The third and final volume of Schenker's Masterwork, containing his celebrated analysis of Beethoven's Eroica.

Research into the mechanisms and the morality of Athenian hegemony is now perhaps livelier than ever. Of particular importance are the methods by which Athens drew money from the Aegean world with which to fund a vast fleet, to facilitate her own demokratia and to create ambitious public buildings still visible today. This collection of new studies, inspired and guided by an internationally-acknowledged authority on ancient finance, Thomas Figueira, by focusing on how Athens raised finance, sheds light on more familiar questions: How oppressive, or otherwise, was Athens to fellow-Greeks and how did her demands vary over time? Contributors here suggest that Athens may have exercised hegemonic ambitions for longer than usually thought, applying greater experience, and more sensitivity to individual communities.

Parallel Learning of Reading and Writing in Early Childhood explores why it's important to provide a balanced language learning environment for young children and offers approaches for children to practice and explore language. Writing – a different but parallel process – can open the door to reading, and an effective writing approach in the home and early childhood classrooms leads to the development of phonemic awareness, understanding of phonetic principles, vocabulary, fluency, and comprehension. Effective early childhood teachers are those that extend the knowledge children have amassed at home and use the knowledge of how children learn naturally in the world to inform their practice. This book offers the purpose, context, and outcomes of including writing right from the start in young children's literacy learning. Through analysis of writing samples, research, and principles of best practices, Shea outlines the essential ingredients for early language learning and provides a developmentally appropriate approach to language learning. Throughout the chapters, Shea integrates discussion of assessment, classroom environment, instructional/teacher scaffolding, and differentiating instruction across developmental levels along with the supporting theory. Special features: vignettes and descriptions of Pre-K, K, and Grade 1 classrooms that incorporate writing across the day artifacts of children's writing that demonstrate an evolution of knowledge related to both message and word construction concept labeling words and topic specific terms defined throughout the book to support the reader's understanding of professional terminology discussion of seminal and current research as well as best practices Companion Website with lesson ideas and abundant writing samples from a wide range of demographic, cultural, and language contexts for readers to view, analyze, and discuss. This text offers pre- and in-service early childhood education teachers the content and resources to develop a deeper understanding of language learning, to prompt an examination of current practice, and to stimulate curricular re-designs that foster meaningful, joyful, and motivated learning.

As "evangelicals" face future challenges, many are turning back to the ancient church for inspiration. But these ancient-future approaches remain diverse and sometimes even at odds with one another. This volume demonstrates and analyzes the complexity of such contemporary church-early church engagements. Six scholars share diverse insights from the Patristic period,

including lessons on evangelism and discipleship, community formation and maintenance, use of the "rule of faith," the preaching of social ethics, responses to cultural opposition, and Christological development. The volume closes with two critical responses, from confessional Lutheran and Baptist perspectives. These collected essays will remind contemporary readers of the importance of a reflective and responsible renaissance of Patristic wisdom. With contributions from: Rex D. Butler Francis X. Gumerlock Bryan M. Litfin Brian J. Matz W. Brian Shelton Edward Smither Glen L. Thompson

The authors help readers create well-planned projects and activities that capture children's interest and develop the critical social and pre-academic skills identified in state standards.

What to ask school boards, principals, elected officials, and other policy makers who make decisions regarding early reading instruction. You'll find out how to help youngsters build word recognition, avoid comprehension problems, and more--with checklists of specific accomplishments to be expected at different ages: for very young children, for kindergarten students, and for first, second, and third grade students.
