From 1800 to 1922 the Irish Question was the most emotional and divisive issue in British politics. It pitted Westminster politicians, anti-Catholic British public opinion, and Irish Protestant and Presbyterian champions of the Union against the determination of Ireland's large Catholic majority to obtain civil rights, economic justice, and cultural and political independence. In this completely revised and updated edition of *The Irish Question*, Lawrence J. McCaffrey extends his classic analysis of Irish nationalism to the present day. He makes clear the tortured history of British-Irish relations and offers insight into the difficulties now facing those who hope to create a permanent peace in Northern Ireland.

Sir Robert Warburton (1842-99) was a British army officer who served for 18 years as the political officer, or warden, of the Khyber Pass, the most important of the mountain passes connecting Afghanistan and present-day Pakistan. He was born in Afghanistan,

the son of a British officer and his wife, a noble Afghan woman who was the niece of Amir Dost Mohammad Khan. Warburton was educated in England, commissioned an officer, and served at posts in British India and in Abyssinia (present-day Ethiopia) before being appointed, in 1879, to his post in the Khyber. Home to the fiercely independent Pushtun Afridi people who resisted external control, the pass frequently had been blocked by the Afridis or by fighting among the hill tribes. Warburton is credited with keeping the frontier peaceful and the pass open, mainly through diplomacy rather than force. He drew upon his Afghan background and his fluent Persian and Pushto to gradually win the trust of tribesmen whose traditions made them deeply suspicious of outsiders. In August 1897, one month after Warburton's retirement, unrest broke out among the Afridis, who seized the pass and held it for several months. Warburton was called back into service and participated in the Tirah expedition of 1897-98, in which Anglo-Indian forces reopened the pass. Warburton was especially proud of the role played in the expedition by the Khyber Rifles, a paramilitary force recruited from Afridi tribesmen that he had raised and commanded. *Eighteen Years in the Khyber, 1879-1898* is Warburton's account of his education and career. It touches upon virtually every individual and event that played a role in relations between Afghanistan and British India during the last quarter of the 19th century. Long in poor health, Warburton returned to England and died before the book was completed. Posthumously published, it is illustrated with a number of striking photographs and

This book offers a broad overview of the field of cognitive engineering and neuroergonomics, covering emerging practices and future trends toward the harmonious integration of human operators and computational systems. It gathers both theoretical and practice-oriented studies on mental workload and stress, activity theory, human reliability, error and risk. It covers applications in various field, and corresponding strategies to make assistive technologies more user-oriented. Further, the book describes key advances in our understanding of cognitive processes, including mechanisms of perception, memory, reasoning, and motor response, with a particular focus on their role in interactions between humans and other elements of computer-based systems. Gathering the proceedings of the AHFE 2021 Conferences on Neuroergonomics and Cognitive Engineering, Industrial Cognitive Ergonomics and Engineering Psychology, and Cognitive Computing and Internet of Things, held virtually on July 25-29, 2021, from USA, this book offers extensive information and a thought-provoking guide for researchers and practitioners in cognitive engineering, neuroergonomics and their applications.

Beyond Technology offers a challenging new analysis of learning, young people and digital media. Disputing both utopian fantasies about the transformation of education and exaggerated fears about the corruption of childhood innocence, it offers a level-headed analysis of the impact of these new media on learning, drawing on a wide

range of critical research. Buckingham argues that there is now a growing divide between the media-rich world of childrens lives outside school and their experiences of technology in the classroom. Bridging this divide, he suggests, will require more than superficial attempts to import technology into schools, or to combine education with digital entertainment. While debunking such fantasies of technological change, Buckingham also provides a constructive alternative, arguing that young people need to be equipped with a new form of digital literacy that is both critical and creative. Beyond Technology will be essential reading for all students of the media or education, as well as for teachers and other education professionals.

Volumes 27 through 37 are collected columns from The Illustrated London News This volume contains all of G.K. Chesterton's columns in The Illustrated London News from 1935 to 1936. Most of the weekly articles have never been printed in book form until Ignatius Press undertook to do the collected works. Chesterton lovers will be delighted to find this treasure filled with jewels quite the match of his best writing. The breadth and depth of his knowledge - from history to politics to English fads and conventions - never fail to impress, and his wit is as refreshing as when these pieces were first written. This book is the last of The Illustrated London News volumes. It includes a subject index which covers all the The Illustrated London News volumes (27-37). Explores how marriage in Ireland was perceived, negotiated and controlled by church and state as well as by individuals across three centuries.

This long-awaited book is the first full-length study of the work of the extraordinary contemporary black British playwright, Debbie Tucker Green. Covering the period from 2000 (*Two Women*) to 2017 (a profoundly affectionate, passionate devotion to someone (-noun)), it offers scholars and students the opportunity to engage in cutting-edge critical debate engendered by Tucker Green's innovative dramatic works for stage, television, and radio. This groundbreaking book includes contributions by a range of outstanding scholars, including black playwriting specialists, world-leading contemporary theatre scholars and some of the very best emerging researchers in the field. While always focused on the precision and detail of Tucker Green's work, this book simultaneously reframes broader debates around contemporary drama and its politics, poses new questions of theatre, and provokes scholarly thinking in ways that, however obliquely, contribute to the change for which the plays agitate.

What is Hip Hop? Hip hop speaks in a voice that is sometimes gruff, sometimes enraged, sometimes despairing, sometimes hopeful. Hip hop is the voice of forgotten streets laying claim to the high life of rims and tims and threads and bling. Hip hop speaks in the muddled language of would-be prophets--mocking the architects of the status quo and stumbling in the dark toward a blurred vision of a world made right. What is hip hop? It's a cultural movement with a traceable theological center. Daniel White Hodge follows the tracks of hip-hop theology and offers a path from its center to the cross, where Jesus speaks truth.

Traumatic brain injury (TBI) may affect 10 million people worldwide. It is considered the "signature wound" of the conflicts in Iraq and Afghanistan. These injuries result from a bump or blow to the head, or from external forces that cause the brain to move within the head, such as whiplash or exposure to blasts. TBI can cause an array of physical and mental health concerns and is a growing problem, particularly among soldiers and veterans because of repeated exposure to violent environments. One form of treatment for TBI is cognitive rehabilitation therapy (CRT), a patient-specific, goal-oriented approach to help patients increase their ability to process and interpret information. The Department of Defense asked the IOM to conduct a study to determine the effectiveness of CRT for treatment of TBI.

This text presents a tale of a man journeying from abject poverty and ill health in the back streets of the East End to a multi-million pound business empire and a magnificent mansion in the heart of the Surrey countryside. It introduces us to crushing poverty, dysentery, East End villainy, anti-semitism and more.

Annotation "The editors have brought together a range of eminent contributors who present a range of issues throughout the life cycle. The book asserts that it hopes to 'assist readers to anticipate change and discontinuity in people's lives

and think about strategies to support them' through the many challenges that they may face in their lives. In my view this book certainly does that and the editors and contributors are to be congratulated on the production of a relevant and contemporary text that I have no hesitation in both endorsing and recommending to all involved in supporting and or caring for people with learning disabilities."Professor Bob Gates, Project Leader - Learning Disabilities Workforce Development, NHS Education South Central, UK"

The editors have gathered an authoritative faculty to present and discuss a range of contemporary issues; both practical and ethical. The text is well grounded in the lived experience of people with disability and draws on the evidence-base of contemporary science. Each chapter includes thought provoking exercises. This is a seminal text for students and practitioners, researchers and policy makers."Associate Professor Keith R. McVilly, Deakin University, Australia"

I currently own a copy of the first edition and it has proved an invaluable resource time and time again. There is not an essay I complete that does not make reference to the book and I can consistently use it to reflect back on my practice as a student nurse and social worker. Having read several extracts from the new edition it does appear to include very high quality content covering learning disabilities over the lifespan ... if I were to personally recommend any book for

budding or current learning disability professionals then this would be it."James Grainger, Student Nurse/Social Worker, Sheffield Hallam University, UK"I like the way it has primary and secondary information from a range of sources. The exercises in the book also get you to think about the situation in question which helps us think about our values and anti-oppressive practice ... This book really does start with the basics and having a learning disability from birth and the effects, to in depth knowledge and literature ... This book would be very helpful to me as it brings in literature policies and models from both a health and social side, which is important for my course and collaborative working."Laura Jean Lowe, Student Nurse, Sheffield Hallam University, UK"It is written with a clearly conveyed in-depth knowledge and in a way that has professional lived experience within the context of the work. The authors have taken into account the emotional, client-centred approach to the modern practitioner's practice ... The book gives a true wealth of good practice scenarios that can only help practitioners be good at what they do and aspire to be."Lee Marshall, Student Nurse, Sheffield Hallam University, UKWith its spread of chapters covering key issues across the life cycle this text has established itself as the foundational primer for those studying the lived experiences of people with learning disabilities and their families, and outcomes achieved through services and support

systems. Recognising learning disability as a lifelong disability, this accessible book is structured around the life cycle. The second edition is refreshed and expanded to include seven new chapters, covering: Aetiology Breaking news (about disability) and early intervention Transition to adulthood The sexual lives of women Employment Personalisation People with hidden identities With contributions from respected figures from a range of disciplines, the book draws heavily upon multidisciplinary perspectives and is based on the latest research and evidence for practice. The text is informed by medical, social and legal models of learning disability, exploring how "learning disability" is produced, reproduced and understood. Extensive use is made of real-life case studies, designed to bring theory, values, policy and practice to life. Narrative chapters describe, in the words of people with learning disabilities themselves, their lives and aspirations. They helpfully show readers the kinds of roles played by families, advocates and services in supporting people with learning disabilities. New exercises and questions have been added to encourage discussion and reflection on practice. Learning Disability is core reading for students entering health and social care professions to work with people with learning disabilities. It is a compelling reference text for practitioners as it squarely addresses the challenges facing people with learning disability, their loved ones and the people

comprehensive volume *The Science of Health Disparities Research* is an indispensable source of up-to-date information on clinical and translational health disparities science. Building upon the advances in health disparities research over the past decade, this authoritative volume informs policies and practices addressing the diseases, disorders, and gaps in health outcomes that are more prevalent in minority populations and socially disadvantaged communities. Contributions by recognized scholars and leaders in the field—featuring contemporary research, conceptual models, and a broad range of scientific perspectives—provide an interdisciplinary approach to reducing inequalities in population health, encouraging community engagement in the research process, and promoting social justice. In-depth chapters help readers better understand the specifics of minority health and health disparities while demonstrating the importance of advancing theory, refining measurement, improving investigative methods, and diversifying scientific research. In 26 chapters, the book examines topics including the etiology of health disparities research, the determinants of population health, research ethics, and research in African American, Asians, Latino, American Indian, and other vulnerable populations. Providing a unified framework on the principles and applications of the science of health disparities research, this important volume: Defines the field of health disparities science

With its unprecedented scale and consequences the COVID-19 pandemic has generated a variety of new configurations of media. Responding to demands for information, synchronization, regulation, and containment, these "pandemic media" reorder social interactions, spaces, and temporalities, thus contributing to a reconfiguration of media technologies and the cultures and politics with which they are entangled. Highlighting media's adaptability, malleability, and scalability

The Cambridge Handbook of Sexual Development is a carefully curated conversation that brings together the top researchers in child and adolescent sexual development to redefine the issues, conflicts, and debates in the field. The Handbook is organized around three foundational questions: first, what is sexual development? Second, how do we study sexual development? And third, what roles might adults - including the institutions of the media, family, and education - play in the sexual development of children and adolescents? As the first of its kind, this collection integrates work from sociology, psychology, anthropology, history, education, cultural studies, and allied fields. Writing from different disciplinary traditions and about a range of international contexts, the contributors explore the role of sexuality in children's and adolescents' everyday experiences of identity, family, school, neighborhood, religion, and popular media.

"This book assesses American, Canadian, and Swedish legal challenges to the explosive spread of pornography within their significantly different democratic systems and constructs a political and legal theory for effectively challenging the sex industry under law. The obstacles to this challenge are exposed as more ideological and

political than strictly legal, although they often play out in the legal arena. The pornography industry is documented to exploit vulnerable populations in making its materials. A thorough analytical review of empirical studies using complementing methods demonstrates that using pornography substantially contributes to consumers becoming more sexually aggressive, on average desensitizing them and contributing to a demand for more subordinating, aggressive, and degrading materials. Consumers are also often found wishing to imitate pornography with unwilling partners; many demand sex from prostituted people, who have few or no alternatives. Most young men regularly consume pornography. Legal challenges to the harms are shown to be more effective under legal systems that promote equality and when the laws empower those most harmed, in contrast to state-enforced regulations (e.g., criminal obscenity laws). Drawing on feminist theory, among others, this book argues that pornography is among the linchpins of sex inequality, contending that a civil society forum can empower those harmed, with representatives who have more substantial incentives to address them. This book explains why democracies fail to address the harms of pornography and offers a political and legal theory for making the necessary changes. The insights can be applied to other intractable problems of hierarchy"--

and Health in Partnership conference, which took place in Egmond aan Zee, the Netherlands in September 2002. The key aims of the conference were to focus on effective partnership working for health in schools and to consider the evidence base for health promoting schools programmes. A significant outcome of the conference was the Egmond Agenda, which outlines the principal components for success in establishing health promoting schools. Contributors from across Europe, the United States, South Africa and Australia present findings from national health promoting school projects, with a particular emphasis on the promotion of mental health. The volume will be of interest to all education and health professionals interested in the contributions of schools in promoting health, empowerment, action competence and wellbeing of young people.

This new study of British popular music shows how it engages with class in mythical ways that allow audiences to perform class-based identities. Case studies on folk rock, punk and indie rock show how this performance works and explore the implications for listeners and audiences.

Commissioned to mark the centenary of the Abbey Theatre in Dublin in 2004, *The Burial at Thebes* is Seamus Heaney's new verse translation of Sophocles' great tragedy, *Antigone* - whose eponymous heroine is one of the most sharply individualized and compelling figures in Western drama. Faithful to the 'local row' and to the fierce specificity of the play's time and place, *The Burial at Thebes* honours the separate and

irreconcilable claims of its opposed voices, as they enact the ancient but perennial conflict between family and state in a time of crisis, pitching the morality of private allegiance against that of public service. Above all, *The Burial at Thebes* honours the sovereign urgency and grandeur of the *Antigone*, in which language speaks truth to power, then and now.

Digital technologies are deeply embedded in everyday life with opportunities for information access and perpetual social contact now mediating most of our activities and relationships. This book expands the lens of Cyberpsychology to consider how digital experiences play out across the various stages of people's lives. Most psychological research has focused on whether human-technology interactions are a 'good' or a 'bad' thing for humanity. This book offers a distinctive approach to the emergent area of Cyberpsychology, moving beyond these binary dilemmas and considering how popular technologies have come to frame human experience and relationships. In particular the authors explore the role of significant life stages in defining the evolving purpose of digital technologies. They discuss how people's symbiotic relationship with digital technologies has started to redefine our childhoods, how we experience ourselves, how we make friends, our experience of being alone, how we have sex and form romantic relationships, our capacity for being antisocial as

well as the experience of growing older and dying. This interdisciplinary book will be of great interest to scholars and practitioners across psychology, digital technology and media studies as well as anyone interested in how technology influences our behaviour. This is a Divine Comedy or Pilgrim's Progress for the post-religious age. Finding himself on a quest through the forest of life towards the general rendez-vous at the end, our hero journeys first on the path of religion and faith, then the path of the philosophers where debate and ideas reign, and finally the path of worldly pursuits and pleasure. Along the way he dodges inquisitors, raging fanatics, insane philosophers, faithless lovers, and scheming social climbers. Truly a neglected classic. As Diderot said, "even if you are not amused, you may still benefit from it." This third edition was revised in 2018.

Public and academic debate about 'porn culture' is proliferating. Ironically, what is often lost in these debates is a sense of what is specific about pornography. By focusing on pornography's mainstream – contemporary commercial products for a heterosexual male audience – *Everyday Pornography* offers the opportunity to reconsider what it is that makes pornography a specific form of industrial practice and genre of representation. *Everyday Pornography* presents original work from scholars from a range of academic disciplines (Media Studies, Law, Sociology, Psychology, Women's Studies, Political Science), introducing new methodologies and approaches whilst reflecting on the ongoing value of older approaches.
