The 48 Laws of Power: Chapter by Chapter Summary About This Book of Robert Greene! The desire for power is a fundamental human expression. When one feels that

he has no power over others or events, he is likely to be depressed. Everyone wants power. Those who pretend to have no desire for power are either deceiving themselves or attempting to deceive others. Power is like a drug that makes you stronger each time you taste it. The more you get, the more you want. Though a fundamental human behavior, the desire for power is considered impolite and selfish. It is widely held that those who seek power must seem to have no interest in it, and on the contrary they must pretend to care only about others. The one who can disguise his pursuit of power with his care for others ends up becoming the most powerful. This seems paradoxical but the fact remains that you cannot honestly and forthrightly pursue power. You invariably have to disguise both your means and your ends. The 48 Laws of Power by Robert Greene is a collection of "laws" based on historical and philosophical anecdotes. These laws are amoral as they themselves don't take into account any sense of right or wrong. Instead, the laws focus on how one can increase their influence over any situation, regardless of their moral consequences. This book explores the nuances of manipulating people around you for establishing power. The book focuses on how to gain power in any situation, regardless of whether it's morally right or wrong, and it uses specific anecdotes from history to illustrate these "rules of power." These laws may seem scandalously frank, but you can apply them without violating any of the strictures of public morality, which, according to Robert, is the way to get the best results. This is a Summary of Robert Greene's #1 Bestseller: The 48 Laws of Power Amoral, cunning, ruthless, and instructive, this piercing work distills three thousand years of the history of power in to forty-eight well explicated laws. As attention-grabbing in its design as it is in its content, this bold volume outlines the laws of power in their unvarnished essence, synthesizing the philosophies of Machiavelli, Sun-tzu, Carl von Clausewitz, and other great thinkers. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), the virtue of stealth ("Law 3: Conceal Your Intentions"), and many demand the total absence of mercy ("Law 15: Crush Your Enemy Totally"), but like it or not, all have applications in real life. Illustrated through the tactics of Queen Elizabeth I, Henry Kissinger, P. T. Barnum, and other famous figures who have wielded- or been victimized by-power, these laws will fascinate any reader interested in gaining, observing, or defending against ultimate control. (50 Cent liked the book so much he went on to co-author the sequel.) Mastering The 48 Laws of Power has enjoyed similar popularity in diverse walks of life, from Wall Street to Hollywood to D.C. The author views everything through the lens of power, which results in a distinctly uncomfortable degree of honesty about why humans do what they do. He labels as disingenuous anyone who claims that we do what we do for reasons other than power and illustrates how people who try to "opt-out" of the game of power by championing honesty, equality, or naivety are actually leveraging a time-honored law of power themselves. In terms of format, the book is eminently readable. After each law, a slightly expanded summary of the meaning is included, followed by a historical incident that illustrates transgression of the law, then another historical anecdote about the observance of the law. The author finishes each law by expounding on the "keys of power," or the details about how to apply the law in practice, and cautioning us with the "reversal", or how the particular law may not apply in all situations. understand the key concepts and ideas. For a lot of people, feeling powerless is an unbearable feeling that makes them feel helpless and miserable. Even the most passive people never want less power over their lives and environments. People are always looking for more power. However, this is where things get hairy. If we seem too power hungry, it can be dangerous, and we can be considered a threat to others. For that reason, we have to be subtle when seeking more power in our lives. Think about it in terms of aristocratic courts from centuries ago that you see portrayed on television and in movies. In those times, a court was established around whoever was in power at that time (king, emperor, etc.) and the courtiers were there to serve this person but each courtier had to do this in a way that wouldn't alert other courtiers and make them think that they were volleying for more power through a higher position. If suspicions arose because of this, a courtier might take action against that courtier. To prevent that from happening, things were done in subtle and covert fashions in order to not draw attention. All of this had to happen in a place that was supposed to be the most elegant and refined, too. So not only did everyone have to keep up their refined attitudes, but they also had to be cunning. To do this, most turned to seduction, charm, and properly thought out strategies instead of the usual treachery that most power struggles consist of. Nowadays, things are a lot like those aristocratic courts. You have to be devious to gain the power you're looking for, and you have to do so while still appearing to be a fair and civilized person. To some, power games like this seem evil and wrong, but the
