Examining the photographic collection that Alberto Sartoris donated to the Swiss federal government, this text throws light on a poorly understood aspect of 20th century architecture, namely the mechanisms behind the creation and diffusion of the 'image of modern architecture'.

Mississippi author Eudora Welty, the first living writer to be published in the Library of America series, mentored many of today's greatest fiction writers and is a fascinating woman, having lived the majority of the twentieth century (1909–2001). Her life reflects a century of change and is closely entwined with many events that mark our recent history. This biography follows this twentieth-century path while telling Welty's story, beginning with her parents and their important influence on her reading and writing life. The chapters that follow focus on her education and her most important teachers; her life during the Depression and how her career, just getting started, is interrupted by World War II; and how she shows independence and courage through her writing during the turbulent civil rights period of the 1950s and 1960s. After years of care giving and the

deaths of all her immediate family members, Welty persevered and won the Pulitzer Prize in 1973 for *The Optimist's Daughter*. Her popularity soared in the 1980s after she delivered the three William E. Massey Lectures to standing-room-only crowds at Harvard, and the lectures were later published as *One Writer's Beginnings* and became a *New York Times* bestseller. This biography intends to introduce readers to one of the most significant women writers of the past century, a prolific author who transcends her Mississippi roots and has written short stories, novels, and non-fiction that will endure for all time.

Since becoming the capital of reunited Germany, Berlin has had a dose of global money and international style added to its already impressive cultural veneer. Once home to emperors and dictators, peddlers and spies, it is now a fashion showplace that attracts the young and hip. Moving beyond descriptions of Berlin's fashion industry and its ready-to-wear clothing, *Berliner Chic* charts the turbulent stories of entrepreneurially-savvy manufacturers and cultural workers striving to establish their city as a fashion capital, and being repeatedly interrupted by politics, ideology, and war. There are many stories to tell about Berlin's fashion industry and *Berliner Chic* tells them all with considerable expertise.

"Since its founding in 1947, the legendary Magnum Photos agency has been telling its own story: Its photographers were concerned witnesses to history and artists on the hunt for decisive moments; their pictures were humanist documents of the postwar world. Based in unprecedented archival research, *The Decisive Network* peels back layers of the Magnum mythology to offer a new history of what it meant to shoot, edit, and sell news images after World War II. Between the 1940s and 1960s, Magnum expanded the human-interest story - about the everyday life of ordinary people - to global dimensions while bringing the aesthetic of news pictures into new markets. Its best-known work started as humanitarian aid promotion, travel campaigns, corporate publicity, and advertising. Working with this range of clients, Magnum made photojournalism integral to visual culture. Yet Magnum's photographers could not have done this alone. This book unpacks the collaborative nature of photojournalism as it transpired on a daily basis, focusing on how picture editors, sales agents, spouses, and publishers helped Magnum photographers succeed in their assignments and achieve fame. *The Decisive Network* concludes in the late 1960s and early 1970s, when, amidst the decline of magazine publishing and the rise of an art market for photography, Magnum turned to photo books and exhibitions to manage its growing picture archives and consolidate its brand. In

that moment, Magnum's photojournalists became artists and their assignments turned into oeuvres. Such ideas were necessary publicity, and they also managed to shape discussions about photography for decades. Bridging art history, media studies, cultural history, and the history of communication, this book transforms our understanding of the photographic profession and the global circulation of images in the pre-digital world"--

This collection offers a variety of scholarly views on illustrated books for Soviet children, covering everything from artistic innovation to state propaganda. Nearly 80 years after his death, Lewis Hine's name is revered in the world of photography and practically synonymous with the labor reforms of the Progressive Era. His body of work—much of it a century old or more—remains vital as both aesthetic statement and social document. Drawing on a range of sources, including information from surviving family members, this first full-length illustrated biography presents a detailed and personal portrait of the sociologist and photographer whose haunting images of children at work in cotton mills and coal mines sparked the movement to end child labor, culminating with the Fair Labor Standards Act of 1938. There are 62 of his penetrating photographs included.

Eyes on Labor narrates an essential chapter in American cultural history, offering a fascinating broad-stroke history of the relationship of photography to the complex and troubled history of 20th-century labor and unionization movements.

After years of photographic research, the author explains methods of analyzing photographs historically. She outlines how you can recognize architecture, clothing, monuments, and other objects in photos; and where you can find additional help.

Latinos have been part of the Hollywood film industry for more than 100 years, yet beyond the remarkable success of a few, their visibility and clout have generally not reflected their significance in American society. Worse, the Latino image has suffered from widespread stereotyping in film, and performers face unjustified constraints in the kinds of roles available to them. Decade by decade from 1960 onward, this book analyzes important films made by or about Latinos, details the careers of Latino performers and filmmakers of the time, and analyzes how film portrayals of Latino characters and subjects connect with political and social trends of each decade. It discusses the role of gender, social class, and ethnicity in film portrayals and provides an overview of the diverse and dynamic Latino community in the United States, while

The author is a strong critic of ecological practices in the national parks and provides an assessment of the ecological history of Yellowstone's northern range since before the park existed, showing the impact of US Park Service policies on the health of the areas they oversee.

The creation and processing of visual representations in the life sciences is a critical but often overlooked aspect of scientific pedagogy. *The Educated Eye* follows the nineteenth-century embrace of the visible in new spectatoria, or demonstration halls, through the twentieth-century cinematic explorations of microscopic realms and simulations of surgery in virtual reality. With essays on Doc Edgerton's stroboscopic techniques that froze time and Eames's visualization of scale in *Powers of Ten*, among others, contributors ask how we are taught to see the unseen.

years. In this book, they put their wisdom to paper with a promise to help readers rise up and learn this powerful practice from the ground up. Photography is more popular than ever. We are inundated with images by the traditional media and now, increasingly, in social media. Every day, countless amateurs who've enjoyed using cell-phone cameras or simple, automatic-everything-point-and-shoot cameras decide to take the plunge and buy an SLR—a camera with all the bells and whistles that allows complete control over the way an image is recorded. Too often, those cameras collect dust because the users lack the necessary guidance. This book is designed to show readers the ropes of SLR photography. Beginning with a look at the components of SLRs and moving into the modes/options that come standard on today's cameras, readers will learn to understand and use their cameras. With the basics under their belts, they'll move on to understanding the basic tenets of photography—specifically, the art of capturing an accurate exposure. From there, readers will learn how to use their exposure controls to depict a subject or scene creatively—from determining how much of the scene should be in focus or obscured by a beautiful bokeh (desirable blur) for effect, to deciding whether to freeze motion or elicit the feeling of movement. Readers will learn what constitutes the “right” light for photography, and how to use highlight and shadow to create drama and add interest and a sense of dimension in their images. Information is presented on composition (the artful arrangement of the elements of the scene within the confines of the frame in a way that excites the viewer),

adding artificial light, and much more. All concepts are reinforced by the introduction of 43 skill-building and concept-reinforcing self-assignments designed to heighten understanding and boost confidence. With lushly illustrated pages and concise, jargon-free, easy-access lessons, this book is an important resource for all beginning photographers.

This series of ten books, each devoted to a decade of British life and containing around 300 photographs from PA Photos' huge archives, spans the whole of the 20th Century. Hand-picked by PA Photos' own archivists, most of these images have lain unseen since they were used as news pictures when they were first taken. Each image has been scanned especially for these books, many from glass plates, ensuring the best possible quality of reproduction. It is easy, looking back, to imagine a past neatly partitioned into clearly defined periods and dominated by landmarks: wars, political upheaval and economic trends. But the archive tells a different story: alongside the major events that constitute formal history are found the smaller things that had equal - if not greater - significance for ordinary people at the time. And while the photographers were working for that moment's news rather than posterity, the camera is an indiscriminating eye that records everything in its view: to modern eyes it is often the

backgrounds of these pictures, not their intended subjects, which provide the greatest fascination.

Covering an exhaustive range of information about the five boroughs, the first edition of *The Encyclopedia of New York City* was a success by every measure, earning worldwide acclaim and several awards for reference excellence, and selling out its first printing before it was officially published. But much has changed since the volume first appeared in 1995: the World Trade Center no longer dominates the skyline, a billionaire businessman has become an unlikely three-term mayor, and urban regeneration—Chelsea Piers, the High Line, DUMBO, Williamsburg, the South Bronx, the Lower East Side—has become commonplace. To reflect such innovation and change, this definitive, one-volume resource on the city has been completely revised and expanded. The revised edition includes 800 new entries that help complete the story of New York: from Air Train to E-ZPass, from September 11 to public order. The new material includes broader coverage of subject areas previously underserved as well as new maps and illustrations. Virtually all existing entries—spanning architecture, politics, business, sports, the arts, and more—have been updated to reflect the impact of the past two decades. The more than 5,000 alphabetical entries and 700 illustrations of the second edition of *The Encyclopedia of New York City* convey the richness and diversity of its subject in great breadth and detail, and will continue to serve as an indispensable tool for everyone who has even a passing interest in the American metropolis.

More than 200 photographs, half archival and half contemporary, reveal that tribal cultures in this remote mountainous region have been continually reacting to external forces and initiating internal innovations. The Introduction places the archival photographs in their wider context, emphasising the complexity of the colonial encounter and uncovering personal stories behind many of the images. The sequence of photographs, juxtaposing the historical and the contemporary, shows us the uneven and sometimes confusing mixture of past and present that is emerging in Arunachal Pradesh.

It is often said that in polite conversation the topics of religion and politics should be avoided but how long can most of us carry an engaging conversation on the weather? One who is concerned about the directions in which this nation is moving must necessarily discuss controversial topics. Have the labels liberal and conservative outlived their usefulness? Is liberalism truly a bad word? What are conservatives trying to conserve? Is it possible to rise above the din of partisan debate? These brief essays are critical comments on society, politics and religion in which the author avoids the pitfalls of extremism. The author, a minister of the Lutheran Church and with an interest in education, sees danger in extreme positions, religious or political, noting that the "right" produced Mussolini's Fascism and Hitler's Nazism whereas the "left" resulted in Stalinist Communism. Against rigid, absolutist positions as well as spineless relativism, one is reminded of the church mouse who once delivered a pertinent aphorism: "If you stand in the middle of the road, the traffic in two directions will flatten you into road kill" (Essay 10). The point is that controversial topics must not be ignored. Problems of narrowness, for example, have been tackled by the author in Essay 6, which begins with this paragraph: Some years ago an acquaintance who liked to speak in grand terms said to me in

all seriousness, "My philosophy is the pursuit of happiness". It was narrow and egocentric but at the time I had no response. However, now, many years later, I have an answer to that unforgotten statement, thanks to a guest at St. James. Last month Dr. William Foege ... [from the Carter Center and Emory University], speaking at St. James, stated that there have been many attempts to define civilization. One of these is happiness, which caused him to wonder whether a three-year-old with a chocolate might be more civilized than the parents.

Drawing together fifteen of Heron's new and previously published essays on working-class life in Canada, *Working Lives* covers a wide range of issues within working-class life, including politics and culture, gender, wage-earning and union organization.

Dust storms ravaged the Great Plains, and the economy crashed, leaving thousands unemployed, homeless, and hungry. Nazism began its rise to power in Germany, and a hurricane devastated New England. The 1930s were a time of enormous devastation, but also of great progress. Franklin D. Roosevelt promised a New Deal for America. Amelia Earhart attempted to become the first woman to fly around the world. Walt Disney began a media empire that would change entertainment forever. The 1930s would shape America and the world, with each new policy and invention creating the backdrop for a new world power.

Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art, science, social science, travel, war, fashion, the mass media and individual practitioners. These broad topics complement a fully developed cultural context whose emphasis is more on key ideas than individuals. The author also pays close attention to how contemporary practitioners, commentators and beholders have talked about specific works, the nature of photography and the photographers changing role in society.

Woodcock are one of the oddest birds in North America. Oddities aside, each spring they rise to great beauty with their sky dance at dusk. Greg Hoch

The fashion model's hold on popular consciousness is undeniable. How did models emerge as such powerful icons in modern consumer culture? This volume brings together cutting-edge articles on fashion models, examining modelling through race, class and gender, as well as its structure as an aesthetic marketplace within the global fashion economy. Essays include treatments of the history of fashion modelling, exploring how concerns about racial purity and the idealization of light skinned black women shaped the practice of modelling in its early years. Other essays examine how models have come to define femininity through consumer culture. While modelling's global nature is addressed throughout, chapters deal specifically with model markets in Australia and Tokyo, where nationalist concerns colour what is considered a pretty face. It also considers how models glamorize consumption through everyday activities, and neoliberal labour forms via reality TV. With commentaries from industry professionals who experienced the cultural juggernaut of the supermodels, the final essay situates their impact within the rise of brand culture and the globalization of fashion markets since 1990. Accessible and highly engaging, *Fashioning Models* is essential reading for students and scholars of fashion and related disciplines.

In *Mina Loy, Twentieth-Century Photography, and Contemporary Women Poets*, Linda A. Kinnahan explores the making of Mina Loy's late modernist poetics in relation to photography's ascendance, by the mid-twentieth century, as a distinctively modern force shaping representation and perception. As photography develops over the course of the century as an art form, social tool,

and cultural force, Loy's relationship to a range of photographic cultures emerging in the first half of the twentieth century suggests how we might understand not only the intriguing work of this poet, but also the shaping impact of photography and new technologies of vision upon modernist poetics. Framing Loy's encounters with photography through intersections of portraiture, Surrealism, fashion, documentary, and photojournalism, Kinnahan draws correspondences between Loy's late poetry and visual discourses of the body, urban poverty, and war, discerning how a visual rhetoric of gender often underlies these mappings and connections. In her final chapter, Kinnahan examines two contemporary poets who directly engage the camera's modern impact –Kathleen Fraser and Caroline Bergvall – to explore the questions posed in their work about the particular relation of the camera, the photographic image, and the construction of gender in the late twentieth century.

"This book turns a compelling new lens on thinking about the history of Paris and photography. The invention of photography changed how history could be written. But the now commonplace assumptions--that photographs capture fragments of lost time or present emotional gateways to the past-- that structure today's understandings did not emerge whole cloth in 1839. Focusing on one of photography's birthplaces, 'Paris and the Clich e of History' tells the story of how

photographs came to be imagined as documents of the past. Author Catherine E. Clark analyzes photography's effects on historical interpretation by examining the formation of Paris's first photo archives at the Mus  e Carnavalet and the city's municipal library, their use in illustrated history books and historical exhibitions and reconstructions such as the 1951 celebration of Paris's 2000th birthday, and the public's contribution to the historical record in amateur photo contests.

Despite the photograph's growing importance in these forums, it did not simply replace older forms of illustration, visual documentation, or written text. Photos worked in complex and shifting relation to other types of pictures as photographers, popular historians, and publishers built on the traditions and iconography of painting and engraving in order to both document the past scientifically and objectively and to reconstruct it romantically. In doing so, they not only influenced how Parisians thought about the city's past and how they pictured it; they also ensured that these images shaped how Parisians lived their own lives--especially in deeply charged moments such as the Liberation after World War II. This history of picturing Paris does not simply reflect the city's history: it is Parisian history"--
