This book comprises an examination of novice teachers' experiences in schools and cultures of schooling across the contexts of Hong Kong, Japan, and Canada. Drawing on narrative inquiry and arts-based approaches, this study employs experience as a starting point for making sense of both professional and personal encounters in local and foreign settings. This work thus sheds light on how people make sense of shifting landscapes in an era of increasing intercultural communication and interaction while addressing important curricular implications of intercultural professional development for equity and social justice.

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights.

The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

This book is written primarily for pre-service and in-service teachers of Literacy/English Language Arts, school administrators, literacy graduate education students, and literacy education researchers, and addresses the myriad of questions regarding the implementation of the Common Core State Standards. Classroom teachers and pre-service teachers are currently confronting questions such as how they can teach the Common Core State Standards to make sure they are fully addressing them; how they can have the time to teach students to have deeper understandings of the skills and concepts addressed in the Standards; what they can do to meet the learning needs of diverse students such as English language learners and students with learning disabilities; whether teachers of content areas are required to add reading instruction to their teaching responsibilities; whether the Standards tell teachers what to teach; and whether the document tells teachers how to implement the Standards in the classroom, among others. This book is designed to answer these questions and many others. Each chapter contains instructional practices, examples, vignettes, and illustrations that connect the Common Core State Standards to classroom practices, and thereby provide pre-service and in-service teachers with meaningful,

relevant, and practical teaching strategies to prepare culturally, academically, and linguistically diverse students in California and other states of the nation for both career and college. In this regard, readers of this book will find that the authors have provided a pathway to better understand the Common Core State Standards, and will be able to use what they learn in the pages of this book to provide more effective instruction for their students across the disciplines to read, analyse, and critique complex texts and apply knowledge to solve practical, real-life problems.

A flexible, high-interest program that can be used with all regular and special students, grades 10-12. Each volume provides over 45 factual stories with related teaching materials, 15 at each level.

This volume highlights some of the main issues and questions surrounding the field of second language (L2) writing, and includes 14 chapters authored by contributors from a wide variety of geographical regions including, but not limited to, North America, Europe, Australia, and Asia. The authors are all experienced L2 writing researchers, and their contributions will enhance the reader's understanding of issues related to L2 writing. Considering the breadth and the depth of the issues raised and discussed, the book will appeal to a wide readership, including postgraduate students of Teaching English to Speakers of Other Languages (TESOL) and Applied Linguistics (AL), and both early-career and experienced TESOL/AL researchers.

This work reports the findings of the Professional Competence of Teachers, Cognitively Activating Instruction, and Development of Students' Mathematical Literacy project (COACTIV). COACTIV applies a broad, innovative conceptualization of teacher competence to examine how mathematics teachers' knowledge, beliefs, motivational orientations, and self-regulation skills influence their instructional practice and teaching outcomes. In this project data was collected on various aspects of teacher competence and classroom instruction from the perspective of both the teachers themselves and their students. Moreover, it gauges the effects of these teacher characteristics on student learning, as indexed by the progress students in each class. Questions addressed in the study which are reported in this volume include: What are the characteristics of successful teaching? What distinguishes teachers who succeed in their profession? of 1994 provides funds for schools with large concentrations of children from low-income families. A fundamental requirement is that children served by Title I funds must be educated according to the same academic standards as all other students. This handbook focuses on methods for developing performance standards in the aligned system of standards and assessments required by IASA Title I. The handbook aims to capture the best of current practice, without relying solely on the published literature, by drawing on the experiences of educators and recent research. The first section (chapters 1-4) defines performance standards in the context of an aligned education system and provides advice for developing a system of performance standards. Chapters introduce the idea of performance standards as a system, provide background about Title I legislation, and define terms related to performance standards. The second section (chapters 5-8) contains several state stories about initiating and developing performance standards and standards-based assessment programs. Chapters focus on Colorado, Maryland, Oregon, and Wyoming. The third section (chapters 9-10) contains the work of nationally recognized researchers in the field of assessment. Chapter 9, "Creating Descriptions of Desired Student Achievement When Setting Performance Standards" by Craig N. Mills and Richard M. Jaeger, describes a

State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. Testing, Teaching, and Learning is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. Testing, Teaching, and Learning will be an important tool for all involved in educating disadvantaged students—state and local administrators and classroom teachers.

Inclusive education presupposes an all-inclusive approach where all learners are taught in regular

classrooms, regardless of background, disability or social context. While there has been much debate, indications are that inclusive education has been gaining momentum. The book is divided into six coherent sections that address the how of inclusive education both inside and outside of the classroom.

Paths to College and Career Jossey-Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6–12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for

each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6–12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.

We are living in a defining moment, when the world in which teachers do their work is changing profoundly. In his latest book, Hargreaves proposes that we have a one-time chance to reshape the future of teaching and schooling and that we should seize this historic opportunity. Hargreaves sets out what it means to teach in the new knowledge society, to prepare young people for a world of creativity and flexibility and to protect them against the threats of mounting insecurity. He provides inspiring examples of schools that operate as creative and caring learning communities and shows how years of "soulless standardization" have seriously undermined similar attempts made by many non-affluent schools.

Hargreaves takes us beyond the dead-ends of standardization and divisiveness to a future in which all teaching can be a high-skill, creative, life-shaping mission because "the knowledge society requires nothing less." This major commentary on the state of today's teaching profession in a knowledge-driven world is theoretically original and strategically powerful? a practical, inspiring, and challenging guide to rethinking the work of teaching.

Findings generated by recent research in science education, international debate on the guiding purposes of science education and the nature of scientific and technological literacy, official and semi-official reports on science education (including recommendations from prestigious organizations such as AAAS and UNESCO), and concerns expressed by scientists, environmentalists and engineers about current science education provision and the continuing low levels of scientific attainment among the general population, have led to some radical re-thinking of the nature of the science curriculum.

Seeking to raise the discussion of globalisation's effects on teacher education, this book provides specific examples in the comparative tradition to illustrate teacher policy in the context of education systems' variability and complexity.

Timely, thoughtful, and comprehensive, this text directly supports pre-service and in-service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of the Common Core State Standards. Adopting a critical inquiry approach, it demonstrates how the Standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective firmly grounded in current literacy learning theory and research. It provides specific examples of teachers using the critical inquiry curriculum framework of identifying problems and issues, adopting alternative perspectives, and entertaining change in their classrooms to illustrate how the Standards can not only be addressed but also surpassed through engaging instruction. The Second Edition provides new material on adopting a critical inquiry approach to enhance student engagement and critical thinking planning instruction to effectively implement the CCSS in the classroom fostering critical response to literary and informational texts using YA literature and literature by authors of color integrating drama activities into literature and speaking/listening instruction teaching informational, explanatory, argumentative, and narrative writing working with
