I Explore A Science Textbook for Class 1 comprehensively provides all the materials required for effective learning of the different elementary aspects of science. I Explore is an eight-level series of textbooks in science. As envisaged in the National Curriculum Framework (2005) guidelines, these books have been designed to present science as a living body of knowledge where students are encouraged and guided to make exploratory forays of their own. Book 7 conforms strictly to latest NCERT syllabus specifications for science at the middle school level. Care has been taken to inculcate scientific aptitude in students through a variety of exercises and activities and to enhance their investigative and analytical ability. Tasks and exercises have been incorporated to facilitate Continuous and Comprehensive Assessment (CIE).

The Web is notoriously unreliable, yet it is the first place many students look for information. How can students,

teachers, parents, and librarians be certain that the information a Web site provides is accurate and age appropriate? In this unique book, experienced science educator Judith A. Bazler reviews hundreds of the most reliable earth science-related Web sites. Each review discusses the most appropriate grade level of the site, analyzes its accuracy and usefulness, and provides helpful hints for getting the most out of the resource. Sites are organized by topic, from Air Movements to Wetlands, making it easy to locate the most useful sites. A handy summary presents the best places on the Web to find information on science museums, science centers, careers in the earth sciences, and supplies. Recent data collected by the U.S. Department of Education shows that homeschooling has grown by 61.8% over the last decade. Two million children—4 percent of the total youth population in the United States—are homeschooled. But despite its growing popularity, homeschooling isn't for everyone. Students need the right support from parents, and parents must make sure their children get a well-rounded "classroom" experience. There are also other factors to consider. So how do you know if homeschooling is right for you? And how do you get started? *Homeschooling For Dummies, 2nd Edition* will take you through the ins and outs of home learning so you can make the right decisions for your family. Topics covered include: Developing curricula for different grade levels and abilities Organizing and allocating finances Creating and/or joining a homeschooling community Encouraging socialization Special concerns for students with special needs
