

Ship Initial Inspection Checklist Port State Control Amsa

The complete study and revision guide for the International Standards of Training, Certification and Watchkeeping (STCW). For all ranks and serving crew in the mercantile marine, this study pack covers everything students need to revise when preparing for the oral assessment taken as part of the Deck Certificate of Competency at either junior or senior levels. Since publication of the first edition, there have been many new innovations throughout the industry. This guide is fully updated to reflect these changes and includes practice questions on International Safety Management (ISM), Electronic Chart Display and Information Systems (ECDIS) and the International Code for the Security of Ships and Port Facilities (ISPS), as well as hundreds of additional tutorial questions throughout the book and the accompanying interactive CD. This edition of The Seamanship Examiner has been fully updated with the latest amendments to the COLREGs and is a trusted study aid for all international STCW Deck Officer candidates including Officer of the Watch, Chief Mate and Master positions, plus those working coastal and inland waters in the fishing industry such as Deck Officers.

A comprehensive training and reference manual used as a textbook in maritime institutions. Addresses the prevention, control, and extinguishing of fires aboard commercial vessels and on offshore drilling rigs. Includes chapters on emergency procedures and equipment as well as case studies of past shipboard fires. Generously illustrated with drawings, photos, diagrams, tables, and checklists. Recommended reading for all maritime personnel and kept both in shipboard reference libraries and in the offices of maritime executives.

An encyclopedic guide to the modern practices, techniques, and tactics used in preparing and trying cases, with model programs for the handling of all types of litigation.

The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of Education and Training, Human Resources and Crew Resource Management, Policy and Economics and is addressed to scientists and professionals involved in research and development of navigation, safety of

navigation and sea transportation.

Now in its 15th year, "The NILOS Documentary Yearbook" provides the reader with an excellent collection of documents related to ocean affairs and the law of the sea, issued each year by organizations, organs and bodies of the United Nations system. Documents of the UN General Assembly, Meeting of State Parties to the 1982 UN Law of the Sea Convention, CLCS, ISBA, ITLOS, Follow-Up to the UN Straddling Fish Stocks and Small Island States Conferences, ECOSOC, UNEP, and UNCTAD are included first, followed by the documents of FAO, IAEA, IMO, and UNESCO/IOC. As in the previous volumes, documents which were issued in the course of 1999 are reproduced, while other relevant documents are listed. "The NILOS Documentary Yearbook" has proved to be of invaluable assistance in facilitating access by the community of scholars and practitioners in ocean affairs and the law of the sea to essential documentation. The entry of the 1982 UN Law of the Sea Convention into force on 16th November 1994 and of the Part XI Agreement on 28 July 1996, and progress in the implementation of Chapter 17 of Agenda 21, to be assessed at the 2002 Johannesburg World Summit, make continuation of this assistance of particular significance in the years to come. The members of the Yearbook's Advisory Board are: Judges Abdul Koroma and Shigeru Oda of the ICJ, Judges Thomas Mensah, Dolliver Nelson, and Tullio Treves of the ITLOS, as well as Rosalie Balkin, Edward Brown, Lee Kimball, Bernard Oxman, and Shabtai Rosenne.

A sharp, informed and thoroughly practical guide to contemporary and developing issues relating to sea pollution, prepared by leading academics and

practitioners with everyday hands-on experience. Pollution at Sea focuses on a number of the vital private law issues – compensation, insurance, contract and tort – thrown up by contemporary developments in the law of pollution. The book also intends to offer a critical analysis on emerging public law concepts, such as the legal position of seafarers from the perspective of criminal law in cases of pollution and the impact of port state control as a pollution control mechanism. Pollution at Sea is divided into three parts: 1. Private Law Liability Regimes 2. Rights and Liabilities of Particular Parties 3. The Impact of Public Law on the Actors Concerned In part 1; various liability regimes are dissected, including those which have been under the spotlight in recent years. This section has particular international appeal, and many of the regimes discussed are based at least in part on international conventions, agreements or practices. In part 2; the impact of pollution at sea on third parties is considered, with respect to the legal position of parties that might be perused either by the victims of pollution incidents or in some cases by the parties liable by way of a recourse action. Finally in part 3; recent relevant developments, particularly in the realm of public law are covered.

This exiting Marine Engine Room schedule inspection book is designed to guide you through proper inspection, as well as assist with your regular ship engine

maintenance routine checks. Product Information: Ship's Name- Date- Maritime Organization No- Call Sign- Port of Registry- Take Off Location- Destination- Engine Room Team- Main Engine Reading- Voyage- Auxiliary Engine Reading- Parameter- Ship Speed- Parameter- Fuel Level- Running Hour- Lube Oil on Board- Any Breakdown Recorded- Description of Breakdown- Action Taken- Engine Room Accident- Number of Persons Involved- Type of Accident- Description- Action Taken- Collision Experienced- Bunking Operation- Time- Location- Quantity- Notes Section. Introductory page on the first page to personalize log. Glossy paperback cover. 8.5" x 11" (21.59cm x 27.94cm). Thick white acid-free (55lb) paper of 110 pages to reduce ink bleed-through. The Seamanship Primer is a complete study and revision guide, based on the international

Standards of Training, Certification and Watch Keeping, for cadet and serving crew in the merchant marine sector. It is the ideal study package for anyone preparing for the oral assessment taken by every marine professional to acquire a Deck Certificate of Competency at various levels of seniority up through Master. With hundreds of tutorial questions and answers, plus interactive multiple choice examinations, the Primer is a trusted study aid for all international STCW Deck Officer candidates including Officer of the Watch, Chief Mate and Master positions, plus those working coastal and inland waters in the fishing industry such as Deck Officers. * Together with a CD-ROM, the book provides a complete examination study and revision package for all marine certificate of competency examinations * Full coverage of the latest STCW, ISPS, COLLREG, ISM and IMDG codes * PC-based Buoyage and Rules of the Road tutorial material on CD-ROM for enhanced learning

Since it was first published in 1964, Elements of Shipping has become established as a market leader. Now in its ninth edition, Branch's Elements of Shipping, renamed in memory of Alan Branch, has been updated throughout and revised to take in the many changes that have occurred in the shipping industry in recent years, including the impact of the economic crisis, the Panama Canal expansion and new legislation. All tables and data have been brought up-to-date and many new illustrations have been added. The book explains in a lucid, professional manner the basic elements of shipping, including operational, commercial, legal, economic, technical, managerial, logistical and financial considerations. It also explores how shipping markets behave and provides an overview of the international shipping industry and seaports. Filling a gap for the discerning reader who wishes to have a complete understanding of all the elements of the global shipping scene together with the interface with seaports, international
