As well as the open propaganda of the British Government produced during the Second World War, like the foreign language radio broadcasts of the BBC and the aerial propaganda leaflets dropped by the RAF over Occupied Europe, a secret underground propaganda battle was also fought. 'The Black Art' documents this history of Britain's clandestine psychological warfare conducted against the Nazi's Third Reich. This black propaganda was the work of several secret intelligence organisations including the Political Warfare Executive and Special Operations Executive. Using previously undiscovered primary source material 'The Black Art' charts the progress of and catalogues the range of propaganda leaflets covertly distributed across Occupied Europe and beyond to subvert the morale of German soldiers and civilians. The propaganda included such ruses as malingering instructions to fake the symptoms of illness, tips for desertion to neutral countries, parody postage stamps, advice on sabotaging a U-boat, counterfeit ration coupons, identity documents and newspapers plus numerous other falsely attributed leaflets and stickers. Over 350 illustrations are included.

Message from Author/Inventor Siafa B. Neal "The need to add pizzazz to the already complex game of chess has been and still is my fascination. The rudimentary levels of the game of conventional chess was taught to me by my Dad, the Late David Franklin Neal, Sr. In the past there was a fascination to add adventure and intellectual dynamics to the classical conventional game of chess. The result of this inspiration allows me to derive the establishment and discovery of a new form of chess, namely Advance 3-Dimensional Chess, 3-D Chess. The cornerstone of Advance 3-D Chess allows players to use the 2-dimensional concepts of basic chess and exponentially, extrapolate or translate these concepts into holistic 3-D dynamics perspectives. Thus the Longitudinal Star Gate 14 Model, Model III, materialize into reality. Although this book focuses on the Single Set games, the Longitudinal Star Gate 14 Model, Model III, which initializes as the Long. S.G. 14 Model, resembles a space-aged form of chess that entertains inter and the intra-psychological combative warfare of several combination arrangements of the chess piece initial position set-up. A game may consist of a Single Set, a Double Set, a Triple Set or a Quadruple Set. The participants of the S.G. 14 Model games, namely Model III, may play the game using a simultaneous mode (a chess game that uses two distinct and separate chess sets), a triple mode (a chess game that uses three distinct and separate chess sets), and a Quadruple mode (a chess game that uses four distinct and separate chess sets), whereby all of the chess pieces may engage at the same instant or at intermittent or sporadic intervals. These mode of Play allows a player to challenge between 2 - 4 individual players at the same instant or all at once. A possible game scenario may allow just two chess players to engage in psychological warfare game plays having a maximum of four possible separate and distinct games which the two players play all at once at the same instant. In this situation, the victor is the winner of three (3) out of a possible four (4) games win. This implies that the winner has to [CHECKMATE] his or her opponent's King on three (3) separate occasions out of four (4) possible chess events in order to win the four (4) games match. To reiterate, for the sake of simplicity, this book discusses the Single Set game initial set-up arrangement." Do you want to understand what psychological warfare is? If yes, then keep reading! Philosophers have long debated the different realms of the mind. Since ancient times, thinkers have discussed and written about the different parts of the psyche; there are the parts that are dedicated to loving, to thinking about material things, to armistices, to combat. However, to talk about the subconscious, we must speak of Freud. Sigmund Freud was one of the most important psychologists and philosophers in the history of mankind. He lived around the turn of the 19th century, and it was the one who developed the concept of psychoanalysis. This book cover contains: What is psychological warfare? War is based on deception - principles of Sun Tzu The manipulation Mental control Why Genghis Khan is a military genius Do whatever is needed - Machiavellian lessons People moralism - Machiavelli The power potential within you And many more! Psychoanalysis is a method of uncovering unconscious material through various methods of applied therapy. By sitting on a couch and talking about whatever arose in the person's mind, Freud would be able to analyze that person's life and unconscious motives. Freud believed that people are driven by deep, instinctual, sexually centered drives. He believed that our animal nature was a considerable part of our psyche and that what we presented to the world was only a small part of the equation. Think about an iceberg; there is a part that is visible above the water, and that is the conscious mind. What do we mean by the conscious mind? It is the part of the mind that is thinking, feeling, and expressing itself at the moment. Want to know more about this book? Buy now!
