

Textbook Of Microbiology For Nurses 1st Edition

Microbiology for Nurses approaches, in a systematic way, the pathogenic activities of a wide range of microorganisms and their indications on the human body. Designed to fully address the needs of nursing students taking up a curriculum on microbiology, the book conforms to the syllabus prescribed by the Indian Nursing Council. With ample review questions and multiple choice questions to enable easy recapitulation and vibrant color illustrations to appeal to the visual learner, this book presents the theoretical concepts of the subject from a professional nursing perspective. This textbook of general biology for nurses has been written by Irina Karuzina, a Soviet biologist with many years of experience of teaching biology in nursing schools in Moscow. Her book encompasses the whole world of living creatures from micro-organisms to man, and stresses the multiformity of the plant and animal kingdoms. Much attention is given to the evolution of life on Earth and to described parasites that infest man and domestic animals and cause many widely distributed diseases. Biology for Nurses meets the requirements of the syllabus of nursing schools as regards physiology, microbiology, and related biological subjects.
