Case Study #1: Abraham Lincoln Case Study #2: Warren Buffett 7 Steps to Starting and Holding a Conversation 21 Ways to Connect with Anyone, Anywhere 14 Actionable Tips to Becoming More Likeable How to Continue Conversations After the First Meeting Ends How to Maintain Authentic Relationships in Your Life Conclusion An excerpt from the book: 'Social' is the singular buzzword that both describes and dictates 21st century living. Almost everyone perceives themselves to be social. Most people have been to a 'social' event, be it an Ice Cream Night at the elementary school or a local singles dance. The concept is not new, and the word itself traces its first use back to the 15th century. However, why is 'social' suddenly so ubiquitous? 'Social' evokes images of carefree social butterflies and refined social graces. It denotes a cheerful disposition and good times. Nothing bad can be said about being social. It is no wonder that the ad world and Internet attach the term to virtually everything. However, 'social' carries more import than dubious buzzwords like 'disambiguate' or 'dog-fooding.' The latter terms are meant to inflate the importance of that to which they refer. 'Disambiguate' simply means clarify, and 'dog-fooding' entails that a company trusts their own products enough to use them. Hence, the terms are little more than business-speak for relatively simplistic ideas. An excerpt from the book: Antisocial Personality Disorder, like most personality disorders, is believed to be the result of a combination of factors. These factors come in two different regards: genetic or biological factors, which include risk factors, such as hereditary factors, chemical or hormonal imbalances, or early brain damage and environmental factors, which include home life, socialization, learning, etc. The more these risk factors are present for a given individual, the greater the chance that he or she will develop Antisocial Personality Disorder. However, this does not mean that all individuals who have some or even all of these risk factors present in them will, in fact, develop Antisocial Personality Disorder. Diagnosis should be carried out by a professional and must be based on behavior, not risk factors.
