Christian apologist Ben Smith believes that the creation account in Genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and Earth. Many Christians are divided over how to reconcile Genesis with modern science, and this book evaluates all of the major options, ultimately concluding that the Bible allows for an old universe and Earth in a way that is also scientifically accurate. A former Young Earth creationist, Smith now believes that the age of creation is not specified in the Bible, and therefore scientists are free to answer the question. He believes that Christians should not hide from the controversy over the age of the Earth, but should

Pillars of Evolution provides a fresh and provocative perspective on adaptive evolution. Readers new to the study of evolution will find a refreshing new insight that establishes evolutionary biology as a rigorous and predictive science, whilst

practicing biologists will discover a provocative book that challenges traditional approaches. The book begins by leading readers through the mechanics of heredity, reproduction, movement, survival, and development. With that framework in place, it then explores the numerous ways that traits emerge from the interactions between genetics, development, and the environment. The key message is that adaptive changes in traits (and their underlying allelic frequencies) evolve through the traits' functions and their connection with fitness. The complex mappings from genes-to-traits-to-fitness are characterized in the structure of evolution. A single "structure matrix" describes why individuals vary in the values of adaptive traits, their ability to perform the function of those traits, and in the fitness they accrue. Fitness depends on how organisms interact with and perceive their environment in time and space. These relationships are made explicit in spatial, temporal, and organizational scale that also sets the stage for the crucially important role that ecology always plays in evolution. The ecological hallmarks of density- and frequency-dependent interactions allow the authors to explore new and exciting insights into evolution's dynamics. The theories and principles are then brought together in a final synthesis on adaptation. The book's unique approach unites genetic, development, and environmental influences into a single comprehensive treatment of the eco-evolutionary process.

Have you ever set a goal for prosperity, put in place a plan to make it happen and worked diligently on it to bring it to fruition only to have to best efforts come to nothing? Have you done it more than once? When it comes to wealth there is one thing that only the truly enlightened teachers agree on - one thing that will completely determine the outcome of any great endeavour that will lead inexorably to a prosperous life. There are many books on prosperity and wealth creation, but few of them provide the complete story. Money is above all else the result of energy flow, in fact some writers go as far as to say money is energy, either way, your energy is the key to your wealth. If your energy flow is blocked then your money flow will also be blocked. In this book James Allen breaks down the creation of wealth into the 8 pillars, starting fundamentally with energy as the first pillar. Often other teachers leave the flow of energy until much later, but Allen has identified that in fact it is the essential element that must be put in place before anything else will work. Then and only then does he move on to the rest of the stages. Chapters: Preface Eight pillars First pillar - Energy Second pillar - Economy Third pillar - Integrity Fourth pillar - System Fifth pillar - Sympathy Sixth pillar - Sincerity Seventh pillar - Impartiality Eighth pillar - Self-reliance The temple of prosperity Each of the 8 pillars is carefully crafted to provide you with a cohesive journey from where you are to where you want to be - to your temple of

prosperity.

Many people have been trying to explain the power of the subconscious mind through books and seminars for more than a century. Different writers approached this subject at different angles and most of them did not achieve their expected results as most readers did not really understand the concept or were not really convinced with what they have read. This book comes with a unique intention of helping you to achieve anything you really want and equally important, getting rid of anything you do not want. This is done by optimizing your subconscious mind power through The Mindynamics System. During those years of application and practice, I have managed to find out more about the subconscious mind: what works and what doesn't; and why. I have also created The Mindynamics System that explains clearly why

and how the subconscious mind works. The theories and techniques I have covered in this book do aligned with what "The Secret" and "The Law of Attraction" teach. There may be some differences in techniques and perspectives; but the principles are the same. I have found the codeword for motivation and I am now sharing with you. With the new challenges in the 21st century, I believe the codeword for motivation — The Subconscious Mind will be the deciding factor for success as the subconscious mind does magic and create miracles. With this book, I will show you the techniques to unleash the power of your subconscious mind through The Mindynamics System. You will be able to BE YOUR BEST and achieve your goals.
