Be memorable. Whether you like it or loathe it, public speaking is something many of us have to do. Be it presentations to colleagues or speeches to a room full of near strangers, we all want to shine...or at least get through it with our dignity intact. Luckily Philip Collins, former Chief Speech Writer to Tony Blair, knows exactly what's needed to give a storming speech. The secret, according to Philip, is content. Too many of us focus on how we're presenting, and don't spend enough time thinking about what we're presenting. The secret to memorable, polished speeches is to think more about the material you're sharing – to pay attention to detail and choose your words carefully. Speech writing is an art – and an art we can all learn. When the content's right, the confidence will follow. In *The Art of Speeches and Presentations* Philip Collins provides you with a concise set of tools, preparing you for any speaking occasion. Ranging from the ancient history of rhetoric to what makes Barack Obama such a good speaker, it's packed with practical examples and tips to teach you the craft of speaking well and making people remember what to say. "Does Philip Collins know what he is talking about? Here's the answer – he isn't just good, he is the best. It's as simple as that. I spent years writing speeches for major politicians and I now speak publicly myself all the time, and yet there is so much that I can pick up from him and anyone who reads this book will too."—Daniel Finkelstein, Executive Editor, *The Times* and former speech writer to William Hague

This book discusses the revolutionary broadening of concepts of freedom of press and freedom of speech in Great Britain and in America in the late eighteenth century, in the period that produced state declarations of rights and then the

First Amendment and Fox's Libel Act. The conventional view of the history of freedoms of press and speech is that the common law since antiquity defined those freedoms narrowly, and that Sir William Blackstone in 1769, and Lord Chief Justice Mansfield in 1770, faithfully summarized the common law in giving a very narrow definition of those freedoms as mere liberty from prior restraint and not liberty from punishment after something was printed or spoken. This book proposes, to the contrary, that Blackstone carefully selected the narrowest definition that had been suggested in popular essays in the prior seventy years, in order to oppose the growing claims for much broader protections of press and speech. Blackstone misdescribed his summary as an accepted common law definition, which in fact did not exist. A year later, Mansfield inserted a similar definition into the common law for the first time, also misdescribing it as a long-accepted definition, and soon misdescribed the unique rules for prosecuting sedition as having an equally ancient pedigree. Blackstone and Mansfield were not declaring the law as it had long been, but were leading a counter-revolution about the breadth of freedoms of press and speech, and cloaking it as a summary of a narrow common law doctrine that in fact was nonexistent. That conflict of revolutionary view and counter-revolutionary view continues today. For over a century, a neo-Blackstonian view has been dominant, or at least very influential, among historians. Contrary to those narrow claims, this book concludes that the broad understanding of freedoms of press and speech was the dominant context of the First Amendment and of Fox's Libel Act, and that it enjoyed greater historical support.

Geared for undergraduate and graduate students, Goal Writing for the Speech-Language Pathologist and Special Educator details different types of goals, essential elements of goals, how to establish goals from information garnered from evaluations, and how to write continuing goals for the field of Speech-Language Pathology and Communication Sciences. It is written for students in a Clinical Methods/Clinical Practicum course who are about to begin their clinical experience in SLP. Real-world exercises are provided throughout in order to provide realistic examples of what students may encounter in speech and hearing clinics, hospitals, and schools. Goal writing is practiced by SLPs on a daily basis, and understanding how to turn diagnostic information into therapy is a difficult, yet crucial, task. This important subject is not covered in depth in other clinical methods titles yet is a skill all students and clinicians must master.

Similarities and differences between speech and writing have been the subject of innumerable studies, but until now there has been no attempt to provide a unified linguistic analysis of the whole range of spoken and written registers in English. In this widely acclaimed empirical study, Douglas Biber uses computational techniques to analyse the linguistic characteristics of twenty three spoken and written genres, enabling identification of the basic, underlying dimensions of variation in English. In Variation Across Speech and Writing, six dimensions of variation are identified through a factor analysis, on the basis of linguistic co-occurrence patterns. The resulting model of variation provides for the description of the distinctive linguistic characteristics of any spoken or written text and demonstrates the ways in which the polarization of speech and writing has been misleading, and thus enables reconciliation of the contradictory conclusions reached in previous research.
