Blueprint for Success in Business provides a comprehensive budget management guide for the planning, operation, and monitoring of a business enterprise to realize maximum profit. The program detailed in this book was developed at the Business Institute of Southern Vermont College in conjunction with the Small Business Administration College Program. Budget management is discussed as a primary function of the financial manager, including budget preparation and budget monitoring as well as strategies for budget adjustments. The information provided in this text is devoid of verbose filler and designed for the teacher to guide students through discussion to explore and discover the magic of financial management.

Benefiting from the authors' many years of teaching undergraduate and graduate students and practitioners, here is a clear, comprehensive, practice-oriented text for public budgeting courses. Rather than presenting each budgeting concern in mind-numbing detail, the book offers a commonsensical view of public budgeting and its importance to current and future public managers. The text is designed to show readers how managers relate to budgeting and how their actions make a difference in the operation and performance of public organizations. The book covers the historical development of public budgeting, sources of public revenues, revenue management, budgeting processes and formats, operating techniques, politics within public budgeting, and more. "Budgeting for Public Managers" is concise, clearly written, well illustrated, and grounded in the real-world concerns of public managers. Each chapter concludes with a helpful list of additional reading and resources for readers who want to dig deeper into budgeting practice and application.
