Stan Weinstein's Secrets For Profiting in Bull and Bear Markets reveals his successful methods for timing investments to produce consistently profitable results. Topics include: Stan Weinstein's personal philosophy on investing The ideal time to buy Refining the buying process Knowing when to sell Selling Short Using the best long-term indicators to spot Bull and Bear markets Odds, ends, and profits When Martin Brower moved his family from heavily Jewish Los Angeles to barely Jewish Orange County, California, in 1974, his Los Angeles friends were amazed at his bravery and his foolishness. Orange County was considered anti-Semitic and lacking in culture. However, during the years following World War II, Orange County was transformed from a small rural community with citrus groves, row crops and cattle -- first into a bedroom community for neighboring Los Angeles County and then into a dynamic urban empire. As the Countys population and employment base exploded, Orange Countys Jewish population grew from a small enclave of Jewish shopkeepers into a vibrant Jewish community in excess of 100,000. To the surprise of many, Orange County now boasts one of the leading centers of Jewish life in the nation, complete with 30 synagogues, a grand new Jewish Community Center, one of the nations largest Jewish day schools and one of its finest homes for the aging. In his book Orange County Jew: A Memoir, Brower superimposes the growth of the Jewish community over the amazing development of Orange County itself, and uses as a framework the personal story of his own 36 years as a resident of Orange County and as a player among its major real estate development companies and its entrepreneurial leaders.

Bud Wheeler lives in a small town in the backwoods of Arkansas, but that doesn't automatically make him a simple farmer. As a sideline, Bud is an options trader in the stock market, and somehow he's managed to make millions within just six months. It seems the young man just knows precisely when to make a trade—almost as if he's got an unbeatable system. Maybe he does, which is why the Securities and Exchange Commission decides to investigate. As a favor for his old friend and adversary, Brunswick Bohlman, Harrison Pius heads to Arkansas to look into the Wheeler situation. He discovers that the government isn't the only party interested; Bud and his wife, Sue, have some shady characters sniffing around their property, too. Harry should have known there was more to Wheeler than meets the eye, and as usual, anything involving Bohlman quickly turns deadly. Soon there's murder on the table, and Harry has a baffling case on his hands that even stumps the FBI. Betrayal soon seasons the case, as does unexpected romance for Harry. So what is Wheeler's secret investment strategy? And does Bohlman really care about his distant relative Bud Wheeler, or did Harry get set up for the biggest fall of his life?

The Relative Strength Quotient (Price/Index) is a central concept which unifies momentum and breadth for stocks and sectors, and studying it in detail indirectly reveals the connections with many other important areas of Technical Analysis. During the major market panic which led to a bottom in October 1998, the Relative Strength charts predicted that NASDAQ-100 and the Internet Sector were going to be the leaders of the future rally into 1999. And in March 2000, the Relative Strength charts also predicted the abrupt loss of leadership of NASDAQ-100 and Internet Sector. At the end of the 2000-2002 Bear Market, the R.S. charts predicted that Russell 2000 and small stocks were going to lead the new bull market. During the second half of 2006, this time the R.S. charts predicted that Russell 2000 was losing long term future strength, and that large capitalization stocks were gaining leadership into 2007.

Buy-and-hold investors hope for the best over the long-term, but unfortunately, every three to four years, like clockwork, bear markets decimate their portfolios. In the last decade, there were two devastating bear markets that wiped out 50% of investor portfolio values, not once but twice. These huge losses resulted in millions of investors having to delay their retirement plans, postpone funding of college education for children and grandchildren, and delay life's many joys. You simply can't afford to be invested during these inevitable, large-scale declines. Now, you can use an easy-to-use investing strategy that delivers better returns with far less risk than "buy and hold." Leslie N. Masonson, stock market investor, researcher and author, helps you regain control over your portfolio using low-cost, low-risk, ETFs selected with his unique "Stock Market Dashboard" that reliably signals market bottoms and tops - and can tell you exactly when to get in and out.

Twenty Years of Wall Street on Main Street is about the author's experiences working with myriad clients in just about every investment venue in existence. It also includes his observations of his peers and how they worked with the investing public and the use of various firm proprietary investment products to enhance firm revenue, often at the expense of the client's financial best interests. In the course of presenting his story, the author explains 20 years of financial market history and how that impacted his choices of investments for his clients. Additionally the author spends considerable time explaining the mechanics of investing through NYSE member firms including the rules of broker conduct, firm operations, the investment banking process, and how various firms exercised (or failed to exercise) their responsibilities in controlling broker misconduct. Finally, the text contains a wealth of information pertinent to investment decision making for investors of all levels of sophistication; a collection of necessary skills the author repeatedly demonstrated as a skilled practitioner under a multitude of difficult market conditions.

Beat the market by using Psychological Analysis for investing and trading under any conditions Conventional wisdom tells us that people are rational and make rational decisions with their money. But that's simply not true considering most people fail to beat the market. Conventional wisdom also tells us that there are two primary ways to approach the market: technical and fundamental analysis. Again, that is not true because if it were—everyone would be rich. Think about it, how many times have you seen stocks with poor fundamentals go up, or stocks with great technicals go down? It's obvious that something is missing. Author Adam Sarhan, Founder and CEO of 50 Park Investments, developed a new approach, titled, Psychological Analysis (PA). Coined by the author, the term teaches you how to make rational, not emotional, decisions with your money and shows you how to analyze both the individual and collective market mindset at a particular time based on the behavior and decision-making of people in the real-world. Psychological Analysis is designed to tip the odds of success in your favor. After studying every major economic and market cycle going back to the 3rd century, the author explains that human nature is the one constant and tells you what actually drives markets. Psychological Analysis is responsible for major and minor market moves today, tomorrow, and all throughout history. Adam shows you that there are more factors that influence price than just fundamental or technical analysis and how to bring out the smart money superhero inside you. This invaluable guide helps you: Make rational, not emotional, decisions with your money—especially when you are under pressure Understand the psyche of the market so you can learn how to join the Smart Money Circle and consistently take money out Generate above average returns in all market environments Incorporate Psychological Analysis into your overall trading and investing strategy so you can make smarter decisions on and off Wall Street Psychological Analysis: How to Outsmart the Market One Trade at a Time is a must-have resource for traders, investors, finance professionals, and anyone who wants to profit regardless of market conditions.

David Dreman's name is synonymous with the term "contrarian investing," and his contrarian strategies have been proven winners year after year. His techniques have spawned countless imitators, most of whom pay lip service to the buzzword "contrarian," but few can match his performance. His Kemper-Dreman High Return Fund has been the leader since its inception in 1988 -- the number one equity-income fund among all 208 ranked by Lipper Analytical Services, Inc. Dreman is also one of a handful of money managers whose clients have beaten the runaway market over the past five, ten, and fifteen years. Now, as the longest bull market in the history of the stock market winds down, there is increasing volatility and a great deal of uncertainty. This is the climate that tests the mettle of the pros, the worries of the average investor, and the success of David Dreman's brilliant new strategies for the next millennium. "Contrarian Investment Strategies: The Next Generation" shows investors how to outperform professional money managers and profit from potential Wall Street panics -- all in Dreman's trademark style, which "The New York Times" calls "witty and clear as a silver bell." Dreman reveals a proven, systematic, and safe way to beat the market by buying stocks of good companies when they are currently out of favor. At the heart of his book is a fundamental psychological insight: investors overreact. Dreman demonstrates how investors consistently overvalue the so-called "best" stocks and undervalue the so-called "worst" stocks, and how earnings and other surprises affect the best and worst stocks in opposite ways. Since surprises are a way of life in the market, Dreman shows you how to profit from these surprises with his ingenious new techniques, most of which have been developed in the nineties. You'll learn: Why contrarian stocks offer extra protection in bear markets, as well as delivering superior returns when the bull roars. Why a high dividend yield is just as important for the aggressive investor as it is for "widows and orphans." Why owning Treasury bills and government bonds -- the "safest investments" for centuries -- is like being fully margined at the top of the 1929 market. Why Initial Public Offerings are a guaranteed loser's game. Why you should avoid Nasdaq ("the market of the next hundred years") like the plague. Why crisis, panic, and even market downturns are the contrarian investor's best friend. Why the chances of hitting a home run using the Street's best research are worse than being the big winner
