will appeal to college faculty, administrators and teachers. One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development - particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

Introduction to Human Development and Family Studies is the first text to introduce human development and family studies (HDFS) as inextricably linked

areas of study, giving students a complex yet realistic view of individuals and families. Pioneers of research paradigms have acknowledged that the family is one setting in which human development occurs. Moreover, in many academic programs, the lines of these two disciplines blur and much work is inherently multidisciplinary and interdisciplinary. This book helps to fortify an understanding of HDFS and subareas within it. Vignettes from current HDFS students as well as new professionals, an overview of the lifespan stage(s) within the family context, a wide description of research methods and applications, current policy issues relevant to the area, and discussions of practice/careers coupled with strategies for pursuing specializations or careers in the area are hallmarks of this textbook. Introduction to Human Development and Family Studies is essential reading for students new to the major and minor wanting to know: What is HDFS? Who are the people involved in HDFS? Why is HDFS important? How does theory and research inform work in HDFS? What does the pursuit of being an ethical professional require? What are the key areas in HDFS? Incredibly user-friendly both on the page and online, the text also features the following resources: Chapter Summaries where the main points of each chapter are pinpointed at the end of every chapter for review and study. Key Terms listed and defined within the margins of every chapter, a complete Glossary at the end of the text, and

Flashcards online for additional review and study. Challenge: Integration section at the end of each chapter that underscores concepts from the chapter and draws connections between content presented in other chapters. Journal Questions to encourage reflection about the content and encourage thinking about some of the content coupled with students' own experiences. Suggested Resources that lists relevant websites, books, articles, and video links for further study. A Closer Look at Applied Experiences Appendix outlines the internship process and shows how the internship experience can be meaningful and useful, and a Consuming Research Appendix that focuses on what it means to be a consumer of research, the knowledge and skills consumers need, and considerations for transitioning from a consumer of research to a producer of research.

This book deepens readers' conceptual understanding of and provides practical insights into Vietnam's higher education reforms. Globalisation has had profound impacts on higher education worldwide, creating transnational linkages and junctures, as well as disjunctures. At the same time, it has generated fluidities, hybridities and mobilities. Within the postcolonial context of Vietnam, it is imperative to identify the unique global traits that characterise the Vietnamese higher education system. The book focuses specifically on key aspects of culture and values that are decisive to the reform of Vietnamese higher education under the forces of globalisation. It critically examines how global forces have shaped and reshaped Vietnam's higher education landscape. At the same time, the book explores local demands on Vietnamese higher education, and deciphers how higher education institutions are responding to globalisation, internationalisation and local demands. Based on empirical research, theoretical approaches and the experiences of researchers from Vietnam and overseas, it addresses critical perspectives on the aspects fundamental to the reform of Vietnamese higher education and outlines viable paths for the future.

Journal writing is not new--journals have been around for centuries. More recently, journals have been viewed as a means of scaffolding reflective teaching and

## Online Library Sample Practicum Journal

encouraging reflectivity in research processes. As a result, some educators may ask, "What more do we need to know?" Those likely to raise this question are probably not thinking of the explosive growth of reflective writing enabled by social networking on the Web, the blogs and other interactive e-vehicles for reflection on experiences in our literate, "real," and virtual lives. This revisiting of journal writing from a 21st century perspective, informed by relevant earlier literature, is what Christine Pearson Casanave guides readers through in this first book-length treatment of the use of journal writing in the contexts of language learning, pre and in-service teaching, and research. Casanave has put together existing ideas that haven't been put together before and has done it not as an edited collection, but as a single-authored book. She has done it in a way that will be especially accessible to teachers in language teacher education programs and to practicing teachers and researchers of writing in both second and foreign language settings, and in a way that will inspire all of us to think about, not just do, journal writing. Those who have never attempted to use journals in their classes and own lives, as well as others who have used it with mixed results, will probably be tempted to try it in at least some of the venues Casanave provides guidance for. Those already committed to journal writing will very likely find in this book new reasons for expanding and enhancing their use of journals.

This edited collection contains sixteen papers presented at the 12th METU International ELT Convention, “Celebrating Diversity”, held in 2015 in Ankara, Turkey. With the social, cultural and technological changes the 21st century has brought to our lives, every learner today has more diverse needs and expectations, which makes us consider the concept of “diversity” as one of the core points in English language education. Based on the core principle “One size does not fit all”, this volume presents a wide range of topics and covers issues related to diversity in student and teacher profiles, teaching and learning practices, assessment techniques, world Englishes and cultural elements in EFL/ESL classrooms. As such, the proceedings of the 12th METU International ELT Convention are an invaluable reference for those interested in diverse perspectives, applications and practices in the teaching of English as a foreign and second language.

This text was written to give students experience in using effective methods for observing young children's development (ages 0-8) and documenting their observations. Designed to guide students' participation with children of different age groups in a variety of early childhood settings, the text encourages students to interact with children as they learn more about development by carrying out the activities outlined in each chapter. This text models the educational approaches that professionals advocate for early childhood classrooms: observational learning, active learning, guided discovery, choice, mini-lessons and cooperative learning. These approaches are incorporated into this text through concise overviews and numerous activities related to early childhood development and education.

education across diverse geographic, social and political contexts. It explores the lifespan of teacher development from initial preparation through to graduate classroom practice as it occurs in an intensifying culture of standards and regulation. The characterization of initial teacher education (ITE) in a crucible of change permeates throughout the book. The chapters open up new ways of thinking about innovation and accountability in ITE and the professionalization of teaching, exploring fundamental questions, such as “Who are the actors in teacher preparation and how do they interact? How can we learn about the quality of teacher education? Where can we hear the voices of teacher educators and preservice teachers, as well as school-based teacher educators? What are the new and emerging roles of others in teacher education who have not been involved previously, including employing authorities?” (p. 22). While the book provides responses to these and other provocative questions, it also offers new insights into innovative teacher education from a wide range of policy and practice contexts.

A Practicum in TESOL is a valuable source book for both teacher educators and classroom teachers. It ranges widely across key areas of practice from the nitty-gritty of lesson planning and classroom management, through conceptual areas such as motivation and observation, to crucial if more abstract aspects, such as teachers beliefs and values. It also delves into the moral and political dimensions of teaching. Discussion of these areas, though well-grounded in relevant academic literatures, is also supported by extensive quotes from real teachers working on their practice. The treatment is sufficiently challenging to interest the

experienced teacher, while covering matters of basic practice that would be of concern to the beginner. Anyone doing a TESOL practicum will want to use this book whether as an in-service teacher or as a teacher longing to further their professional development. A Practicum in TESOL can be used individually or in groups.

This book presents the latest research on understanding language teacher identity and development for both novice and experienced researchers and educators, and introduces non-experts in language teacher education to key topics in teacher identity research. It covers a wide range of backgrounds, themes, and subjects pertaining to language teacher identity and development. Some of these include the effects of apprenticeship in doctoral training on novice teacher identity; the impacts of mid-career redundancy on the professional identities of teachers; challenges faced by teachers in the construction of their professional identities; the emerging professional identity of pre-service teachers; teacher identity development of beginning teachers; the role of emotions in the professional identities of non-native English speaking teachers; the negotiation of professional identities by female academics. *Advances and Current Trends in Language Teacher Identity Research* will appeal to academics in ELT/TESOL/applied linguistics. It will also be useful to those who are non-experts

in language teacher education, yet still need to know about theories and recent advances in the area due to varying reasons including their affiliation to a teacher training institute; needs to participate in projects on language teacher education; and teaching a course for pre-service and in-service language teachers.
