

Saving Social Care How To Find More Of The Best Frontline Care Employees And Keep The Ones You Have

THE SOCIAL MEDIA LANDSCAPE WILL NEVER STOP CHANGING. ARE YOU READY TO CHANGE WITH IT? An eternally shape-shifting animal, social media will impact our lives for decades in ways we can't even begin to imagine. What was once a venue to communicate with friends and family has turned into an entity where users can play a role in helping solve climate change, bringing new products to the marketplace, and positively affecting society's ills. Since founding his company Hootsuite in 2013, Ryan Holmes has eaten, slept, and breathed all that is social media, and he is the ideal person to address how the social media paradigm has disrupted--mostly in a good way--humanity as we know it. As the United States deals with a pandemic and societal unrest, social media has become more crucial than ever, and Holmes' incisive combination of history and future-think will help businesspeople and non-businesspeople alike understand and navigate the ever-evolving electronic world in which we live.

You may remember visiting a grandparent or elder friend who lived in a nursing home memory unit. When you were a child you may recall sights, sounds, and smells that caused you to feel uneasy. Step into any one of today's 16,000 long-term care facilities across the US, and suddenly those memories reemerge. Nurse Supervisor K. Allen tells of the emotional investments found while working with seniors inside the Van Gogh, a large upscale urban assisted living complex. Located at its core is found a locked memory care unit, the Rembrandt, where he and his heroic support team struggle to comfort those suffering from Alzheimer's and other types of Dementia. Emotionally rich and deeply moving, Remembering What I Forgot tells of a day in the life of a memory unit nurse and the unimaginable obstacles faced by today's health care workers. A first of its kind, the story provides its reader with a rare glimpse into "life on a memory unit" including the emotional torment experienced by visitors who witness their loved one slip into ever increasing apathy and confusion. In its truest sense a love story of the need to cope and how to find hope when someone we love suddenly cannot remember well and is handed a diagnosis of Dementia. Insightful, humorous and heartfelt, Remembering What I Forgot conveys a message of inspiration and helps us connect with those in the final chapter of their life. Let us not forget them.

Understanding the theory which informs practice is an essential requirement of all qualifications in health and social care. This book first appeared as a two volume handbook linked to the NVQ framework. As the sector has made the move from NVQs to the Qualification Credit Framework, people working in health and social care are now working on a wider variety of qualifications including Certificates and Diplomas. The need for an understanding of the theory which relates to health and social care practice is embedded in these qualifications. This book has been revised in line with contemporary social care practice and the wide range of qualifications now in use. It is an essential read for everyone working in the sector.

Support your teaching of the Level 2 Health and Social Care: Core (Qualifications Wales) with this brand-new textbook developed in partnership with City & Guilds and WJEC. Be guided by our experts Anne-Marie Furse, Maria Ferreiro Peteiro and Vicky Tibbott to ensure your students have a solid foundation of knowledge and skills necessary to be successful. This accessible and course-specific textbook will cover the qualification's seven core units and will also prepare students for the externally marked MCQ exam and the internally marked scenario-based assessments. - Begin each unit with an explanation of Learning Outcomes and Assessment Criteria linked to the specification to guarantee the required course content is delivered - Introduce each topic in an accessible way with the short activities and topics for discussion - Invite students to reflect on their own experiences and to do further research to develop their understanding and skills - Contextualise their learning with case studies that explore real-life scenarios they may face, and utilise the subsequent questions to promote independent thinking - Check their understanding with short questions at the end of topics and encourage further reading a research with links to useful websites

A comprehensive textbook designed to guide students through the entirety of a Health and Social Care BSc degree. Covering the important topics and pressing issues relevant to Health and Social Care today. The book's three part structure starts with the essential areas and core knowledge, including the sociology and psychology of illness, the research process, key legal and ethical issues and reflective practice. The second part covers aspects of health and social care in practice, like health promotion, safeguarding children and their rights, and working with people experiencing mental health disorders. Finally, the third part considers some of the challenges faced in present day health and social care, looking at social justice issues, legal and ethical considerations, leadership, and health inequalities. All content is supported by practical and reflective features to help students throughout their degree, these include: interactive activities, real life case studies and examples related to chapter content, links and suggestions for further reading, and answers to key activities and case study exercises. The perfect companion text for anyone studying a Health and Social Care degree, or any other course related to the health and social care services.

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Keegan of "The Observer" newspaper builds on his earlier bestselling examination of the political career of Gordon Brown, taking a fresh look at the later years of Brown as chancellor and prime minister.

Fully up-to-date with a lively format, this student book contains a wide variety of features which will inspire students to engage with their learning. Contains the four mandatory units and four of the most popular option units - everything needed to pass this award. A range of activities thoroughly prepare candidates for assessment, and lively illustrations and colour photos engage students with the content covered.

The authors have worked closely with OCR on the development of the course, fully understanding the OCR National requirements.

This candidate handbook provides comprehensive coverage of everything candidates need for success in this new qualification.

Saving Social Care How to Find More of the Best Frontline Care Employees and Keep the Ones You Have Rethink Press

Originally published in 1993, this book presents an alternative approach to the study of the emergence of economic awareness during childhood: a new developmental economic psychology!

In the past, attempts to study the emergence of children's economic consciousness have failed to take account of the practical nature of the "economic" in the history of western cultures.

Economic socialisation has been seen as the acquisition of abstract knowledge about the institutions of adult economic culture. The child has been seen as a spectator, acquiring knowledge of that culture, but never really a part of it. However, economic actions, in essence, are directed not towards the attainment of knowledge, but rather towards the practical solution of problems of resource allocation imposed by constraint. Children, just like adults, are faced with practical problems of resource allocation. Their response to these problems may be different from those of adults but no less "economic" for that. This realisation forms the heart of this book. In it children are seen as both inhabitants of their own "playground" economic subculture and actors in the wider economic world of adults, solving, or attempting to solve, practical economic problems. In order to highlight this "child-centred" approach, the authors studied the way children tackle the particular problems posed by limitations of income. How do children learn (a) the relationship between choices available in the present and the future, (b) to spread their limited financial

resources over time into the future and (c) about the strategies, such as banking, that allow them to protect those resources from threats and temptations? In short, how do children learn to save? This volume goes some way to answering these and related questions and in so doing sets up an alternative framework for the study of the emergence of economic awareness. A fascinating and unprecedented ethnography of animal sanctuaries in the United States In the past three decades, animal rights advocates have established everything from elephant sanctuaries in Africa to shelters that rehabilitate animals used in medical testing, to homes for farmed animals, abandoned pets, and entertainment animals that have outlived their “usefulness.” Saving Animals is the first major ethnography to focus on the ethical issues animating the establishment of such places, where animals who have been mistreated or destined for slaughter are allowed to live out their lives simply being animals. Based on fieldwork at animal rescue facilities across the United States, Elan Abrell asks what “saving,” “caring for,” and “sanctuary” actually mean. He considers sanctuaries as laboratories where caregivers conceive and implement new models of caring for and relating to animals. He explores the ethical decision making around sanctuary efforts to unmake property-based human–animal relations by creating spaces in which humans interact with animals as autonomous subjects. Saving Animals illustrates how caregivers and animals respond by cocreating new human–animal ecologies adapted to the material and social conditions of the Anthropocene. Bridging anthropology with animal studies and political philosophy, Saving Animals asks us to imagine less harmful modes of existence in a troubled world where both animals and humans seek sanctuary. This book investigates how telenovelas may be the key to the future of Brazilian television and how this content can survive in an interconnected media landscape. Recognised telenovela writer and scholar Rosane Svartman considers the particular characteristics of the telenovela format – number of episodes, melodrama influence, and influence of the audience on future writing – to explore how these can be preserved on multimedia platforms, and the challenges this change may present. Svartman further charts the transformations of the telenovela throughout its history and its major influences and unveils the main storytelling elements and writing processes. Chapters examine the business model of Brazilian corporate television within the current context of hypermedia and analyse how this relationship evolves as it is influenced by the new interactive tools and technologies that amplify the audience’s power. Merging empirical practices and theory, this book will be of great interest to scholars and students of transmedia storytelling, television studies, and Latin American media, as well as professionals working in these areas.

The fifteenth fostering memoir by Cathy Glass. Danny was petrified and clung to me in desperation as I carried him to my car. Trapped in his own dark world, he couldn't understand why his parents no longer loved or wanted him, and were sending him away.

“It’s cancer.” Dr Philippa Kaye was 39 years old when she heard those dreaded words. The diagnosis of bowel cancer would change her life and mean crossing the divide from being a doctor to being a patient. She soon discovered that her years of training and experience had not prepared her for the realities of actually living with cancer. ‘Doctors Get Cancer Too’ tells Dr Kaye’s moving story of being on both sides of the desk, and shares the insights she gained not only through the diagnosis and treatment but in surviving and thriving through cancer and beyond. Filled with practical advice, this book aims to make patients and their loved ones feel better understood, more prepared and less alone, and to provide solace for anyone navigating their way through hard times.

If you’re looking to develop and improve your nursing, health or social care practice, either individually or as part of a team, the Practice Development Workbook for Nursing, Health and Social Care Teams offers a wide-ranging selection of activities, tools and resources covering vital aspects of practice development. Written as a companion volume to the latest edition of the best-selling Practice Development in Nursing and Healthcare, this new resource grounds practice development in day-to-day nursing and health and social care through accessible, informative learning activities. It also focuses on practical ways in which teams can make their workplace cultures more effective and person-centred, and enables practitioners to empower themselves to make compassionate care a fundamental part of effective health and social care systems. Key features: Offers a full range of resources and tools to support all stages of learning and development towards person-centred practice Includes practical advice for teams to involve patients, clients and residents in the transformation of workplace cultures and bringing about sustainable change Perfect for use both by individuals or by those working in group settings Presents informative and accessible information through activities and key learning points rather than just theory Fully linked to Practice Development in Nursing and Healthcare, second edition, but can also be used as a stand-alone resource Companion website Includes a companion website at: www.wiley.com/go/practicedevelopment/workbook The website includes valuable material for you to print out and use: Evaluation tools Questionnaires and checklists Worksheets and reflection tools Sample presentations in PowerPoint format A bonus online chapter on sharing and celebrating The website material supplements, and is organised around, the chapters in the workbook.

Britain is sick and it needs saving. Covid-19 has brought death, disruption and disorder. It has revealed fundamental failures in public policy and our approach to health. For years, the same failures have perpetuated a host of modern plagues - long-running deadly epidemics in diabetes, depression and heart disease. These plagues pose systemic risks to society itself. In this timely book, Yuille and Ollier envisage a society that always puts the health of citizens first: the ‘Health Society’. The time for dithering and tinkering has passed. Prevention of disease is a task for all branches of government – not just the NHS but also for every workplace, employer, community and citizen. The ‘Health Society’ means working in radically new ways to extend our healthy lives and sustainably increase national prosperity. Saving sick Britain follows the science and lays down a challenge to us all: are we ready to make the change required to end these modern plagues? In answering the question the book helps steer the reader towards rethinking what both ‘prevention’ and ‘health’ mean in modern Britain.

White Paper

BTEC's own resources for Entry 3/Level 1 health and social care are tailored to the needs of Entry 3 and Level 1 learners providing content for both specifications that help learners engage with their studies, achieve their potential, and progress to employment or BTEC Level 2 First.

Partnership Working in Health and Social Care adopts a thematic approach to health and social care partnerships. With chapters by leading international commentators, the book covers key topics in partnership with a dual focus on both policy and practice.

A Best Book for Summer 2021 in the Times, Guardian, and The Independent Book of the Month ----- 'Inspiring' GUARDIAN 'Heartbreaking' INDEPENDENT 'I loved it' ADAM KAY 'Beautiful' MATT HAIG 'Luminous' NICCI GERRARD 'Essential reading' MADELEINE BUNTING 'A celebration' CHRISTIE WATSON ----- As our population ages, more and more of us find ourselves caring for parents and loved ones - some 8.8 million people in the UK. An invisible army of carers holding families together. Here, Kate Mosse tells her personal story of finding herself as a carer in middle age: first, helping her mother look after her beloved father through Parkinson's, then supporting her mother in widowhood, and finally as 'an extra pair of hands' for her 90-year-old mother-in-law. This is a story about the gentle heroism of our carers, about small everyday acts of tenderness, and finding joy in times of crisis. It's about juggling priorities, mind-numbing repetition, about guilt and powerlessness, about grief, and the solace of nature when we're exhausted or at a loss. It is also about celebrating older people, about learning to live differently - and think differently about ageing. But most of all, it's a story about love. ----- 'Lifts the spirits without pulling punches' IAN RANKIN 'Irresistible' RACHEL JOYCE 'Questions how and why we fetishise independence when the reality of human experience is always interdependence' GUARDIAN, BOOK OF THE DAY 'Heartfelt, funny and at times heartbreaking. 10/10' INDEPENDENT

Towards Outstanding is an essential guide for health and social care services that are regulated by the Care Quality Commission. Written by a senior CQC inspector, it shows how a mindset of getting the basics right then applying context-specific finishing touches can allow any service to drive improvement and move towards an 'Outstanding' rating. The author also explores why, in addition to other patient and organisational benefits, good care is cheaper to provide than poor care. Structuring her advice around the 'five questions' that CQC inspectors use (are services safe, effective, caring, responsive and well-led?), she draws on personal vignettes to paint a picture of a service where trust, positivity, a shared vision and a commitment to continuous improvement allow staff to generate new ideas, reflect on best practice, raise concerns where necessary and keep the patient at the centre of all activity.

'24 hours to save the NHS' is the inside story written by the man with unprecedented authority as both Chief Executive of the NHS and Permanent Secretary of the Department of Health. It describes the successes and failures as well as the pressures and the difficulties of making improvements in the 4th biggest organization in the world.

This innovative workbook enables students and those working in health and social care to deepen their understanding of the values that underpin their practice. Rich in practical exercises and downloadable resources that invite the reader to engage with their own values, it explores how values, though not often reflected on, define the quality of care delivered. Supported by case studies and including a glossary of key terms and concepts, the workbook provides an overview of how values are adopted and adapted in professional contexts across health and social care services. With an emphasis on the ever-evolving nature of values, it examines professional ethics through the lens of legislation, codes of conduct, cost-effectiveness and whole-organisation management. This unique resource allows readers to gain a clearer picture of what their values are and how they can realistically implement them in their work, thus achieving the highest possible quality of care delivery.

NATIONAL BESTSELLER • Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. “A powerful read that fills one with, dare I say . . . hope?”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. All We Can Save illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, the book is a collection and celebration of visionaries who are leading us on a path toward all we can save. With essays and poems by: Emily Atkin • Xiye Bastida • Ellen Bass • Colette Pichon Battle • Jainey K. Bavishi • Janine Benyus • adrienne maree brown • Régine Clément • Abigail Dillen • Camille T. Dungy • Rhiana Gunn-Wright • Joy Harjo • Katharine Hayhoe • Mary Annaisé Heglar • Jane Hirshfield • Mary Anne Hitt • Ailish Hopper • Tara Houska, Zhaabowekwe • Emily N. Johnston • Joan Naviyuk Kane • Naomi Klein • Kate Knuth • Ada Limón • Louise Maher-Johnson • Kate Marvel • Gina McCarthy • Anne Haven McDonnell • Sarah Miller • Sherri Mitchell, Weh'na Ha'mu Kwasset • Susanne C. Nieves Rodriguez • Favianna Rodriguez • Cameron Russell • Ash Sanders • Judith D. Schwartz • Patricia Smith • Emily Stengel • Sarah Stillman • Leah Cardamore Stokes • Amanda Sturgeon • Maggie Thomas • Heather McTeer Toney • Alexandria Villaseñor • Alice Walker • Amy Westervelt • Jane Zelikova

Care and support affects a large number of people: eight out of 10 people aged 65 will need some care and support in their later years; some people have impairments from birth or develop them during their working life; some 5 million people care for a friend or relative, some for more than 50 hours a week. The current system does not offer enough support until a crisis point is reached, the quality of care is variable and inconsistent, and the growing and ageing population is only going to increase the pressure. Consequently, two core principles lie at the heart of this White Paper. The first is that individuals, communities and Government should do everything possible to prevent, postpone and minimise people's need for formal care and support. The system should be built around the promotion of people's independence and well-being. The second principle is that people should be in control of their own care and support, with personal budgets and direct payments, backed by clear, comparable information and advice that will allow individuals and their carers to make the choices that are right for them. This paper sets out the principles and approach, with sections covering: strengthening support within communities; housing; better information and advice; assessment, eligibility and portability for people who use care services; carers' support; defining high-quality care; improving quality; keeping people safe; a better local care market; workforce; personalised care and support; integration and joined-up care.

This book defends the much-disputed view that emotions are what Hume referred to as 'original existences': feeling states that have no intentional or representational properties of their own. In doing so, the book serves as a valuable counterbalance to the now mainstream view that emotions are representational mental states. Beginning with a defence of a feeling theory of emotion, Whiting opens up a whole new way of thinking about the role and centrality of emotion in our lives, showing how emotion is key to a proper understanding of human motivation and the self. Whiting establishes that emotions as types of

bodily feelings serve as the categorical bases for our behavioural dispositions, including those associated with moral thought, virtue, and vice. The book concludes by advancing the idea that emotions make up our intrinsic nature - the characterisation of what we are like in and of ourselves, when considered apart from how we are disposed to behave. The conclusion additionally draws out the implications of the claims made throughout the book in relation to our understanding of mental illness and the treatment of emotional disorders.

Our ability to communicate is a key part of everyday life and is an essential skill, particularly when communicating with vulnerable people in a health and social care setting. Presented in a unique and easy-to-use dictionary format, this practical guide will help students and practitioners understand and apply the principles of effective communication. From the 'how to' practicalities through to challenges and honing existing skills, this book will ensure they have the confidence and knowledge to communicate skilfully and successfully in many different contexts and settings. This book is essential reading for anyone working in the helping professions for whom good communication skills are an essential part of their role. The new edition features: New chapter entries covering empathy, documentation and simulation Group exercises added in each chapter New information on National Accessible Information Standards on learning difficulties

Everything students need to make the grade in BTEC Level 2 First Health and Social Care. This lively and comprehensive textbook covers all the core and optional units, making it suitable whether you are studying for the Certificate, Extended Certificate or Diploma. Each chapter covers a unit packed with: - Activities to help with assignments - Advice on gathering evidence - Explanations of the BTEC pass, merit and distinction criteria - Further reading - Pointers to additional resources Written by authors with a wealth of experience in delivering, verifying and writing for BTECs, this textbook is packed with knowledge of the Health and Social Care sector and how to get the most of your course. This textbook is supported by a separately available Dynamic Learning package for tutors

Tourism is no longer an innocent pleasure. It has been interpreted and reinterpreted as an activity which is ultimately damaging to receiving cultures and the environment. 'New' forms of tourism, such as ecotourism, alternative tourism, community tourism and ethical tourism, have been presented as morally superior alternatives to the package holiday, yet ironically, even advocates of these new, ethical tourism brands are increasingly subject to criticisms, not dissimilar to those they themselves level against package holidays. Using a host of international examples from the industry, the media and non-governmental organisations, this intriguing book examines what the advocates of 'new tourism' see as being wrong with mass tourism, looks critically at the claims made for the new alternatives and makes a case for guilt-free holidays. The only book on the market to provide a sustained critique of conventional mass tourism's own critics, Butcher offers a counterpoint to the moral rhetoric steadily turning travellers into guilty tourists.

This book has been written specifically for the WJEC GCSE Health and Social Care, and Childcare course. Resources include a student book and a supporting teacher book. This book is suitable for students of all abilities and covers the knowledge and skills students will need as they progress through the course.

Medical care, United States.

Meditating on how and why we teach the humanities, Generous Thinking is an audacious book that privileges the ability to empathize and build rather than simply tear apart.

This introductory text provides a wide-ranging collection of key readings in the field of health and social care. The book features classic readings alongside articles reflecting the most recent theoretical and empirical work. Cutting across the conventional divide between health care and social care, the Reader sets out to link policy to practice in a tangible way, juxtaposing the voices of a range of carers and service users with insights from academic debate and research. The Reader is divided into five sections focusing on: the experience of caring or being cared for; the environment in which care takes place; the ways in which care has been conceptualized; issues of abuse in care settings; and the pol Updated legislation and references to regulations where appropriate ensure that candidates and assessors have the most current information on frameworks related to the health and social care sector. Activities and case studies develop student understanding of care work in the real world.

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.

Recruiting and retaining a caring workforce to keep pace with the needs of an ageing society is one of the greatest challenges we face. At the same time, traditional methods of finding suitable care staff are delivering diminishing returns. The future of every care provider depends on solving this problem fast. Start now by reading this book.

A boy and a dog in danger - can they both be saved? Ben's mother is dead, his father in jail, and his older brother is heading off the rails at a million kilometres an hour. the social worker is fast running out of options, when the boys' aunt and uncle reluctantly agree to take them in. Just as well: they were the last on her list. Ben's uncle has bought a guard dog from a man at the pub, but she's useless - afraid of loud voices and frightened of her own shadow - and he's decided to have her put down. Ben and the unwanted dog recognize each other for what they are - damaged goods - and find some comfort and companionship together, which slowly grows into love and trust. that love will be needed when Ben's brother gets into seriously bad trouble, and Ben's trust in his dog is put to the ultimate test. For boys and girls alike, aged 12 - 14.

For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In The Life You Can Save, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. The Life You Can Save teaches us to be a part of the solution, helping others as we help ourselves.
