20. yüzyılın son çeyreği gerek kamu sektöründe gerekse özel sektörde yönetim anlayışının değişimini gerektiren bir takım gelişmelere sahne olmuştur. Son savaş sonrası etkisini daha çok göstermeye başlayan küreselleşme ve beraberinde getirdiği; yoğun rekabet ortamı, teknolojik gelişmeler, piyasalar üzerinde azalan devlet müdahaleleri, farklı kültürler sahip çalşan ve müşteri profili örgütlerin yönetime bakış açılarında bir paradigma değişimini zorunlu hale getirmiştir. Bu paradigma değişimi merkezîyetçi, katlı hiyerarşiy ve örgüt yapılarına sahip, gizlilik esaslı bir yönetim anlayışından; yönetişim ve takım çalşmas odaklı, yumuşak hiyerarşiy ve esnek örgüt yapıları içeren, farklılıklara önem veren bir yönetim anlayışına geçişini ifade ediyordu. 21. yüzyılda değişen örgüt yapılarının amaçlarına ulaşabilmesi için klasik yönetici anlayışından daha çok liderlik vasıflarına sahip insanlara ihtiyaç duyulmuş ve örgütler için liderler, hızla değişen iç ve dış unsurları öngörerek sürdürülebilir rekabet üstünlüğü sağlayabilmenin en önemli aracı olarak görülmeye başlanmıştır. Günümüzde örgütlerin başarısında liderlik yetkinlikleri ön plana çıkmakla beraber her örgüt yapıları için geçerli olabilecek bir liderlik modeli olmadı ve ortaya çıkan çok sayıda liderlik yaklaşımının liderlik kavramına çok daha karmaşık hale getirdiği de bir gerçektir.

Understanding Parricide is the most comprehensive book available about juvenile and adult sons and daughters who kill their parents. Dr. Heide moves far behind the statistical correlates of parricide by synthesizing the professional literature on parricide in general, matricide, patricide, double parricides, and familicides. As a clinician, she explains the reasons behind the killings. Understanding Parricide includes in-depth discussion of issues related to prosecuting and defending parricide offenders. The book is enriched with its focus on clinical assessment, case studies, and follow-up of parricide offenders, as well as treatment, risk assessment, and prevention.

The proceedings of the 2017 Symposium on Chaos, Complexity and Leadership illuminate current research results and academic work from the fields of physics, mathematics, education, economics, as well as management and social sciences. The text explores chaotic and complex systems, as well as chaos and complexity theory in view of their applicability to management and leadership. This proceedings explores non-linearity as well as data-modelling and simulation in order to uncover new approaches and perspectives. Effort will not be spared in bringing theory into practice while exploring leadership and management-laden concepts. This book will cover the analysis of different chaotic developments from different fields within the concepts of chaos and complexity theory.

Researchers and students in the field will find answers to questions surrounding these intertwined and compelling fields.

He approaches the remarkable answers that proves this brilliant book is a revolution. Distributed by Tsai Fong Books, Inc.

Solomon/Berg/Martin, BIOLOGY -- often described as the best majors text for LEARNING biology -- is also a complete teaching program. The superbly integrated, inquiry-based learning system guides students through every chapter. Key concepts appear clearly at the beginning of each chapter and learning objectives start each section. Students then review the key points at the end of each section before moving on to the next one. At the end of the chapter, a specially focused Summary provides further reinforcement of the learning objectives. The ninth edition offers expanded integration of the text's three guiding themes of biology (evolution, information transfer, and energy for life) and innovative online and multimedia resources for students and instructors Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Continuing Garrett and Grisham's innovative conceptual and organizing Essential Questions framework, BIOCHEMISTRY guides students through course concepts in a way that reveals the beauty and usefulness of biochemistry in the everyday world. Offering a balanced and streamlined presentation, this edition has been updated throughout with new material and revised presentations. For the first time, this book is integrated with OWL, a powerful online learning system for chemistry with book-specific end-of-chapter material that engages students

and improves learning outcomes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

In this classic spiritual guide, Paramahansa Yogananda, author of Autobiography of a Yogi, dispels the myth that God is beyond our reach. He points out that it is not only possible to talk with God but to receive definite responses to our prayers. Defining the Lord as both the transcendent, universal Spirit and the intimately personal Father, Mother, Friend, and Lover of all, he helps us to realize how close that infinite and all-loving Being is to each one of us. He also explains how we can make our prayers so powerful and persuasive that they will bring a tangible response.

In the wake of the Tiananmen Square massacre, Nan Wu, who had studied in the U.S. in the mid-1980s, leaves China with his wife and son to seek the freedom of the West, embarking on a migration that takes them through the heart of contemporary America.

Immuno Systems Biology aims to study the immune system in the more integrated manner on how cells and molecules participate at different system levels to the immune function. Through this book Kumar Selvarajoo introduces to physicists, chemists, computer scientists, biologists and immunologists the idea of an integrated approach to the understanding of mammalian immune system. Geared towards a researcher with limited immunological and computational analytical experience, the book provides a broad overview to the subject and some instruction in basic computational, theoretical and experimental approaches. The book links complex immunological processes with computational analysis and emphasizes the importance of immunology to the mammalian system.

This book constitutes the refereed proceedings of the 9th International Conference on Artificial Intelligence and Soft Computing, ICAISC 2008, held in Zakopane, Poland, in June 2008. The 116 revised contributed papers presented were carefully reviewed and selected from 320 submissions. The papers are organized in topical sections on neural networks and their applications, fuzzy systems and their applications, evolutionary algorithms and their applications, classification, rule discovery and clustering, image analysis, speech and robotics, bioinformatics and medical applications, various problems of artificial intelligence, and agent systems.
