The Highlights Book of Things to Do is the essential book of pure creativity and inspiration. Kids ages seven and up will find hundreds of ways to build, play, experiment, craft, cook, dream, think, and become outstanding citizens of the world. This highly visual, hands-on activity book shows kids some of the best ways to do great things--from practicing the lost arts of knot-tying, building campfires, connecting circuits, playing jump rope, drawing maps, and writing letters, to learning how to empower themselves socially, emotionally, and in their communities. The final chapter, Do Great Things, inspires kids become caring individuals, confident problem solvers, and thoughtful people who can change the world. Full List of Chapters: Things to Do Inside Things to Do Outside Science Experiments to Do Things to Build

Things to Do with Your Brain Things to Do in the Kitchen Things to Draw Things to Write Things to Do with Color Things to Do with Paper More Things to Do with Recycled Materials Do Great Things National Parenting Seal of Approval Winner, National Parenting Product Award (NAPPA) Winner, Mom's Choice Award, Gold Bank Street College of Education, Best Children's Books of the Year Step-by-step instructions with photos explain how to build simple indoor and outdoor furniture using common wooden crates and pallets. Fifteen quick projects with illustrated step-by-step instructions for handmade frames offer creative suggestions for decorating every room. Items include photo frames, message boards, botanical displays, shadow box frames, poster frames, more.

Learn amazingly icky facts, see the yucky photos, and gross out everyone you can! Welcome to a world filled with snot otters, puss caterpillars, spitting spiders, slime stars, snotties, and more! In "Get the Scoop, " you'll learn that snot, spit, and slime may seem gross, but there's a lot of amazing science in these icky fluids. Animals use them for communication, defense, to find food, to travel fast, and more. Jellyfish and corals produce "mucus nets" to capture prey. Parrotfish burp out a mucus blanket to sleep under every night, while sea stars and sponges release volumes of mucus to distract and discourage predators. Barracudas use mucus in their scales to increase their swimming speeds and protect them from parasites. Poison dart frogs release toxins with mucus. Hagfish secrete slime if another animal tries to eat them. Clams and mussels make "mucus strings" to bring food to their mouths. Hippopotamuses release "blood slime" that works as sunscreen and an antibiotic. Saliva helps animals in hundreds of ways, too. Anteaters and giraffes use sticky saliva to help them eat, while leeches, vampire bats, and ticks use chemicals in their saliva to help them feed on blood. Many mammals use saliva to help them recognize offspring and others spit saliva at predators and prey. The venom in shrews, snakes, and other reptiles comes from adapted salivary glands. Some animal saliva works like glue, helping swifts, termites, and wasps build nests.

Packed, with games, themes, & other ideas for attracting teens to the library. Well reviewed.

Traditional Chinese Edition of Pig the Tourist

Easy instructions and helpful color photos show how to create slime that glitters, glows in the dark, bubbles, and more. All that's needed are ordinary household items like glue, food coloring, and liquid starch.

Teaching your kids science just got better--and tastier! With the awe-inspiring and accessible recipes and projects in Amazing (Mostly) Edible Science, uniting science and cooking has never been easier. Introduce your children to the wonders of science by creating projects and experiments in your very own kitchen. Entertaining to make and spectacular to behold, not only will your child learn important scientific principles, but they can even enjoy the delicious final product. Almost everything made in this book is edible. Learn and appreciate projects like classic exploding volcano cakes, glow-in-the-dark Jell-O, singing cakes, and bouncy eggs. Food expert Andrew Schloss provides you and your kids with practical and humorous projects that include step by step instructions, illustrated with fun full-color photos sure to appeal to kids of all ages. \* All recipes/projects in this book are non-toxic and safe for consumption; some just to taste (slime, ectoplasm) and many you will love, such as molten chocolate cupcakes, disappearing peppermint pillows, and amber maple syrup crystals!

Packed with fun, edifying, and joyful art experiences, Play, Make, Create is filled with simple, yet powerful, "art invitations" that are focused on the making and doing, not just the final projects. Founded in a process-based philosophy, this unique book includes over 40 activities set up as invitations—carefully designed prompts or provocations to play or make something. Author Meri Cherry has over 20 years of teaching experience, and her blog [www.mericherry.com](http://www.mericherry.com) has set the standard for meaningful and enriching process art experiences that are both manageable for moms, and engaging and fun for kids. Play, Make, Create begins with an in-depth guide for parents, teachers, and facilitators that shares all the details—how to set up materials in an inviting way, how to present the activity and talk to kids about art, and how to stock your cabinets with the right materials for ongoing creativity, plus best-practice tips for clean up, trouble shooting, and more. Within the book, parents will find four types of creative invitations. Invitations to Explore are process-based, open-ended activities that are set up for ongoing play and discovery. Invitations to Create inspire children to make something. By exploring, playing, and discovering what the materials offer, children will create exciting projects such as salt paintings, a mini book, a shadow box, puppets, nature crafts, clay sculptures and more, each with completely individual results. Invitations to Play are sensory-based activities such as making doughs, slime, moving toys, and more. Lastly, there are Invitations to Collaborate. These are fun group projects, perfect for playdates, families, classrooms, and parties. As children explore the activities in Play, Make, Create, they are engaged in active, meaningful, and socially interactive learning. Children are encouraged to wonder, to experiment, and to use critical thinking—and most of all, enjoy the process. By following their own inclinations and making their own choices, children gain self-confidence and hone their problem solving skills. GetPlay, Make, Create and give your children the gift of creativity. These activities wake up kids' brains and get them busy doing things. The tactile, colorful, and engaging materials also offer a way to decompress and relax, as well as build fine motor and critical thinking skills. Giving your children these creative play opportunities is a way to say "I love you. I thought about you. You are important to me. Your ideas are important to me."

Molecular Typing in Bacterial Infections covers common bacterial pathogenic agents, with the most effective methods for their identification and classification in the light of their specific epidemiology. The book will be a valuable resource for molecular typing of infectious diseases agents encountered in both the research and hospital clinical lab settings, as well as culture collections. Each chapter provides an overview of molecular approaches to typing bacterial pathogens. Part I gives a general overview of typing methods used

in the traditional microbiology laboratory in comparison to molecular methods of epidemiology. In Part II, the relative strengths and weaknesses of the different methods applicable to the specific agents of infectious diseases are emphasized. Specific emphasis is placed on recent changes and updates in molecular typing.
