Innovation has replaced stereotypical and old methods as an attempt to make English language teaching and learning appealing, effective, and simple. However, teaching a second language through literature may be a paramount tool to consolidate not only students' lexical and grammatical competences, but also for the development of their cultural awareness and broadening of their knowledge through interaction and collaboration that foster collective learning. Despite past difficulties, literature's position in relation to language teaching can be revindicated and revalued. *Using Literature to Teach English as a Second Language* is an essential research publication that exposes the current state of this methodological approach and observes its reverberations, usefulness, strengths, and weaknesses when used in a classroom where English is taught as a second language. In this way, this book will provide updated tools to explore teaching and learning through the most creative and enriching manifestations of one language ? literature. Featuring a range of topics such as diversity, language learning, and plurilingualism, this book is ideal for academicians, curriculum designers, administrators, education professionals, researchers, and students.

turns a deaf ear to some sob sister, an heiress aboard her yacht, or a bookworm enjoying a boy's night out, Diane Ravitch's internationally acclaimed *The Language Police* has bad news for you: Erase those words from your vocabulary! Textbook publishers and state education agencies have sought to root out racist, sexist, and elitist language in classroom and library materials. But according to Diane Ravitch, a leading historian of education, what began with the best of intentions has veered toward bizarre extremes. At a time when we celebrate and encourage diversity, young readers are fed bowdlerized texts, devoid of the references that give these works their meaning and vitality. With forceful arguments and sensible solutions for rescuing American education from the pressure groups that have made classrooms bland and uninspiring, *The Language Police* offers a powerful corrective to a cultural scandal.

solutions and innovative project-based learning are all essential parts of learning and teaching socially appropriate and responsive literacies in a multimodal, superdiverse world. Nearly half a century has passed since Hymes proposed the concept of communicative competence to describe the knowledge and skills required for the appropriate use of language in a social context. During these decades, a number of scholars have applied and refined this concept. In language education, communicative competence has been identified as a major objective of learning. This book will inform readers about communicative competence as a highly complex construct encompassing an array of sub-competencies such as linguistic skills and proficiencies, knowledge of socio-cultural and socio-pragmatic codes, and the ability to engage in textual and conversational discourse. Findings from research in related disciplines have pointed to the significance of factors that can contribute to the attainment of communicative competence. Various teaching practices and relevant Information and Communication Technology (ICT) tools will be also introduced and discussed to achieve communicative competence as a complex ability. It is a timely contribution to current research on key areas in the teaching, learning and acquisition of second/foreign languages. The book presents the process of first and second language acquisition in children as well as the main principles of conventional and unconventional approaches and methods implemented in the general education as well as the language education of children. The long-term quantitative study described focused on the comparison of the results obtained by young learners taught English according to the Helen Doron Method in private courses and the results gained by young learners instructed according to the modern eclectic method at public primary school. The results were compared in such language areas and skills as vocabulary,
