Schools across the United States and Canada are disrupting the adverse effects of poverty and supporting students in ways that enable them to succeed in school and in life. In this second edition, Parrett and Budge show you how your school can achieve similar results. Expanding on their original framework's still-critical concepts of actions and school culture, they incorporate new insights for addressing equity, trauma, and social-emotional learning. These fresh perspectives combine with lessons learned from 12 additional high-poverty, high-performing schools to form the updated and enhanced Framework for Collective Action. Emphasizing students' social, emotional, and academic learning as the hub for all action in high-performing, high-poverty schools, the authors describe how educators can work within the expanded Framework to address the needs of all students, but particularly those who live in poverty. Equipped with the Framework and a plethora of tools to build collective efficacy (self-assessments, high-leverage questions, action advice, and more), school and district leaders--as well as teachers, teacher leaders, instructional coaches, and other staff--can close persistent opportunity gaps and reverse longstanding patterns of low achievement.

Over the past couple of decades, the state of Texas has made numerous amendments to its standardized tests in an attempt to abide by legislation changes as well as its own shifting standards. The latest administration of the STAAR standardized end-of-course exams was released in the Fall of 2013, along with expectations that it fare more successfully than the previous edition of the STAAR. In order to assess one aspect of the test's similarity to what is taught in the classroom, an attempt was made to compare the vocabulary of the STAAR Reading/Writing end-of-course exam to that of commonly used English Language Arts textbooks in Texas. After comparing the most frequently used words in the textbook and the corresponding STAAR exams, it was determined that there is not enough evidence to cite the textbook as the main reason students are failing the STAAR English Language Arts end-of-course exams.
