The number of students whose first language is not English is increasing. As a result, many teachers need new resources to adapt their teaching of mathematics to support the mathematical learning of students with limited English, and to include them in rigorous instruction. By incorporating multimodal strategies, teachers can more confidently teach standards-based mathematics that can reach all of their students. Through simple, straightforward language and examples, this resource helps teachers develop specialised understanding and strategy knowledge for supporting a high level of mathematics learning along with language acquisition.

Educating children and leading them towards the path of bilingualism is a valuable and challenging task for any educator. Effective language teaching can contribute to young learners' cognitive growth, develop their problem-solving skills, enhance their comprehension abilities, and provide children with the satisfaction of succeeding in the challenge of learning a foreign language. All these issues must be taken under consideration when researching children and their teachers. The current literature indicates that further material is needed to provide professionals with different classroom situations and enhance the art of teaching children. *Teaching Practices and Equitable Learning in Children's Language Education* focuses on various perspectives of efficient practices, approaches, and ideas for professional development in the field of young language learners. The chapters in this book link the theoretical understanding and practical experience of teaching children languages by concentrating on teaching practices, material design, classroom management, reading, speaking, writing, and more. This book is designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the field of early language learning and applied linguistics at large.

It is increasingly being acknowledged that subject leaders hold the key to school improvement and professional development. However, there is little information available for subject leaders to help them with the day-to-day practicalities of running a department on top of existing teaching commitments. This uniquely practical book deals specifically with current issues faced by subject heads of department (HoDs). Engagingly and entertainingly written, this book covers the major areas of concern to subject leaders, including leadership styles, managing staff, managing pupil

performance, strategic planning, curriculum development and coping with problems.
