Not only had he faced the demons of his past, he beat Death at its own game. Or so he thought... It's about Surviving the Read.

When Disney Imagineers installed hologram guides for the Magic Kingdom using teenage models, they had no idea the technology might backfire. But backfire it did: some nights when the kids go to sleep, they wake up in one of the Disney parks as a hologram. With the adventures in the first books now resolved, Kingdom Keepers III: Disney in Shadow follows the five teens—Finn, Philby, Willa, Charlene, and Maybeck—as they search to find Wayne, their mentor and head Imagineer, who has mysteriously gone missing. Concerned that Wayne has been abducted by the Overtakers—Disney villains, who along with other Disney characters, take over the parks when the turnstiles stop spinning and who want desperately to steer the parks to a far darker place—the five kids pick up a major clue from their close friend whose dreams (nightmares, really) often accurately predict the future. Clues from a dream lead the kids into Disney's Hollywood Studios and Epcot. Each clue seems tied to the last, and with the stakes growing ever higher, what starts out as a puzzle ends up as a fight for survival. A transparent paper box, a quest for a sword, rides on Soarin' and Maelstrom, life-and-death encounters with a giant snake and a devious Maleficent lead the Kingdom Keepers not only to begin to decipher deeper meanings to the clues but to discover new truths about themselves and their ever-growing friendships.

When the erratic but brilliant engineer Ty is nearly torn apart by excavation equipment, it is up to his friend Zoey to rescue him. On board the first explorer sun ship, the Constantia, Ty soon discovers that the failure of the enormous machine was no accident. Meanwhile, on his home planet of Pa'Kevutu, a simple act of defiance turns into a large scale revolution that threatens to change the oppressive corporate governmental structure. Hoping to distract the people from the message of the rebels, the corporate executives send the Constantia on a controversial mission to find much needed resources on a large asteroid. What Commander Wek and his crew discover is that the planet is the home of yet another human race but that fact does not dissuade them from their mission to rape the planet. With only a fleet of small defenseless orbiters and a great deal of determination, the inhabitants of the planet of Pa'Chot decide to defend themselves.
