Authors will benefit hugely from this practical book by seeing how effective they can be at helping to promote their own books. Alison Baverstock encourages authors to work with publishers and agents but also explains how to 'go it alone' for authors who plan to self publish. The book covers: how marketing works; what opportunities there are; how authors can help; how to get noticed; how to get local publicity, organise a launch event and keep the momentum going after publication. The book also provides authors with a real insight into the publishing process and contains illuminating interviews with everyone concerned: editors, marketing people and, most importantly, authors.

The fifth edition of Marketing Strategy and Management builds upon Michael Baker's reputation for academic rigor. In addition, it covers the rapidly changing nature of customer relationships with both companies and brands, and the tools marketers use to create deeper consumer involvement.

The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

Expanding on the editors' award-winning article "Evolving to a New Dominant Logic for Marketing," this book presents a challenging new paradigm for the marketing discipline. This new paradigm is service-oriented, customer-oriented, relationship-focused, and knowledge-based, and places marketing, once viewed as a support function, central to overall business strategy. Service-dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision, rather than the exchange of goods, as the proper subject of marketing. It moves the orientation of marketing from a "market to" philosophy where customers are promoted to, targeted, and captured, to a "market with" philosophy where the customer and supply chain partners are collaborators in the entire marketing process. The editors elaborate on this model through an historical analysis, clarification, and extension of service-dominant logic, and distinguished marketing thinkers then provide further insight and commentary. The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice. Strategic Marketing Management (8th Edition) outlines the essentials of marketing theory and offers a structured approach to identifying, understanding, and solving marketing problems. This book delineates a comprehensive framework for articulating sound marketing strategies to guide business decisions involving product and service design, branding, pricing, sales promotion, communication, and distribution. The concepts, principles, and frameworks advanced in this book apply to a wide range of organizations, from startups to established market leaders, from packaged-goods manufacturers to value-added service providers, from nonprofit entities to for-profit corporations.
