Essentials of gynaecology, 2/e for the undergraduate medical students. All the chapters have been updated keeping in view the current diagnosis and management guidelines. Chapters under the section Gynaecological Oncology, in particular, have been thoroughly updated with new information on classification, staging and management of premalignant and malignant conditions. Summary boxes, flow charts, algorithms and diagrams have been modified wherever required. Chapters, Abnormal Uterine Bleeding and Benign Diseases of the Vulva, have been entirely rewritten in accordance with the recent developments. Case scenarios, clinical photographs and self-assessment which includes case-based, long- answer and short-answer questions. Helps postgraduates and young practitioners to practice gynaecology with a thorough understanding of clinical diagnosis, investigations and evidence-based management.

In 2007, the Tianjin Binhai New Area (TBNA) and one of its administrative zones, the Tianjin Economic-Technological Development Area (TEDA), in northeast China commissioned the RAND Corporation to perform a technology-foresight study to help them develop and implement a strategic vision and plan for economic growth through technological innovation. The principal objectives were to identify the most-promising emerging technology applications for TBNA and TEDA to pursue as part of their plan for growth, to analyze the drivers and

barriers they would face in each case, and to recommend action plans for each technology application (TA). Seven TAs should form a pivotal part of TBNA's comprehensive strategic plan: cheap solar energy; advanced mobile communications and radio-frequency identification; rapid bioassays; membranes, filters, and catalysts for water purification; molecular-scale drug design, development, and delivery; electric and hybrid vehicles; and green manufacturing. The specific action plans can be integrated into an overarching strategic plan that rests on three legs: building a state-of-the-art R & D program; updating and expanding TBNA and TEDA's manufacturing base; and positioning TBNA and TEDA for the global marketplace. The plan offers TBNA a wealth of opportunities that will position it for the future development it envisions, and each TA emerges from one or more of TEDA's current pillar industries, making for a fluid transition that builds on existing strengths.
