This book presents the latest research and novel case studies on crime and corruption in the tourism and hospitality industry. It approaches tourism as both a globalised business impacting the livelihood of millions of people, and a highly challenging field of action for national legislators and law enforcement agencies. The global nature and ubiquity of tourism, as well as the core elements of the holiday experience - such as interactions with unknown environments and places, a care-free mind-set, novelty-seeking behaviour and anonymity - render it highly susceptible to victimisation, crime and corruption. Accordingly, the book addresses a

comprehensive set of emerging issues, including: conflict and fraud during holidays; criminal and negligence offences at tourists' expense; exploitation and mistreatment of service workers; deterioration of heritage, cultural and natural resources; and securitisation of tourism.

Navigating the Journey of Aging Parents proposes an entirely unique approach to the field of gerontology, giving dependent care receivers a voice. Caregivers will be made aware of what care receivers truly want during life's final chapters.

Exploring issues of housing, spirituality, personal care and death, Cheryl Kuba has created a testament to the dependent elderly. This book draws on numerous interviews with aging people and discusses common caregiver mistakes and interpretations, what a caregiver should expect when an aging parent moves in, and how to care for an aging parent from afar. Kuba also delves into such phenomena as guilt, role reversal, changing family dynamics, financial stress, and caring for oneself while caring for another. The 22.4 million elderly people being cared for in the United States comprises the fastest growing segment of the population, making this reference on the opinions and concerns of care receivers invaluable.

from a strictly company-level, product- or service-focused tactical task to an industry-wide strategic challenge, and analyses the role of intangible reputational aspects of cruise experiences, as well as peripheral components and stakeholders, as increasingly important factors for customer acquisition and retention. Safety and risk issues are a central theme, as well as the cruise sector's environmental and socio-economic impacts. Lastly, the book considers the increasing size of cruise vessels and the accompanying standardisation of facilities and itineraries, in conjunction with the hybridisation of cruise passengers in connection with expanding the competitive boundaries and intensity of competition in the cruise sector. The book approaches these issues as more than a mere public relations campaign, recognising the fact that they have since become the very essence of strategic cruise business development.

Roman triremes of the Mediterranean. The treasure fleet of the Spanish Main. Great ocean liners of the Atlantic. Stories of disasters at sea fire the imagination as little else can, whether the subject is a historical wreck - the Titanic or the Bismark - or the recent capsizing of a Mediterranean cruise ship. Shipwrecks also make for a new and very different understanding of world history. A History of the World in Sixteen Shipwrecks explores the ages-long, immensely hazardous, persistently romantic, and still-

ongoing process of moving people and goods across far-flung maritime worlds. Telling the stories of ships and the people who made and sailed them, from the earliest ancient-Nile craft to the Exxon Valdez, *A History of the World in Sixteen Shipwrecks* argues that the gradual integration of localized and separate maritime regions into fewer, larger, and more interdependent regions offers a unique window on world history. Stewart Gordon draws a number of provocative conclusions from his study, among them that the European "Age of Exploration" as a singular event is simply a myth - many cultures, east and west, explored far-flung maritime worlds over the millennia - and that technologies of shipbuilding and navigation have been among the main drivers of science and technology throughout history. Finally, *A History of the World in Sixteen Shipwrecks* shows in a series of compelling narratives that the development of institutions and technologies that made terrifying oceans familiar, and turned unknown seas into sea-lanes, profoundly matters in our modern world.
