

Surviving The Evacuation Book 1 London Volume 1

"There are no reported outbreaks in the UK or Ireland." That is what the government broadcast. Nilda didn't believe it. Not trusting the authorities, she, and her son, Jay, stay behind when Penrith is evacuated. Vindicated when she learns the extent of the government's betrayal, they search for supplies, but after weeks of rationing, there is little left in the small town in Northern England. Soon, she discovers that there are many other survivors competing for it. Choosing diplomacy over violence, she attempts to forge a community out of a disparate group, but as the number of the undead grow, she realises that they will have to seek sanctuary elsewhere. Abandoned and betrayed, Nilda travels north into Scotland, but death follows her and she discovers that not all those who survived the evacuation have the same motives. Some only want to help. Others only want to help themselves. Whilst the new Mayor of Anglesey has her own agenda, one at odds with Nilda's quest; to find a safe haven for her son. Other books in the near future, post-apocalyptic series Surviving The Evacuation: 0.5: Zombies vs The Living Dead. 1: London. 2: Wasteland. 3: Family. 4: Unsafe Haven. 5: Reunion.

Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

The battle might be lost, but the war isn't over. Once it was home to half a billion people. A year after the nuclear war, Europe is a radioactive, storm-ravaged wasteland through which a hundred million undead inexorably march. In their wake, they leave nothing but ruins. Ahead of them flee those few who managed to survive this long. Chasing them are the dregs of humanity. Once known as the Rosewood Cartel, they kill, loot, and destroy as indiscriminately as the living dead. Hope might be lost, but it could still be found, as can a future for the last remnant of humanity. Those who built a sanctuary on Anglesey, in Dundalk, in Creil are the help that came to others. In this, their darkest hour, but with a new dawn so close, they will not give up. Set in the Faroe Islands, France, Denmark, and elsewhere, the battle has begun, but the war hasn't yet been lost.

Surviving The Evacuation, Book 3: Family Frank Tayell

Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. For George Tull and the other residents of the Waverly-Price Retirement Home, walking to the coast is not an option. Abandoned by the staff, they wait for rescue. It doesn't come. When George leaves the illusory security of The Home and ventures into the nearby village, he finds it deserted. But he is not alone, his unhappy retirement is broken by the undead. George is left with a terrible choice; stay and fight to save the people he loathes, or leave and abandon the woman he has come to love. Other books in the series: 1: London. 2: Wasteland. Not all people died. Not all gave up hope. The outbreak was in February. By the end of November, Earth has become a hellish wasteland ravaged by the undead. Survivors from across the Atlantic seaboard took refuge on the Welsh island of Anglesey. Beset by dangers from within, they departed to establish a new refuge in Belfast. Not all of them arrived. Six took the last plane on its last flight, but crashed in France. Expecting a sprinting battle through the ruins of Belfast, they packed light. With few weapons and barely any food, their chances of survival are slim. The chances of rescue are slimmer. There was no evacuation in France. No quarantine. No rationing. But there are zombies, and there are people who believe they, alone, are the last survivors of the old-world. So begins a frantic race against the undead, through the snow and storm ravaged ruins of Northern France.

It is a week since the outbreak began in New York. The president has been betrayed. The vice-president is dead. The government has collapsed. The conspirators are close to victory. Having narrowly escaped agents of the cabal, Tom Clemens heads to Washington hoping to get word of the conspiracy to the president. The highways become impassable, filled with millions fleeing from the cities. Towns are fortified, but it is too late. The infection has already spread throughout the country. Nowhere is safe from the undead. As refugees storm the towns, and zombies fill the smoking ruins, survivors become more deadly a threat than the impossibly living dead. Still hopeful he can find the cause of the outbreak, and so end it, Tom fights his way through an undead America. As he searches for the cabal, he is unaware that they are searching for him. The story of Tom Clemens / Sholto continues in Surviving The Evacuation: Book 1: London. That of the survivors in North America will continue in Here We Stand 3: Betrayed. Please note: As the President of the United States is a background character, and the presidential election a background event, American English has been used in this book though with some British spellings as most of Surviving the Evacuation takes place in the United Kingdom.

A castle can be made safe from the undead, but not from the people inside the walls. It is seven months since the outbreak. In the anarchy and chaos that came with the undead, civilisation was destroyed. In the wars that followed, the planet was nearly ruined. Billions died. Only a few thousand survived. Fifty people have found refuge in the Tower of London. Zombies plague the city outside the old fortress. The wasteland beyond is filled with nothing but radioactive ruins. With nowhere left to retreat to, and in a final attempt to make the ancient castle a place where they can do more than just slowly starve, the survivors search for food in the abandoned coastal farms. They find something else. They discover that hunger, thirst, and the undead aren't the only threat they face. Betrayal and danger lurk in the shadows in this, the sixth novel in the series. As one year ends, and our old world fades into memory, a new future is born. On a frozen archipelago, where it is too cold to farm, a few thousand survivors from across the Atlantic have found a refuge. The arduous process of turning a sanctuary into a home begins once more for these weary travellers who've been chased from Britain, from Ireland, from France and Denmark. But their work is not yet done. The missing Marines cannot be left behind. The French and Ukrainians cannot be abandoned. The cartel can never be forgotten. As soldiers once again become civilians, the dangers of malnutrition replace the everyday spectre of starvation. Potential mutiny supersedes being overrun by the undead. Boredom replaces fear. Slowly, they relax, allowing themselves to enjoy the simple pleasure of music and plays, of weddings and births, of life without the imminent prospect of death. But all is not what it seems in the snowy wastes surrounding their town. While Europe is a zombie-filled radioactive wasteland, there are other continents. Other oceans. Other survivors. Other communities, just like their own, who will fight to keep what they've clawed from the grip of the apocalyptic nightmare. Set in Northern Europe, Eastern Canada, and the tumultuous seas between, as one year ends, and a new civilisation dawns.

It took three weeks to destroy civilisation. It won't be rebuilt in a day. A year after the outbreak, a sharp winter is followed by a sudden thaw. Spring has come early to Nova Scotia, bringing new hope. For the thirteen thousand survivors who've found sanctuary in northern Canada, and for the first time since the apocalypse, extinction isn't imminent. But it looms large in the near future, a legacy of the nuclear war that destroyed civilisation. As the weather improves, some survivors quit the small community. Even more plan their departure. The old-world supplies of food, oil, and ammunition have been consumed. More will have to be grown, drilled, and made. Medicine, paper, clothes: in a few years there will be none left to salvage. If it can't be manufactured, it will have to be forgone. What knowledge can't be preserved will be lost. Humanity's future appears bleak unless more people can be found. Hoping there is some truth in the rumours of a redoubt in Vancouver, an expedition to the Pacific is launched. The journey will be perilous as North America was ground zero for the outbreak, and for the nuclear war. Set in Canada and beyond, as survivors from the Atlantic and Pacific meet. Please note: this book features places and events, and heroes and villains from *Life Goes On Books 1-3*, the saga of survivors in the Pacific.

The outbreak began in February. Nations went to war. Governments collapsed. Billions died in the chaos and anarchy that followed. Billions more were infected. They died. They came back. It is now October and out of the tens of millions who lived in southern England only ninety people remain. They sought sanctuary behind the ancient walls of the Tower of London, but it was only a temporary refuge. There is no more food to be scavenged from the ruins of the old world. Their water supply is polluted. As the days get shorter, the weather worsens, and people begin to get sick. They have been betrayed and are besieged by the living and undead alike. Over their heads hangs the threat of a last catastrophic weapon. This spectre of the old world conspiracy that brought the living dead to plague the Earth leaves them with a terrible decision. Some must be sacrificed so that amidst the horror others might find somewhere in the undead wasteland that they can call home. (80,000 words) Other books in the series: 1: *London*. 2: *Wasteland*. Within a few minutes of the outbreak, Manhattan was overrun by the living dead. Within a few days, the undead had reached every corner of the globe. Ireland was no exception. There was no evacuation of Northern Ireland, and no quarantine in the Republic. A Royal Naval blockade prevented ships from docking, but they didn't prevent those who could reach the coast from fleeing by sea. There weren't enough boats for everyone. Those who were left behind took refuge in castles, police stations, churches, military bases, and any other buildings with strong walls. The walls weren't strong enough. Eight months later, there are only a few dozen survivors left on the entire island of Ireland. They are certain that there is no safe refuge anywhere on the planet. Stranded on the southwestern Atlantic coast of the Irish Republic, Bill and Kim head north. They know that there is a safe haven on Anglesey, but that is hundreds of miles of undead Ireland and a treacherous sea crossing away. They begin a journey on which they will have to rescue the innocent and confront the past before they can embrace the future. Set on the island of Ireland, eight months after the outbreak, this is the next volume of Bill Wright's journals.

are filled with zombies, there are other survivors and there is a safe haven, so he is told, in a small village on the Irish coast. Before he can go there, he must find and rescue the children. Then he will have to battle his way through the infected wastelands of England and Wales in the hope that their really is a boat waiting for them. Even then, his journey won't be over. When he is told of the sanctuary awaiting them, he also discovers that the scientist who created the virus escaped from New York. In order for any of them to ever truly be safe, Bill will have to head north to confront the man, discover the truth behind the outbreak and finally choose between his old family and his new one. Surviving is easy. It's the next part, living, that's hard. **Zombies**. It is seven months since the outbreak. The world is in ruins. Britain is a radioactive wasteland peopled by the undead. The few survivors cling to the hope that they might wake up tomorrow. For most, that is all they have left. But Nilda has something more; the chance that her son is alive. At least he was, months before. She and Chester set out from Penrith, searching for her son. During the journey, Nilda learns more about this self-confessed criminal, Radio Free England, the conspiracy behind the outbreak, and how Chester was involved in it all. As they near Hull, she realises it is too late to change her travelling companion. She will need his help to escape the zombie infested city, and find her son. Fleeing from the last remnant of the old government, Tuck and Jay head south in search for survivors. When they rescue a wounded man, their quest becomes one for medical supplies. That leads them to a rooftop city, and to the realisation that surviving out in the wasteland is easy compared to forging a new life from the wreckage of the old civilisation. For good or ill, the future has begun. After the outbreak came the nuclear war. The blasts killed millions. Chaos followed. Most of those unlucky enough not to succumb to starvation and disease joined the ranks of the living dead. Fleeing the impossible nightmare, ten thousand, from nations across the Atlantic seaboard, found refuge on the Welsh island of Anglesey. There, they should have been safe. There, they should have been able to rebuild. There, they were betrayed. Forced to flee once more, a hasty exodus was planned, but those plans were sabotaged. The survivors became scattered across the island of Ireland. Old-world supplies are scarce, hope is running out, and safety is just a memory. The snow has come, and though rain will soon follow, winter has truly begun. In Dundalk, eight hundred survivors have occupied a local college, but the campus is too dispersed to defend. As they scour the snow-covered town for a safe route to the sea, they find signs of long-fled survivors and answers to a question they hadn't asked. In Belfast, the situation is increasingly precarious. There are saboteurs in their midst. As the investigation into their identity slowly progresses, the terrorists continue to plot. Rumours of a mutiny escalate into a riot, while an unseen clock ticks ever closer towards humanity's destruction. Set in Belfast and Dundalk, over three days that change everything. There is nothing a mother won't do to protect her son. "There are no reported outbreaks in the UK or Ireland." That is what the government broadcast. Nilda didn't believe it. Not trusting the authorities, she, and her son, Jay, stay behind when Penrith is evacuated. The first outbreak was in Manhattan. The island was quarantined, but it was too late. Nowhere is safe from the undead. Tom Clemens has been living in the shadows, searching for those responsible for the death of his family. Framed for murder, he is on the run when the first outbreak occurs. With thousands of others, he fights his way out of New York and joins the exodus searching for a safe refuge somewhere in America. On that journey he learns the identity of those responsible for the betrayal of the species, and of a scientist who might be able to stop the living dead. So begins his quest to save humanity. Here We Stand 1: Infected & 2: Divided are part of the post-apocalyptic series Surviving the Evacuation. This story of patient zero and Sholto's attempt to stop the outbreak can be read before or after Surviving the Evacuation Books 1-7. Please note: As the President of the United States is a background character, and the presidential election a background event, American English has been used in this book though with some British spellings in deference to the fact that most of Surviving the Evacuation takes place in the United Kingdom.

Not all survivors are to be trusted. Not all the conspirators are dead. February: Within hours of the outbreak, the quarantine was sabotaged. Within days, the world was gripped by civil war. March: When the lights finally went out, billions were dead. Millions more had joined the ranks of the undead. May: Anglesey has become home to nearly ten thousand survivors from across the Atlantic. While there is still danger from the undead on the mainland, there is hope. Hope that the zombies might die, hope that the electricity supply might be restored, and hope that more survivors will be found. Hope is not enough. Sergeant Branofski and Chester Carson venture into northern Wales to set up a network of safe houses that will provide a route to Anglesey for those still trapped in the wasteland. Though they find survivors, they discover something far worse. September: Nowhere is safe from the living dead, not even The Tower of London. The ancient fortress has become home to nearly a hundred people. Food is scarce
