Social sciences have always been an important tool that enables human beings to examine and understand society. Through social sciences, researchers gain understandings of social phenomena and changes by providing commentaries, producing explanations, and attempting to synthesize a diversity of information sets to formulate theories. Since the concept of change has been the hallmark of the new millennium, researchers have witnessed a transformation in every aspect of the modern world at an ever-increasing speed, particularly in the social facet of human life. Ways of thinking that had previously been upheld and taught may, therefore, no longer be appropriate or effective as tools to understand contemporary phenomena and changes. The Handbook of Research on Current Trends in Asian Economics, Business, and Administration is a critical reference source that examines different aspects of social sciences, management, sociology, and education to better understand today's society and social life in the Asian context. The book identifies trends, impacts, and implications of disruptive technologies for business and socio-economic development as well as strategic advantage on different levels of business and administration. Covering topics that include e-commerce, green management, information technology, economic growth, and distance learning, this book is essential for economists, academicians, government officials, policymakers, social scientists, managers, leaders, behavioral

scientists, academicians, researchers, and students.

A resource for information executives, the online version of CIO offers executive programs, research centers, general discussion forums, online information technology links, and reports on information technology issues.

In the era of globalization, foreign trade has an immense impact upon modern economies. To succeed in the global marketplace, sustainable development in trade practices is an imperative goal for countries to reach. Global Perspectives on Trade Integration and Economies in Transition is an authoritative reference source for the latest research on the dynamics of transitional economies and how certain obstacles can disrupt the effectiveness of the transition process. Highlighting the value of trade incorporation at the national and international levels, this book is ideally designed for researchers, professionals, government officials, policy makers, and upper-level students interested in the intersection of globalization, trade, and international economics.

Ülkelerin coğrafyalar? sabit kalsa da mevcut alan?n jeopolitik öneminin de?i?ebildi?ini söylemek, genellikle ?bn-i Haldun'a atfedilen "coğrafya kaderdir" sözünden hareketle, do?ru bir telaffuz olacaktır. Önemsiz gibi görünen bölgelerin iklim de?i?ikli?i, küresel ?s?tma ve buzullar?n erimesi gibi farklı nedenlerle stratejik bir konuma gelebildi?i görülmü?tür. Günümüzde ise jeopolitik önemi en çok artan bölge Arktika Bölgesi'dir (Rusya, ABD, Kanada, Norveç ve Danimarka). Gerek sahip oldu?u daha k?sa deniz ticareti yollar? gerekse varl??? ispat edilen maden ve hidrokarbon enerji kaynaklar?yla bölgesel ve küresel güçlerin rekabet alan?na dönü?en Arktika Bölgesi, ülkemizde hemen hemen ilgi görmeyen alanlar?n ba??nda gelmektedir. Bu çerçevede bu kitap, Arktika Bölgesi'nin sahip oldu?u potansiyel kaynak zenginli?i ile bir yandan ilgili devletler için rekabet unsuru olu?turdu?unu, di?er yandan bölgesel ve küresel aç?dan uluslararası sistemde güvensizlik ortam? yaratt???n? öne sürmektedir. Okuyan?n bir daha okuyaca??, alana ilgi duyanlar?n ba?ucu kitab? yapacaklar? bu çal??ma, Türk yaz?n hayat?na hay?rl? olsun. Dr. Ö?r. Üyesi Serdar Y?lmaz

This book is a collective attempt to present a wide-ranging picture of international attitudes towards the events currently ongoing in Ukraine. As some experts have already tended to claim, in 2014 this post-Soviet state lying in the Eastern part of the European continent has become a scene of the most serious geopolitical standoff since the end of the Cold war. It would be in place here to remind a well-known clear-cut maxim, formulated by Zbigniew Brzezinski in late 1990s and concerning Ukraine's key role in shaping the Russian imperial self-identity: "Without Ukraine Russia ceases to be a Eurasian empire". So what may readers expect to find in this book? It has been divided into two parts, reflecting the perspectives on Ukrainian crisis: first, the perspective of Ukraine's close neighbours from Central Eastern Europe and Turkey; second, the perspectives of the global players like the EU, the US or China. We hope that such a publication focused on the above-mentioned problems and embedded in the actual reality will be useful both for professionals in the field of political science, as well as for those who have an influence on the shape of the foreign policy.

In recent years, the world has been changing considerably. Within the many obstacles, barriers, and opportunities, three significant challenges should be considered for the future planning of our territories and cities: seeking to achieve Sustainable Development Goals (SDG), facing climate change, and performing a shift towards digitalization. Considering these three challenges, we can work toward a more

into the potential of rural tourism potential and its future development, through unique examples and case studies drawn from Turkey, which has been increasingly implementing this form of tourism in recent years. Given the continued existence of traditional lifestyles in rural areas and villages, in addition to the rich cultural heritage, local handicrafts, and the natural flora and fauna, rural tourism holds massive potential for Turkey. The volume will appeal to both international academicians and tourism professionals and practitioners, in addition to anyone with an interest in rural areas and rural development.
