Grace under pressure was Sarah's hallmark. Smashing antiques in her philandering ex-husband's brokerage firm lobby? Totally out of character. She's always been the one who coped. Who pleased. So how to explain tossing the valuables? And how to explain letting Charlie McNulty ride to the rescue? Charlie hates mess—emotional mess, in particular—and this is a doozy. He can't afford to get involved—not when he's about to make partner and Sarah's ex has a vote. Maybe Charlie can do the chivalrous thing, then get away clean. Great plan...until Sarah—and her kids—work their magic on him. Now, suddenly, he doesn't want to leave. In this groundbreaking book anthropologist Daniel Strouthes studies the development of a legal system by a North American Indian group—a small band of twentieth- and twenty-first-century Micmac in Nova Scotia—and analyzes their inventive land tenure law and territorial responses to settlement.

Simon loses his lucky soccer sock and thinks a Sock Monster ate it for dinner.

????????

Simon's socks, hot from the clothes dryer, shrink on his feet and make him shrink as well, taking him on an adventure in which he swims in a pot of soup and rides on the back of a worm.

As a young woman, Roseanne McNulty was one of the most beautiful and beguiling girls in County Sligo, Ireland. Now, as her hundredth year draws near, she is a patient at Roscommon Regional Mental Hospital, and she decides to record the events of her life.

MINERVA - The Roman Goddess of wisdom and the sciences as well as war.
THE MINERVA PROJECT - A development of the multi-national corporation ScienceStart
SCIENCESTART - Colin Bourke's company whose main aim is to develop financially viable scientific achievements. Six of the finest scientific minds in the western world are working on a venture to lay the foundations to control the last bastion of our natural world- time. This unique experiment becomes a disaster when the Minerva Project suffers a catastrophic malfunction causing five members of the team to find themselves no longer on Earth. The sixth member of the team remains on his home world to ponder his part in this devastating failure. Along with the five members of the project's initial research team, numerous other people from across Earth are summarily torn from their lives and deposited without rhyme or reason on this foreign world. These unfortunates include the last surviving members of a doomed British military expedition on the mountain of Isandhlwana in Africa, an Iroquois helicopter crew from an ill-fated mission during the Vietnam War, a hunted man from the streets of a city in Ireland, an SS officer on the run from justice in the aftermath of World War Two, a group of soldiers on opposite sides of the American Civil War and a suburban family innocently on holidays. Many other people are also transferred to the world of Perencore where they face a constant battle for survival in a harsh existence against seemingly overwhelming odds. Earth and Perencore are not the only worlds involved in this terrible violation of the natural order. The remnants of a mighty tribe of a people known as the Appor arrive in this new setting from their own planet. They too must face a constant fight to survive and find themselves battling a dreaded enemy from a time long past. These different characters individually, or as a collective begin an exploration of this extraordinary setting to seek answers to many questions about their current state of existence. More importantly they desperately search this new planet for a means of returning to their former lives on their home worlds. Some of the people involved in this dilemma find their lives uncomplicated enough to manage in this new society while others are forced to deal with a brutal existence where each and every day may bring about a sudden death at the hands of Perencore's inhabitants. Their only means of defence on this world is their superior know-how, intellect and advanced technology. The main threat to the lives of this world's new arrivals come in the form of a wide ranging group of merciless bandits called the Anhil. Another threat to the lives of the new inhabitants soon referred to by the local people as 'Beyonders' is the fact a long simmering feud is slowly escalating into a full-scale war between two mighty powers. The benign Hamaforth Kingdoms under the command of King Entell Thellon the Third have long been under threat of invasion by those persons overseeing the enemy state,

The Azzil Territories whose overlord, Ruler Jom Azzer has vowed to take control of the entire Kingdoms at all costs. By the end of this volume some of the new arrivals to this planet have, with the kind assistance of the more benevolent members of the local community assimilated themselves into this rudimentary and antiquated society. Others find their fight for survival an endless nightmare and one character advances to the upper echelon of the nobility. In these, their new lives they unknowingly become involved in the machinations of ongoing hostilities between the two forces which include numerous assassination plots and an attempt to overthrow the Hamaforth Kingdoms' monarchy by a bloody coup.

A book about a Zebra named Simon who wears all kinds of socks. He is ordinary in that he has black and white stripes like the other Zebras but he is special and unique because he wears socks everyday that express his personality.

Brat poses as an heir to the Ashby fortune and becomes more involved in family affairs than he wishes.

Politics is about everyone. Even if you are not a politician, you cannot even vote or participate in elections. From what time do you have to arrive at school every day? What is a crime? What can we do to avoid war? Which countries should we cooperate with... These are all politics! We need to think about and discuss politics frequently in order to know more about the world, for example: How was the United States born? How did ancient Rome and China manage society? Why are elections and voting important? When did capitalism and communism appear?
