* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. As you read this summary, you will learn why the presence or absence of certain political and economic institutions encourage or retard progress toward prosperity. You will also discover that : Poor countries are not poor because their leaders do not know how to enrich their people; China's current growth will not last; In many countries, the ruling elites oppose economic development for fear of losing their omnipotence; Some countries have managed to overcome many natural and cultural handicaps; Colonization, far from promoting development, has on the contrary impoverished the countries that were victims of it; Institutions evolve with history and sometimes take the wrong path. Two localities that form one and have the same name: Nogales. One is in the United States, in the state of Arizona, and the other in Mexico, in the state of Sonora. The political boundary between the two cities is largely artificial: both have more or less the same population, the same culture. Why, then, is Nogales, Arizona, a rich city, while Nogales, Sonora, is a poor city? It's because they don't have the same institutions. The political and social institutions of Nogales-Arizona promote growth and economic development, while those of Nogales-Sonora

"Why is it so difficult to develop and sustain liberal democracy? The best recent work on this subject comes from a remarkable pair of scholars, Daron Acemoglu and James A. Robinson. In their latest book, *The Narrow Corridor*, they have answered this question with great insight." -Fareed Zakaria, *The Washington Post* From the authors of the international bestseller *Why Nations Fail*, a crucial new big-picture framework that answers the question of how liberty flourishes in some states but falls to authoritarianism or anarchy in others--and explains how it can continue to thrive despite new threats. In *Why Nations Fail*, Daron Acemoglu and James A. Robinson argued that countries rise and fall based not on culture, geography, or chance, but on the power of their institutions. In their new book,

they build a new theory about liberty and how to achieve it, drawing a wealth of evidence from both current affairs and disparate threads of world history. Liberty is hardly the "natural" order of things. In most places and at most times, the strong have dominated the weak and human freedom has been quashed by force or by customs and norms. Either states have been too weak to protect individuals from these threats, or states have been too strong for people to protect themselves from despotism. Liberty emerges only when a delicate and precarious balance is struck between state and society. There is a Western myth that political liberty is a durable construct, arrived at by a process of "enlightenment." This static view is a fantasy, the authors argue. In reality, the corridor to liberty is narrow and stays open only via a fundamental and incessant struggle between state and society: The authors look to the American Civil Rights Movement, Europe's early and recent history, the Zapotec civilization circa 500 BCE, and Lagos's efforts to uproot corruption and institute government accountability to illustrate what it takes to get and stay in the corridor. But they also examine Chinese imperial history, colonialism in the Pacific, India's caste system, Saudi Arabia's suffocating cage of norms, and the "Paper Leviathan" of many Latin American and African nations to show how countries can drift away from it, and explain the feedback loops that make liberty harder to achieve.

Today we are in the midst of a time of wrenching destabilization. We need liberty more than ever, and yet the corridor to liberty is becoming narrower and more treacherous. The danger on the horizon is not "just" the loss of our political freedom, however grim that is in itself; it is also the disintegration of the prosperity and safety that critically depend on liberty. The opposite of the corridor of liberty is the road to ruin.

Shortlisted for the Financial Times and Goldman Sachs Business Book of the Year Award 2012. Why are some nations more prosperous than others? Why Nations Fail sets out to answer this question, with a compelling and elegantly argued new theory: that it is not down to climate, geography or culture, but because of institutions. Drawing on an extraordinary range of contemporary and historical examples, from ancient Rome through the Tudors to modern-day China, leading academics Daron Acemoglu and James A. Robinson show that to invest and prosper, people need to know that if they work hard, they can make money and actually keep it - and this means sound institutions that allow virtuous circles of innovation, expansion and peace. Based on fifteen years of research, and answering the competing arguments of authors ranging from Max Weber to Jeffrey Sachs and Jared Diamond, Acemoglu and Robinson step boldly into the

Prosperity, and Poverty is an examination of the causes of economic inequality. Authors Daron Acemoglu and James A. Robinson conclude that underdevelopment is caused by political institutions and not by geography, climate, or other cultural factors. Elites in underdeveloped countries deliberately plunder their people and keep them impoverished. The city of Nogales is half in Mexico and half in the United States. People in Nogales on the US side of the border are well-educated, prosperous, and have long life expectancies. Those on the Mexican side are poor, poorly educated, and have shorter life expectancies. The differences in Nogales can't be explained by geography or culture. Instead, different governments cause the differences in development. The United States historically established pluralist institutions that encouraged technological innovation and spread wealth throughout the population. By contrast, in Mexico, Spanish conquerors established extractive institutions that were intended to...
