

## School Of Postgraduate Studies Ahmadu Bello University

This volume discusses emerging contexts of agricultural and ecosystem resilience in Sub Saharan Africa, as well as contemporary technological advances that have influenced African livelihoods. In six sections, the book addresses the sustainable development goals to mitigate the negative impacts on agricultural productivity brought about by climate change in Africa. Some of the challenges assessed include soil degradation, land use changes, natural resource mismanagement, declining crop productivity, and economic stagnation. This book will be of interest to researchers, NGOs, and development organizations. Section 1 focuses on climate risk management in tropical Africa. Section 2 addresses the water-ecosystem-agriculture nexus, and identifies the best strategies for sustainable water use. Section 3 introduces Information Communication Technology (ICT), and how it can be used for ecosystem and human resilience to improve quality of life in communities. Section 4 discusses the science and policies of transformative agriculture, including challenges facing crop production and management. Section 5 addresses landscape processes, human security, and governance of agro-ecosystems. Section 6 concludes the book with chapters uniquely covering the gender dynamics of agricultural, ecosystem, and livelihood resilience.

Postgraduate Studies Student's Research Logbook Student Handbook Postgraduate Studies INTERNATIONAL JOURNAL OF INTEGRATIVE HUMANISM Vol. 10 No. 2 Lulu.com

A successful administrator is one who applies suitable or appropriate leadership styles in various situations or contexts. It is crucial to investigate how effective administrators lead their organizations in challenging and difficult times, as well as promote the accomplishments of their organization. Predictive Models for School Leadership and Practices is an essential reference source that discusses academic administration as well as administrative effectiveness in achieving organizational goals. Featuring research on topics such as teacher collaboration, school crisis management, and ITC integration, this book is ideally designed for principals, researchers, academics, educational policymakers, and teachers seeking coverage on academic leadership and leadership models.

The Journal of Integrative Humanism is a publication of the Faculty of Arts, University of Cape Coast, Ghana. All papers, reports, communications and contributions published in this journal and copyright in the same are the property of Faculty of Arts, University of Cape Coast, Ghana and the University of Calabar, save where otherwise indicated.

A union list of serials commencing publication after Dec. 31, 1949

The convergence of technologies and emergence of interdisciplinary and transdisciplinary modus of knowledge production justify the need for research that explores the disinterestedness or interconnectivity of the information science disciplines. The quantum leap in knowledge production, increasing demand for information and knowledge, changing information needs, information governance, and proliferation of digital technologies in the era of ubiquitous digital technologies justify research that employs a holistic approach in x-raying the challenges of managing information in an increasingly knowledge- and technology-driven

dispensation. The changing nature of knowledge production for sustainable development, along with trends and theory for enhanced knowledge coordination, deserve focus in current times. The Handbook of Research on Records and Information Management Strategies for Enhanced Knowledge Coordination draws input from experts involved in records management, information science, library science, memory, and digital technology, creating a vanguard compendium of novel trends and praxis. While highlighting a vast array of topics under the scope of library science, information science, knowledge transfer, records management, and more, this book is ideally designed for knowledge and information managers, library and information science schools, policymakers, practitioners, stakeholders, administrators, researchers, academicians, and students interested in records and information management.

Interrogates the narratives of "land grabbing" and "agricultural investment" through detailed local studies that illuminate how these are experienced on the ground and the implications for Africa's land and agricultural economy.

Focus on The Identity of the Mbula people of the Benue valley in north-eastern Nigeria. It relays who the Mbula people are by unearthing their cultural value while redressing some misrepresentations on their socio-political and religious life.

This conference proceedings focuses on enabling science and mathematics practitioners and citizens to respond to the pressing challenges of global competitiveness and sustainable development by transforming research and teaching of science and mathematics. The proceedings consist of 82 papers presented at the Science and Mathematics International Conference (SMIC) 2018, organised by the Faculty of Mathematics and Natural Sciences, Universitas Negeri Jakarta, Indonesia. The proceedings are organised in four parts: Science, Science Education, Mathematics, and Mathematics Education. The papers contribute to our understanding of important contemporary issues in science, especially nanotechnology, materials and environmental science; science education, in particular, environmental sustainability, STEM and STEAM education, 21st century skills, technology education, and green chemistry; and mathematics and its application in statistics, computer science, and mathematics education.

Nigerian Federalism: Continuing Quest for Stability and Nation-Building explores the nature of and the debate over a number of recurrent issues, such as the "origins of Nigerian federalism, the number of state units in the federal system, fiscal issues, political parties, distributional issues, and intergovernmental relations" in Nigerian federalism since the establishment of protofederalism under the Richards Constitution, 1946 seventy years ago. In exploring the issues, the book seeks to answer the question, "what accounts for the persistence of Nigerian federalism, despite the serious discontents that the debate throws up now and again?" The book offers a reinterpretation, which argues that the demand for true federalism, which anchors the major trend in the age-long debate on the structure of Nigerian federalism, is ahistorical and therefore static. The book uniquely emphasises the need to periodise the practice of Nigerian federalism into four major phases. Based on the periodisation, two cardinal propositions emerge from the various chapters of the book. First, in spite of separatist and centrifugal threats to its existence, Nigerian federalism has typically never sought to eliminate diversity, but to manage it. In this sense, the construction of Nigeria's federal system from its earliest beginnings shows clearly that it is both a creature of diversity and an understanding that diversity will remain ingrained in

its DNA. Secondly, Nigeria's federal practice has not sought to mirror any model of "true federalism", be it in the United States, Canada or elsewhere. Instead, Nigeria's federal system has been a homegrown, if unstable modulation between foedus and separatus, a constantly negotiated terrain among centripetal and centrifugal forces and between centralisation and decentralisation. Consequently, a historical, periodised understanding of Nigerian federalism is inevitably essential. It is this historical and theoretical-methodological approach to explaining and understanding Nigerian federalism that gives the book its unique character. The book is for the general reader as well as for students, including researchers of Nigerian federalism and of Nigerian constitutional and political development, policymakers, and political parties.

During the summer of 2010 Ghana played host to the first ever conference held within Africa to focus solely on the relationship of the African Christian and Islam. The event was led by John Azumah in partnership with the Center of Early African Theology. The conference, chaired by Archbishop John Olorunfemi Onaiyekan of Abuja welcomed over 50 participants from across 27 African countries and several denominations. This book is a collection of the papers presented by 22 of the delegates forming a historical survey and thematic assessment of the African Christian and Islam. In addition, key information on the introduction, spread and engagement of Islam and Christianity within 9 African countries is presented. The book closes with Biblical reflections that opened each day of the conference, providing useful examples of Christians reading the Bible in reference to Islam.

As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The Handbook of Research on Theory and Practice of Global Islamic Finance provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management, economic justice, and stock market analysis. It is designed for financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

First published in 1988, this book is a landmark in the study of one of the major African languages: Hausa. Hausa is spoken by 40-50 million people, mostly in northern Nigeria, but also in communities stretching from Senegal to the Red Sea. It is a language taught on an international basis at major universities in Nigeria, the USA, Western and Eastern Europe, the Middle and Far East, and is probably the best studied African language, boasting an impressive list of research publications. As Nigeria grows in importance, so Hausa becomes a language of international standing. The volume brings together contributions from the major contemporary figures in Hausa language studies from around the world. It contains work on the linguistic description of Hausa, various aspects of Hausa literature, both oral and written, and on the description of the relationship of Hausa to other Chadic languages.

Politics and Identity Formation in Southeastern Nigeria explores the social, cultural, economic, political and aesthetic traditions that distinguish the Igbo of southeastern Nigeria from their neighbors. It is both multi- and cross-disciplinary in scope, focusing on experiences and forces that shaped the Igbo society.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

This book looks at the ways African borders impact war and conflict, as well as the ways continental integration could contribute towards cooperation, peace and well-being in Africa. African borders or borderlands can be a source of problems and opportunity. There is often a historical, geospatial and geopolitical architecture rooted in trajectories of war, conflict and instability, which could be transformed into those of peace, regional and continental integration and development. An example is the cross-border and regional response to the Boko Haram insurgency in West Africa. This book engages with cross-border forms of cooperation and opportunity in Africa. It considers initiatives and innovations which can be put in place or are already being employed on the ground, within the current regional and continental integration projects. Another important element is that of cross-border informality, which similarly provides a ready resource that, if properly harnessed and regulated, could unleash the development potential of African borders and borderlands. Students and scholars within Geography, International Relations and Border Studies will find this book useful. It will also benefit civil society practitioners, policymakers and activists in the NGO sector interested in issues such as migration, social cohesion, citizenship and local development.

This book offers a comprehensive account of the nature and development of political communication in Africa. In light of the growing number of African states now turning towards democratic rule, as well as the growing utilization of information technologies in Africa, the contributors examine topics such as: the role of social media in politics, strategic political communication, political philosophy and political communication, Habermas in Africa, gender and political communication, image dilemma in Africa, and issues in political communication research in Africa, and identify the frontiers for future research on political communication in Africa.

"This book examines issues concerning emerging multimedia technologies and their challenges and solutions in teaching and learning, exploring the global society's effect on learning"--Provided by publisher.

It is increasingly being recognised across society that the preservation of our natural environment should shape political, economic and social policies. This book delves into the partnership of non-governmental organisations (NGOs), Environmental NGOs (ENGOs), their communities, and their governmental counterparts in responding to this need.

Companies in today's market are continually looking for techniques that will enhance and improve their overall performance. The rise of data analytics in recent years has changed the way managers are viewing performance methods within an organization. Innovative strategies in developing organizational execution are becoming more accessible; however, there remains a lack of research on performance improvement methods through scientific analysis. Cases on Performance Improvement Innovation is a collection of innovative research that illustrates many applications of performance improvement based on analysis, selection of strategy, monitoring, and evaluating results to accomplish organizational change through people, processes, and organizations.

While highlighting topics including intervention analysis, organizational development, and human performance technology, this book is ideally designed for students, researchers, executives, managers, practitioners, educators, and academicians seeking current research on contemporary innovations in organizational performance.

How museums can work with archaeologists to ensure that the results of their research are accessible to the public in the region of the research itself.
