More than a history of the cookbook, Manly Meals and Mom's Home Cooking provides an absorbing and enlightening account of gender and food in modern America.

Irish literature's roots have been traced to the 7th-9th century. This is a rich and hardy literature starting with descriptions of the brave deeds of kings, saints and other heroes. These were followed by generous veins of religious, historical, genealogical, scientific and other works. The development of prose, poetry and drama raced along with the times. Modern, well-known Irish writers include: William Yeats, James Joyce, Sean Casey, George Bernard Shaw, Oscar Wilde, John Synge and Samuel Beckett.

Afro-Latinos in the U.S. Economy outlines the current status of Afro-Latinos in the U.S. economy. The goal of this book is to provide a foundation in the economic dimensions of American Afro-Latinos which can be used to supplement research about this group in other social science disciplines.

The catalyst for much of classical pragmatist political thought was the great waves of migration to the United States in the early twentieth century. José-Antonio Orosco examines the work of several pragmatist social thinkers, including John Dewey, W. E. B. Du Bois, Josiah Royce, and Jane Addams, regarding the challenges large-scale immigration brings to American democracy. Orosco argues that the ideas of the classical pragmatists can help us understand the ways in which immigrants might strengthen the cultural foundations of the United States in order to achieve a more deliberative and participatory democracy. Like earlier pragmatists, Orosco begins with a critique of the melting pot in favor of finding new ways to imagine the civic role of our immigrant population. He concludes that by applying the insights of American pragmatism, we can find guidance through controversial contemporary issues such as undocumented immigration, multicultural education, and racialized conceptions of citizenship.

Theatre has often served as a touchstone for moments of political change or national definition and as a way of exploring cultural and ethnic identity. In this book Steve Wilmer selects key historical moments in American history and examines how the theatre, in formal and informal settings, responded to these events. The book moves from the Colonial fight for independence, through Native American struggles, the Socialist Worker play, the Civil Rights Movement, and up to works of the last decade, including Tony Kushner's Angels in America. In addition to examining theatrical events and play texts, Wilmer also considers audience reception and critical response.

Americans of the 1960s would have trouble navigating the grocery aisles and restaurant menus of today. Once-exotic ingredients—like mangoes, hot sauces, kale, kimchi, and coconut milk—have become standard in the contemporary American diet. Laresh Jayasanker explains how food choices have expanded since the 1960s: immigrants have created demand for produce and other foods from their homelands; grocers and food processors have sought to market new foods; and transportation improvements have enabled food companies to bring those foods from afar. Yet, even as choices within stores have exploded, supermarket chains have consolidated. Throughout the food industry, fewer companies manage production and distribution, controlling what American consumers can access. Mining a wealth of menus, cookbooks, trade publications, interviews, and company records, Jayasanker explores Americans' changing eating habits to shed light on the impact of immigration and globalization on American culture.

Researching Human Geography is an essential new text for any geography student about to embark on a research project. An understanding of how different theories of knowledge have influenced research methodologies is crucial in planning and designing effective research; this book makes this link clear and explores how various philosophical positions, from positivism to post-structuralism, have become associated with particular methodologies. The book gives an overview of a wide range of methods and data collection, both quantitative and qualitative, and explores their strengths and weaknesses for different kinds of research. 'Researching Human Geography' also looks at the various techniques available for the analysis of data, which is presented as an integral and ongoing part of the research process. Clearly written, with extensive use of examples from previous research to show 'methodology in action', this new text is an invaluable addition to both the theory and method of research in human geography.

Cybernetic Revelation explores the dual philosophical histories of deconstruction and artificial intelligence, tracing the development of concepts like the "logos" and the notion of modeling the mind technologically from pre-history to contemporary thinkers like Slavoj Žižek, Steven Pinker, Bernard Stiegler and Daniel C. Dennett. The writing is clear and accessible throughout, yet the text probes deeply into major philosophers seen by JD Casten as "conceptual engineers." Philosophers covered include: Anaximander, Heraclitus, Parmenides, Plato, Aristotle, Philo, Augustine, Shakespeare, Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, Hegel, Nietzsche, Freud, Jung, Joyce, Dewey, Wittgenstein, Heidegger, Adorno, Benjamin, Derrida, Chomsky, Žižek, Pinker, Dennett, Hofstadter, Stiegler + more; with special chapters on: AI's history, Complexity, Deconstructing AI, Aesthetics, Consciousness + more...

Translating Contemporary Mexican Texts: Fidelity to Alterity addresses an area of research that has received little if any attention in translation theory: the translation into English of contact neologisms and code-switching in Mexican Spanish. The translator of Mexican texts is invited to review the historical background and the sociopolitical and linguistic factors that have led to the

emergence of new varieties of English and Spanish, in particular the mixed varieties and code-switching common to parts of Mexico and the United States, often known collectively as Spanglish. Since translation should not consist of effacing the Other, *Translating Contemporary Mexican Texts* provides conceptual tools and practical advice for carrying out foreignizing translations that allow for a degree of preservation of linguistic and cultural differences through the employment of heterogeneous discourse. A comprehensive, ongoing guide to publications on music from all over the world, with abstracts written in English. All scholarly works are included: articles, books, bibliographies, catalogues, dissertations, Festschriften, films and videos, iconographies, critical commentaries to complete works, ethnographic recordings, conference proceedings, electronic resources, and reviews. This biography provides an understanding of William Bateson as well as a reconciliation of diverging views (e.g. the hierarchical thinking of Gould and the genocentrism of George Williams and Richard Dawkins). Evolutionists may thus, at long last, present a unified front to their creationist opponents. The pressing need for this text is apparent from the high percentages reported not to believe in evolution and the growth of the so-called "intelligent design" movement.
