YOU'VE HEARD IT SAID A THOUSAND TIMES . . . WITH GOD ALL THINGS ARE POSSIBLE! Radically transform your financial position in life to one of abundance and prosperity by discovering the hidden financial secrets of God's economy. After receiving revelation from the Lord in October 2006, I discovered why I wasn't prospering as promised in the Bible. My beliefs were based upon my personal experiences rather than the word of God. I discovered I wasn't using all the talents that God created within me. These hidden talents are the seeds to our financial and business success. The Lord revealed to me that I should be living in God's economy of abundance and that my finances are not meant to be tied to the world's economic system. I was challenged to transform the way I think and learn to apply the principles of abundance in generating a 30-fold, 60-fold and 100-fold return. Once my eyes were opened to this revelation the Lord began to reveal opportunities to me. INTRODUCTION The first thing that comes to mind is: because the poor do not have money and the rich do have money; But what makes the difference between one and the other is not money; The biggest difference between a rich person and a poor person is their thoughts and attitudes. The way of thinking and seeing things is what creates the gap between rich and poor. Who thinks as rich has the insured wealth and who thinks as poor has assured poverty and therefore failure. I'm sure a lot of us have asked ourselves: Why are there people who reach wealth quickly and legally, and why others can not get out of poverty, regardless of the opportunities presented to them? Why are there men and women who can not reach the payment of the next fortnight with a peso, while some forge wealth that lasts several generations? This is not due to any kind of ritual or secret that only a few know. The answer lies in "the way of thinking." The rich are rich-minded, the poor are always thinking about the formula to avoid bankruptcy, while the rich think, How do I make this business profitable and successful by winning the maximum possible? The rich are very clear about their strategy, the important thing is to trust that they have the right to succeed, as much or more than others. Another difference is that rich people focus all their attention, their thoughts, their emotions and SPEAK on new ideas, projects, businesses and investments. Conversely, poor people think all the time in the lives of others, criticizing negatively, generating gossip and rumors. The rich man thinks about what other people's habits can be learned to succeed, and the poor man only admires others without taking any action to do what the rich do. Or many times they simply envy successful people with money. The important thing is to understand that being rich or poor is an apprenticeship, not a condition of birth. Remember that it is possible to adopt a millionaire mentality and one of the ways is to read finance books, talk to financially successful people, and attend seminars and conferences. It is important to look for new ways to learn and acquire the skills necessary to start a business of your own and be financially independent for financial well-being at work or at school. When we face an opportunity, to impel our mind so that it generates new options of triumph, instead of discarding it thinking that we are not ready to take advantage of it. We all want to have money and live in abundance. We are fascinated by those who have already achieved it. We would like to know how they did it and how we could get it. The only truth is that the difference between the rich and those who are not rich is that the former understand and do the things that others do not understand or do not understand. The rich follow rules of behavior that have helped them achieve fortune and these rules are what separate them from everyone else. He has endeavored to codify this behavior so that we can imitate it and improve our financial position. Specifically, they tell us the following: what people do to earn money; how they continue to win it, in a sort of virtuous circle; how they keep it once obtained; how they spend it; how they invest it; how they enjoy it; and how they donate it in an altruistic way (fortunate they).

Everybody wants it. Most of us worry about it throughout our lives. It is the number one "stated" reason for divorce. So, what is this powerful force that shakes and shapes this planet that can even break strong emotional bonds? The answer is "money". This guidebook is about the mechanics of making and investing your money wisely. You will also receive 197 specific tips and rules-of-thumb to help you evaluate any stock investment. This section alone could easily be worth much more than the asking price of the book. In researching this book the author was extremely surprised that most Americans receive little, if any formal education during their lives about the actual mechanics of money itself. This guidebook will teach you how to accumulate money via careful investments without denting your normal lifestyle too much. It will also teach you about the amazing miracle of compound interest resulting in your secure and happy retirement. You will receive razor sharp insight on creating real wealth. The guidebooks many subjects include: Using Internet meta-searchers to extract wealth-building information, How to "mine-the-miners instead of the investment, Legal and insurance protection, Moonlight money, Creating a "prosperity mind", Using technology not for technologies sake, The ins and outs of borrowing money, Secrets of appearances, Proven wealth building and social status techniques of prosperous people, Common denominators of millionaires and billionaires, Alternate forms of money other than currency, Tips on how to reduce your debt and improve your credit score, How to effectively deal with collection agencies, How to immediately negotiate and reduce your credit card APR"s, How to save on energy costs, Making better buying decisions, The ins and outs of car buying finances, taking a closer look at your housing expenses, Risks verses rewards thinking, Government T-Bills and Bonds, Moonlight and day trading, and a look at non-traditional incomes. Make no mistake about it. Most Americans, no matter how smart they are in general, will sadly retire with such small savings that they will certainly be provided for only by Social Security or Social Services Agencies. There will be a daunting situation coming in the not so distant future. Millions of "baby boomers" will create a historical strain on the Social Security retirement system. This mass retirement will bring the largest redirection and exchange of money ever known in any economy in the history of mankind! Not even the best financial experts can predict the consequences at this time. Will the system go broke? Will the retirement age be moved up to 70 years old? Will benefits be reduced to a pittance? The author, Jeff Springfield believes that the answer to a wealth creation and a secure retirement is to begin a financial plan immediately which does not rely on financial aid from the government or other agencies. Among other things he strongly encourages everyone to start by having multiple streams of income. For example, he strongly urges his readers to create their own home-based
