The Swan name is inseparable from the history of Wyoming and the West, and when Swan made his mark in Wyoming in the 1880s, ranching was king. The largest among Alex Swan's many corporate creations, The Swan Land and Cattle Company, Ltd., was one of the larger livestock companies to operate in the American West, and it survived long after its founder's financial debacle in the great winter of 1886-1887. At one time, the Swan was said to be the largest private landowner in Wyoming, and at its peak it was certainly one of the largest sheep companies in the country. This new work for the first time relates the life of Alex Swan, and offers a complete history of the Swan companies. Lawrence M. Woods has combed the surviving corporate records and other documents held in the United States and abroad. At the height of his financial life, Swan was said to be the richest man in Wyoming Territory, and his influence extended beyond business affairs to community service, both in Wyoming and in Iowa. Yet, after his dramatic financial collapse, there were many who ridiculed what he had done, and Swan's silence has left those criticisms on the record, without rebuttal. Swan, a leader in the Wyoming Stock Growers Association from its founding in 1873, served as its second president. Promoting the use of Hereford cattle on the high plains, he was a force in the Wyoming ranching world, especially after his move to Cheyenne in 1874. Woods details Swan's life in the years after his separation from the Scottish-controlled Swan Land and Cattle Company, especially his activities in Ogden, Utah. The Swan companies continued operation into the mid-twentieth century. John Clay played a major role in their operation, and he figures prominently in their story. Alex Swan and the Swan Companies is an important portrait of the inner workings of the western cattle industry and its leaders. The book has a bibliography, index, and three appendices. It is bound in rich brown linen cloth and has a foil stamped spine and front cover. Western Lands and Waters Series, XXII

Turn your farm into a cash cow! Ron Macher offers a host of simple strategies for increasing your farm earnings, from purchasing durable equipment to growing economically viable crops. A seasoned expert in farm efficiency, Macher shows you how to locate a lucrative niche market for your products, optimize sales, and minimize costs. Whether you're buying a new farm or jump-starting an old one, Macher's savvy tips will help you turn your enterprise into a profitable business.

Contains the 4th session of the 28th Parliament through the session of the Parliament.

Filling a gap in contemporary food and globalization scholarship, this timely book presents recent case-study research on the globalization of food systems, and the impacts for communities around the world. It covers debates on new structures and food products, as well as detailed accounts of fresh horticulture, tropical crops and livestock. Drawing together contributions of twenty-six leading international social scientists from eleven countries, this book will interest researchers in geography, development studies, agricultural economics and political science, as well as professionals in the fields of trade and food policy.

Best Life magazine empowers men to continually improve their physical, emotional and financial well-being to better enjoy the most rewarding years of their life.

Includes proceedings, reports, statistics, etc. of different county and district agricultural institutes and societies.

?Emerging? (or ?black?) farmers are often considered a homogeneous group. While individual emerging farmers and agribusinesses in South Africa share a common history, the case studies in this book show that in fact significant differences exist among them that are often hidden beneath the averaging and aggregation typical of most analytical research. Presenting fifteen case studies of emerging agribusinesses in South Africa, this book has three main objectives: (1) to capture the human stories behind the emerging farms and agribusinesses in South Africa in order to showcase their rich diversity, historical backgrounds, current context, and future directions; (2) to highlight the best practices, opportunities, and challenges facing South Africa's emerging farmers and agribusinesses; and (3) to create a new set of instructional materials for academics and development practitioners, or as a point of reference for other entrepreneurs, members of government, and other practitioners engaged in agriculture and agribusiness. The case study format, a relatively new tool in the field of agribusiness management, allows for a close-up view of the entrepreneurs at the heart of the businesses, providing an ideal lens through which to take a snapshot of the agribusiness landscape of South Africa today.

This volume discusses the increasing occurrence of floods and tornadoes in Southern Africa over the last few years. The book discusses existing flood and tornado management protocols, indigenous approaches to mitigate disaster risk, urban and peri-urban flooding, tornado-induced flooding and windstorms, and the challenges and vulnerabilities associated with rural and transboundary floods. The book offers planning and recovery strategies to minimise impacts from these events through sustainable means. Such means include sustainable drainage systems, waste management in harbors and beaches, community engagement in flood-prone areas, and improved food security measures in urban poor households.

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.
