Have you ever wanted to learn a foreign language but you were overwhelmed because you thought it would take forever? Were you curious about how many words that it would take for you to be considered fluent? Did you give up before you even started because you didn't know where to begin? Here is a simple method that I have for you. I call it "5 a day=fluent in a year" All you have to do is learn (memorize) 5 words a day. There are 365 days in a year. So times that by 5 and what do you have? You have 1,825 words in your arsenal (by the way, one only needs to know 1,800-2,000 words to be considered fluent). For the 4 years that it would take a high school or even a college student to learn enough vocabulary, I have done it in a year on my own. I am giving you about 2,000 words, all in the order that I have learned them. These are not impractical words that we hardly ever use like: spaceship, and rocket scientist. Come on! Do we use words like that everyday? Of course not. We use words like knife, fork, spoon, butter, play, work, sing, and dance. These are the kind of words that I'm giving to you. I have done all the work for you. I went through the entire Spanish/English dictionary from A-Z, and pulled out all the words that I know are the most necessary in everyday language. All you have to do is take the exact order that I have given them to you and learn 5 a day. That way, there's no being overwhelmed by taking up too much time to learn in a day and wondering where to go next. It is fun to do because it only takes a few minutes a day. First, look at the five words and get familiar with them. Then, place your hand over the Spanish and look only at the English to

see if you memorized the Spanish correctly. Then take your hand off the Spanish to see if you got it right. Do that for all 5 words. Then, when you go the next day to learn 5 more words, first go back to the 5 from the day before and make sure you still remember them. That's it! Day Trading is Hard and Most Day Trading "Educators" Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom, video, and subscription services they sell you! Before we get

started, let me first go over what I don't include in this book... I have no "day trading" chatroom which charges your credit card each month for a service you'll never use. I have no monthly website subscription service for "more advanced strategies" that are needed to get started, but not included in the book. I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: Part 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called "pro" traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. Part 2: How to Day Trade - In this section, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. Part 3: Trading Setup - Next, I show you the optimal set up to use for day trading. This includes indicators to utilize, how to scan for stocks, and the best chart type to use. I then go over preferable stocks to trade, especially for those with smaller account sizes, and how to limit your risks so you don't end up like so many traders before you who have lost all their money day trading. Part 4: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. Part 5: Additional Advice - In the last part of the book, I go
