Final volume in a trilogy, the first of which is the author's *The Giza death star*, and the second of which is his *The Giza death star deployed*.

The Egyptologist acclaimed for re-dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity: the Great Pyramid of Giza. What is the Great Pyramid of Giza? Ask that basic question of a traditional Egyptologist, and you get the basic, traditional answer: a fancy tombstone for a self-important pharaoh of the Old Kingdom. This, Egyptologists argue, is the sole finding based on the data, and the only deduction supported by science. By implication, anyone who dissents from this point of view is unscientific and woolly-minded—a believer in magic and ghosts. Indeed, some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them. Yet from beneath the obvious terms of this controversy, a deeper, more significant question arises: how is it that the Great Pyramid exercises such a gripping hold on the human psyche—adding cryptic grace to the back of the one-dollar bill and framing myriad claims of New Age "pyramid power"? In *Pyramid Quest*, Robert M. Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid, and develop a stunning hypothesis: This ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought, extending far back into a little-known time. In tracing that story, we come to understand not only the Great Pyramid but also our own origins as civilized beings.

The title for this book comes from the ancient Aboriginal concept of “song lines” —pathways to another world reached through dreamtime and visionary insight, and encounters with the unknown realm of experience. Veronica Goodchild addresses how dreams, synchronicities, UFO/ET encounters, Crop Circle mysteries, and NDEs all point to the new unfolding vision of reality. She draws on ancient mystery traditions to explore how this metamorphosis is already reflected cross-culturally in Hopi, Aztec, Mayan, Hindu, Tibetan, Maori, Zulu, Dogon, and Egyptian cultures. Songlines of the Soul proposes a new paradigm of reality, a new worldview. The signatures of this new reality are arising both in our own experiences and all around us if only we can stretch wide our stubbornly held perceptions of what is “reality.” As we stand at a

crucial turning point in our human history, this book offers hope, a call to awaken and expand our perceptions of the fundamental principles that orchestrate reality. In an age when the answers offered by governments and traditional religion are no longer sufficient, the quest for meaning must—as it always has in the past—arise first through visions, dreams, and journeys to other dimensions of consciousness.

New Realities of the Twenty-first Century, Part 1 by Prophet Wildman The psychic/parapsychic experience in the supernatural is one that is not readily understood or accepted by the masses. After enjoying the gift of psychic future predictive awareness for more than fifty years, Prophet Wildman had a deep understanding of the psychic and parapsychic experience. However, it wasn't until 2008 when he began receiving Holy subject (Tribulation) awareness as a precognitive psychic medium that he really began to delve deeper into this relatively unknown subject and explore psychic and parapsychic experiences as they related to the supernatural and Christianity. Prophet Wildman wows his readers with first-hand experiences, both from the perspective of being Christian and of being a psychic medium, while also providing a comprehensive dissection and decoding of the Tribulation event as it relates to the prophecy. Wildman's deeply personal experiences, along with

Explore the unknown with Prophet Wildman as he weaves his unwavering Christian beliefs with everything from extraterrestrials and ultraterrestrials to vampires, U.F.Os, and government cover-ups. An open mind and a strong religious conviction are all that's needed to begin searching and discovering some of the biggest mysteries of our time.

This intriguing collection of essays presents reflections upon the birth, proliferation, enduring appeal, and future of UFO mythology. Highly respected authors and researchers, representing the varied and sometimes competing perspectives of ufology and the sociology of religion, provide a fascinating and instructive voyage into the exotic social worlds of UFOs, abductees, and contactees. AN EVIL FROM THE VERY BEGINNING IS STILL HERE... Trapped behind the veil of another reality, a Fallen angel from antiquity sets in motion a plan of escape—a plan which involves summoning his real world progeny to himself through an oceanic gateway. As the day of escape nears, those the angel has abducted fight to flee the island themselves. But can they decode the megalithic formulas in time, or will they be left behind, trapped in an unsettled version of Bermuda for the rest of their lives? And if the angel does escape back to the real world, will he succeed in freeing his condemned brethren from Tartarus, unleashing tribulation on the earth in an attempt to reinstate a long lost Golden Age? In a battle between Good and Evil, Light and Darkness, a group of ex-soldiers will come face-to-face with the birth of a cosmic, age-long conspiracy that could spell the end of the world as they know it. Described by readers as "Dan Brown meets LOST meets Left Behind," Nephilim Island begins with John Carter looking for his missing brother in a tranquil Bermuda and ends with an epic clash between worlds in Apocalypse Rising. This special edition contains all three novels in the Progeny trilogy.

Henry's disappearance. But not all is as it seems in
Bermuda, and the puzzle that awaits John on the

The Atlantis story remains one of the most haunting and enigmatic tales from antiquity, and one that still resonates very deeply with the modern imagination. But where did Atlantis come from, what was it like, and where did it go to? Atlantis was first introduced by the Greek philosopher Plato in two dialogues the Timaios and Kritias, written in the fourth century BC. As he philosophises about the origins of life, the Universe and humanity, the great thinker puts forward a stunning description of Atlantis, an island paradise with an ideal society. But the Atlanteans degenerate and become imperialist aggressors: they fight against antediluvian Athens, which heroically repels their mighty forces, before a cataclysmic natural disaster destroys the warring states. His tale of a great empire that sank beneath the waves has sparked thousands of years of debate over whether Atlantis really existed. But did Plato mean his tale as history, or just as a parable to help illustrate his philosophy? The book is broken down into two main sections plus a coda - firstly the translations/commentaries which will have the discussions of the specifics of the actual texts; secondly a look at the reception of the myth from then to now; thirdly a brief round-off bringing it all together.

product of our mass culture, and we are conditioned to see and understand only the stimulus that is provided to it. However, there is a deeper process at work, something coming from our innate ability to discern greater truth. Tapping into this subconscious truth-detector is key in determining whether we buy into the premises of the many mainstream “truths” presented to us in popular culture and popular science. In the quest to reestablish that universal connection, editor J. Douglas Kenyon has culled from the pages of Atlantis Rising® magazine this collection of 34 concise and well-illustrated articles by world-class philosophers and theoreticians who offer thought-provoking insights from the lost secrets of ancient and primordial wisdom. The history of Neanderthal influence from Atlantis to the contemporary era • Provides evidence of Neanderthal man’s superior intelligence • Explores the unexplained scientific and architectural feats of ancient civilizations • Presents an alternative history of humankind since 7500 B.C. with an emphasis on esoteric traditions and the history of Christianity from the Essenes onward In Atlantis and the Kingdom of the Neanderthals Colin Wilson presents evidence of a widespread Neanderthal civilization as the origin of sophisticated ancient knowledge. Examining remarkable archaeological discoveries that date back millennia, he suggests that civilization on Earth is far older than we have previously realized. Using this information as a springboard,

Wilson then fills in the gaps in the past 100,000 years of human history, providing answers to previously unexplained scientific and architectural feats of ancient civilizations. Wilson shows that not only did Atlantis exist but that the civilizing force behind it was the Neanderthals. Far from being the violent brutes they are traditionally depicted as, Wilson shows that the Neanderthals had sophisticated mathematical and astrological knowledge, including an understanding of the precession of the equinoxes, and that they possessed advanced telepathic abilities akin to the "group consciousness" evident in flocks of birds and schools of fish. These abilities, he demonstrates, have been transmitted through the ages by the various keepers of the hermetic tradition--including the Templars, Freemasons, and other secret societies. In the course of his investigation, Wilson also finds new information about historical links between the Masonic tradition and the Essenes that indicate that America was "discovered" long before Columbus set sail and that Jesus actually survived crucifixion and fled to France with his wife Mary Magdalene.

Upside Down World: The Loss of the Sacred Cosmos is an incisive look on the concept of self awareness, instructing readers on how to find their true identities and potential by showing through detailed research how one needs to view reality and thereby move into a state of fulfillment with life.

Eugene Crowley Jr. uses the elements of philosophy, history, mythology, spiritual and scientific issues, and social elements of ancient cultures to show how Western civilization has neglected the knowledge and acts of self-realization, instead trying to act as society deems appropriate. Integrating many cultures and societies throughout time, including Native Americans, Ancient Egypt, the Greeks, and early Americans, the author references their beliefs, customs, and religions to help illustrate how other cultures and people live their lives in a more awakened state.

This book develops new science of gravity and light based on the century-old Le Sage theory of an "ether" that was replaced by Einstein's Theory of Relativity. After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang, experiments believed to prove Relativity are shown to actually prove the ether theory instead. Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity, electric

and magnetic fields, light, and radio waves. Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness. This is a “theory of everything” that explains the heretofore-unknown causes of the forces of nature. This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based. Our biblical God is shown to be a composite of Sitchin’s extraterrestrial “gods” who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered. Scholars who investigate race—a label based upon real or perceived physical differences—realize that they face a formidable task. The concept has been contested and condoned, debated and denied throughout modern history. Presented with the full understanding of the complexity of the issue, *Race and Practice in Archaeological Interpretation* concentrates on the archaeological analysis of race and how race is determined in the archaeological record. Most archaeologists, even those dealing with recent history, have usually avoided the subject of race, yet Charles E. Orser, Jr., contends that its study and its implications are extremely important for

the science of archaeology. Drawing upon his considerable experience as an archaeologist, and using a combination of practice theory as interpreted by Pierre Bourdieu and spatial theory as presented by Henri Lefebvre, Orser argues for an explicit archaeology of race and its interpretation. The author reviews past archaeological usages of race, including a case study from early nineteenth-century Ireland, and explores the way race was used to form ideas about the Mound Builders, the Celts, and Atlantis. He concludes with a proposal that historical archaeology—cast as modern-world archaeology—should take the lead in the archaeological analysis of race because its purview is the recent past, that period during which our conceptions of race developed.

We may live in astonishing times, but they are not incomprehensible when you know how to read the signs. Everybody says we're entering the Age of Aquarius, but when does it start, and how will we know what it looks and feels like? Ray Grasse deciphers the signs and correspondences of our nearing Aquarian future, using the tools of astrology, synchronicity, and mythology. He draws richly from contemporary religion, art, politics, science, even current movies, to show how the cultural signs of Aquarius and our likely future are already apparent and changing our world. The Aquarian Age will be marked by its intensely mental quality, when information will be the driving force of society and the biggest challenges we face will be those of the mind. Decentralization will be the order of business, either the empowered individual will reign supreme, or the collective interests of globalized society will predominate. It could be both. We are all participants in the global drama and all aspects of our inner and outer lives are bound up with the new Aquarian themes. 'Signs of the Times' is the authoritative travel guide for the trip into our future – don't leave the present without it.

inherent in the mountains and coasts on all continents • Reveals how ancient monuments were built to reflect and enhance the Earth's design, often connecting sites around the world • Includes detailed maps that show the simple geometrical relationships among the world's mountains, coastlines, islands, and ancient monuments From continent to continent across the globe, Mark Vidler and Catherine Young reveal that order is everywhere on Earth. On remote islands, soaring summits, and level deltas, they unveil natural topographic patterns related to pi, the golden ratio, and right-triangle geometry. And as the planet's design emerges, it becomes clear that this hidden order in nature decided the location of ancient monuments the world over. Through detailed maps, Vidler and Young show how the locations of megalithic monuments reflect and enhance a natural pattern on the Earth that connects its major features. The rows of standing stones at Carnac in France, for example, point to the summits of Mount Everest and K2, and Angkor Wat in Cambodia is on a straight line joining Mount Kilimanjaro in Africa and the tip of Cape Comorin in India. The authors examine the geography of many islands and each continent, including Antarctica, to show how the highest peak on each landmass falls on a line connecting coastal extremes. They reveal how circles of standing stones and man-made mounds mark intersections of these lines. They explore the connection between

the Nazca lines in Peru and the Amazon, Nile, and Ganges deltas and explain how the locations of the Giza pyramids, Stonehenge, and Machu Picchu are integrated into the natural design on Earth. As they uncover geometric patterns on the Earth line by line, point by point, the authors reveal how the world's ancient monuments represent a form of transglobal communication that far predates the written word.
