Some are mild mannered geeks, others mad geniuses or street-smart city dwellers driven to action. These are the men and women behind the masks and tights of America's most beloved superheroes. But these aren't the stories of the heroes' hidden alter egos or secret identities...these are the stories of their creators! Leaping Tall Buildings: The Origins of American Comics gives you the truth about the history of the American comic book—straight from the revolutionary artists and writers behind them. From the founders of the popular comics website Graphic NYC—writer Christopher Irving and photographer Seth Kushner—comes the firsthand accounts of the comic book's story, from its birth in the late 1930s to its current renaissance on movie screens and digital readers everywhere. Kushner's evocative photography captures the subjects that Irving profiles in a hard-hitting narrative style derived from personal interviews with the legends of the art, all of which is accompanied by examples of their work in the form of original art, sketches, and final panels and covers. The creators profiled include Captain America creator Joe Simon, Marvel guru Stan Lee, Mad magazine's fold-out artist Al Jaffee, visionary illustrator Neal Adams (Batman), underground paragon Art Spiegelman (Maus), X-Men writer Chris Claremont, artist/writer/director Frank Miller (Sin City, 300), comic analyst Scott McCloud (Understanding Comics), American Splendor's Harvey Pekar, painter Alex Ross (Kingdom Come), multitalented artist and designer Chris Ware (Acme Novelty Library), artist Jill Thompson (Sandman), and more. Leaping Tall Buildings, like comics themselves, uses both words and images to tell the true story of the comic's birth and evolution in America. It is a comprehensive look at the medium unlike any other ever compiled covering high and low art, mass market work and niche innovations. It is the story of an art

form and an insider's look at the creative process of the artists who bring our heroes to life.

Forensic Chemistry is a comprehensive overview of the subject aimed at those students who have a basic understanding of the underlying principles and are looking for a more detailed reference text. This book is aimed at advanced students who are studying forensic science or analytical chemistry, faculty and researchers, and practitioners such as crime laboratory bench scientists. The authors will assume that the reader will have an introductory knowledge of forensic science and forensic chemistry and will have had analytical, organic and instrumental chemistry. None of the major analytical chemical techniques will have separate treatments in the book, with the exception of forensic microscopy, which will have a chapter because many students in chemistry and forensic science do not get dedicated classes in this area. The book will have separate chapters on all of the major areas of forensic chemistry and, in addition, will have a chapter devoted to chemometrics, which is the statistical treatment of large amounts of data to discover groupings, similarities and differences among the data. Each chapter will be written by an acknowledged international expert in that area. Each author will be given detailed instructions as to the intended audience, as well as expected breadth and depth of coverage of the material in the hopes that this will minimize the problem of uneven coverage of topics and chapters that often occurs in edited books. Although each of the types of evidence covered in the book use methods of analysis that lie outside chemistry, these will be mentioned only for completeness in passing. The emphasis will be on the use of chemical tools in evidence analysis. This book is designed to be either a text book for an advanced forensic chemistry course, or a treatise in forensic chemistry for the scientist who wants to learn the subject in some depth. It is not designed to be a survey of the current literature in the field or a reference manual.

It'd be hard to find anyone interested in comic books and their history who hasn't heard of Todd McFarlane's legal woes, but very few outside of McFarlane's immediate circle know just how many legal fights he was facing as the 1990s closed. Virtually all of McFarlane's court cases came down to three decisions, made by him alone. The first was to name a mobster in his Spawn comic after a hockey player, Tony Twist. The second was to hire Neil Gaiman to write a single issue of Spawn and the third came when he decided to buy all the remaining assets from Eclipse Comics at their bankruptcy sale. The first decision led to the Tony Twist trial, last two choices lead to Neil Gaiman filing suit and, ultimately, winning a portion of the Spawn universe and the hotly sought after, by some, character Miracleman. The Tony Twist trial was the beginning of a long, long period of uncertainty for Todd McFarlane and very nearly brought down the empire that he'd worked so hard to build. At its worst point, McFarlane was fighting to save his companies, to keep his characters and simply to survive. He was facing battles from several fronts, from people he did not previously personally know in the form of Tony Twist, to those whom he'd collaborated with, in the form of Neil Gaiman and also in bankruptcy courts. Clearly the fight that cost him the most, in pure financial terms, was that brought against him by Tony Twist. It would take years, and millions of dollars, to finally resolve. But the fight that potentially hurt him the most, both personally and professionally, was the one brought by Gaiman, as it gave the impression that McFarlane had appropriated characters created by Gaiman (albeit within the confines of the Spawn universe, along with Miracleman - but that's a book in itself) without proper accounting, permission or payments. This, to the comic book industry at large, showed McFarlane to be no better than the corporations that he'd spent years rallying against - Marvel and DC Comics. It would take the better part of two decades before McFarlane would emerge free and clear from these fights. He came out of it battered, bruised, facing charges of hypocrisy and with a serious hit to his reputation, but he wasn't totally beaten. Despite those who wished to see McFarlane fall completely from grace, he emerged relatively intact.

"One of the best literary works of this year" (Miami Herald-Tribune): The true story of a theatrical dream—or nightmare—come true...the making of the Spider-Man musical. As you might imagine, writing a Broadway musical has its challenges. But it turns out there are challenges one can't begin to imagine when collaborating with two rock legends and a superstar director to stage the biggest, most expensive production in theater history. Renowned director Julie Taymor picked playwright Glen Berger to cowrite the book for a \$25 million Spider-Man musical. Together—along with U2's Bono and Edge—they would shape a work that was technically daring and emotionally profound, with a story fueled by the hero's quest for love...and the villains' quest for revenge. Or at least, that's what they'd hoped for. But when charismatic producer Tony Adams died suddenly, the show began to lose its footing. Soon the budget was ballooning, financing was evaporating, and producers were jumping ship or getting demoted. And then came the injuries. And then came word-of-mouth about the show itself. What followed was a pageant of foul-ups, falling-outs, ever-more harrowing mishaps, and a whole lot of malfunctioning spider legs. This "circus-rock-and-roll-drama," with its \$65 million price tag, had become more of a spectacle than its creators ever wished for. During the show's unprecedented seven months of previews, the company's struggles to reach opening night inspired breathless tabloid coverage and garnered international notoriety. Through it all, Berger observed the chaos with his signature mix of big ambition and self-deprecating humor.
