non-mainstream Islam, showing how Qur'anic exegesis reflects the subtle dogmatic differences and political

cleavages in Islamic thought. Chapters explore in depth the intrusive views of the compilers of early exegesis manuscripts, the scepticism among Western scholars about the authenticity of early Muslim works of exegesis and of prophetic tradition, and the role of exegesis as a tool to reaffirm the Qur'an as a canon. Written to appeal to those with comparative exegetical interests as well as those focused on Islamic studies in general, this book will be an important reference for research students, scholars, and students of Islamic Studies, Theology, Religious studies and Middle Eastern Studies.
