Being aware of this allows them to look at the world differently and make impactful changes in their professional lives. Borrowing from the well-known frameworks of Generative Leadership (GL) and Transactional Analysis (TA), the book provides an inside-out approach advocating potent practices that can create effective leadership.

This paper, STEP 3, is the third of three background papers produced to inform the 'Everyone Around the Table: FAO/GAIN Roundtable with Private Sector on Healthy Diets' series of virtual roundtables which took place in July 2020. As in STEP 1 and STEP 2, the topics covered are relevant to all regions, but where possible a greater focus has been given to low- and middle-income countries. Small and medium enterprises (SMEs) are again a focus, given their role in the food systems of these regions (see STEP 1 for more detail), including their common presence in the food environments of many people living in poverty. STEP 3 (this paper) looks more closely at what it means to go to scale with healthy diets and better nutrition, providing examples and reflections for all stakeholders to consider.

Researching the topic for Pat Nolan was a labour of love as it involved chatting with men who fished on those iconic vessels of another era. Previously, in 'Sea Change' Pat had written on the BIM 50-footer and its impact on coastal Ireland of the 1950s and '60s. The story of the BIM 56-footers naturally followed on from this. The book contains details on each boat, and recollections of individuals who owned and/or fished on them. Part I is based on comments, observations, experiences and memories relevant to the 56-footers. Part II is made up of individually traced histories of all thirty-nine BIM 56-footers built. Part III is made up of interesting lifetime maritime experiences of men Pat met on the way.
