This book explores the ways in which different generations think about how the welfare state is organised at present, and how it will be organised in future. Using the results of a study from Canada, Australia and Sweden, the book's findings complement more traditional studies of the welfare sector, capturing the anxieties of citizens about the present and future of their countries' welfare models, and presenting their thoughts on how the system can be re-organised in future. Positioning their three-country study within the history of the welfare state around the world, the authors seek to re-assess the role of the welfare state in governments around the world. Their findings will be of interest to those studying welfare policy as well as innovations such as basic income, e-health and policy responses to automisation.

Social Work in Juvenile and Criminal Justice Systems sets the standard of care for mental health treatment and the delivery of social services to crime victims, juvenile and adult offenders, and their families. The chapters, all authored by experts in the field and all committed to the mission of social justice, are written with the clear understanding that we cannot study criminal justice in a vacuum. Therefore, a major focus of the book is on the renewed growing sense of the profession’s obligation to social justice. Each chapter interconnects with the

various components of juvenile and criminal justice. Another prominent aspect of the book is that it is strength-based. It views those involved in the criminal and juvenile justice systems as individuals rather than inmates or criminals, each with unique positive talents and abilities. The book is divided into four sections. The first section discusses forensic social work, including crime and delinquency theories, trends, and ethical issues. The second section prepares social workers for practice in correctional institutions and explores crisis intervention with victims of violence, reentry of adult offenders in society, and aging in prison. The third section covers assessment and intervention in child sexual abuse, mental health and substance abuse, interpersonal violence and prevention, child welfare and juvenile justice. The final section presents an overview on social work in the twenty-first century, which includes restorative justice and the justice system, new ways of delivering justice, domestic violence, neighborhood revitalization, race and ethnicity, and social work practice with LGBTQ offenders. This book will be the best single source on social work in criminal justice settings and will prove to be an invaluable resource for the many professionals who have responsibility for formulating and carrying out the mandates of the criminal justice system.
