In the second part of the book, the author reveals his principles in greater depth, demonstrating how he applies them in his personal and professional life. based. In the third part he describes in detail how in his company Bridgewater, Dalio managed to unite these principles described in part 2, masterfully building an organization with goals and a mission outlined from personal principles. He describes how he managed to merge these personal principles with the objective of forming an organization based on the idea of meritocracy that aims to achieve meaningful work and relationships through what he defines as "radical truth and radical transparency." In this last part he teaches us to apply personal principles in business life. PART I: WHERE DO I COME FROM IN THIS FIRST PART divided into 8 chapters, the author makes a brief history of his personal and professional life. Through this description, he tries to show how people are not born with the ability to make decisions, but that they acquire the ability based on their own experiences. He clearly states that while anyone pursues their objectives, they will inevitably face different complicated situations and make mistakes. It is only through these experiences that you will know your own weaknesses and strengths. In this part, the author shows how he became aware of the system of principles, and how he has used them to achieve success in his personal and professional life.

How did Ray Dalio, through his leadership of an investment management firm, create the world's largest hedge fund, which has grown over \$150 billion USD? In a word: principles. Ray Dalio created a set of principles for himself and his firm, which he applied as an operating principle for his investment business and radical transparency thriving with the idea of meritocracy. An idea meritocracy is a system that brings together the best and brightest, and has them productively disagree with each other to get the best collective thinking and results. Their disagreement is a byproduct of the system. "The best idea wins." The "best idea wins" something means that the idea's logic is better than the track record and that the best idea is not the one that is the most popular. Dalio's best idea is that the best decision-making is made because it requires honesty and leads to personal improvement. Dalio's principles are in the book Principles and Work Principles. The life principles apply to individual life, and the work principles apply to the organization. Dalio decided to share his principles.

both life and business - and which any person or organization can adopt to help achieve their goals. Added- value of this summary: • Save time • Understand the key lessons in personal change • Expand on your motivation To learn more, read "Principles". In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency", include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.
