This preparatory manual is a single source reference for postgraduate exam preparation. Intense efforts have gone in preparation of the book to make it complete in all aspects. In-depth coverage of every subject in the form of synopsis is the highlight of the book. To enhance rapid reading, quick learning facts have been framed as an effective learning tool. Multiple-choice questions have been designed to suit both national and international competitive postgraduate entrance examinations.

Tibetan medicine is a rarified field with few publications in English; it is also one of the most comprehensive of alternative therapies, addressing body, mind, and spirit. Written for intermediate-level practitioners, *Essentials of Tibetan Traditional Medicine* brings this important healing tradition to Western practitioners. The book begins by summarizing the basics behind Tibetan medical theory and its methods of diagnosis. The second part of the book presents the core concepts of wind, bile, phlegm, dark phlegm, epidemic fever, heat, and cold, along with their corresponding nosologies, differential diagnoses, and treatments. The third section covers therapeutics, with an emphasis on medicinals—the mainstay of contemporary practice. A chapter on therapeutic strategies discusses unclear diagnosis and other challenging clinical situations. Other chapters explore the crucial components of lifestyle and diet. Each herb and animal product used in Tibetan medicine is profiled on its own page, with its Tibetan, common, and botanical names; its key properties and clinical uses; its known pharmacological properties; and a simple illustration. This useful handbook concludes with a description and indepth analysis of some 60 frequently used formulas.

This book covers all major and minor topics in pharmacology in question–answer form. The questions are framed and arranged in the same manner and sequence followed in the conventional textbooks. Answers are followed by brief explanatory notes for the benefit of the reader.
