This book provides essential information on the morphology, biology, phytochemistry, pharmaceutical prospects, evolution, phylogeny, biogeography, and taxonomy of Paris (Melanthiaceae), a morphologically distinctive plant genus with great economic importance. Since the establishment of this genus, 70 species and 24 subspecific taxa have been described, resulting in considerable confusion in species delimitation. In this book, the taxonomy of all described taxa is carefully revised. Based on multi-disciplinary evidences, a revised classification system of Paris containing five sections is outlined. Every species is provided with a concise but diagnostic description, a color illustration, photographs that highlight distinguishing characters, examined specimens and distribution range. The interspecific relationships are clarified with an identification key. This monograph offers taxonomists, evolutionary biologists, ecologists, horticulturalists, phytochemists, and practitioners a thorough and up-to-date overview about this interesting plant group. It is equally valuable for undergraduate and graduate students, teachers and professionals engaged in related fields.

Dry. Watanabe's outstanding pictorial presentation of forensic pathology remains unparalleled since the first edition of Atlas of Legal Medicine appeared in 1968. The work admirably fulfills the expectation of an atlas through more than 500 photographs. These cover postmortem changes, chemical and physical injuries, and natural diseases manifesting as sudden unexpected death. All areas of forensic pathology are covered and illustrated at the gross level.

Physical Signs in Medicine and Surgery - An Atlas of Rare, Lost and Forgotten Physical Signs: The work for this text began over two decades ago as Dr. Ashley White was researching ancient diseases and their initial presentations for prevention of future pandemic plagues. This evidence based paleopathology research has granted Dr. White access to some of the world's most sensitive archaeological sites. These locations have been in England, Scotland, North and Central America, Nine additional countries in Europe, Asia - including Russia and China, the Middle East, North and Sub-Saharan Africa, and South America including the Amazon Basin. This comprehensive Atlas was originally conceived for doctors providing needed care in dangerous, rugged and remote situations often created by catastrophe, disasters, epidemics, and military conflicts. It is within these serious environments that this Atlas can assist practitioners find the most obscure and difficult diagnosis where access to x-rays and modern laboratory equipment are often impossible. Designed with a unique reference style of key words tagged to known medical systems the Atlas functions as an easy to use clinical field manual whether in use in an advanced medical care unit or in the harsh realm of the jungle. This extensive compendium of rare medical findings, together with an incredible group of landmark essays make this the most complete Atlas of physical signs ever published.

Provides an overview of the world that spans 5 centuries and an astonishing period of human progress. It begins in the year 1000 and ends in 1500 -- soon after Columbus is known to have reached the New World. Each chapter covers a century and charts the concurrent developments -- in politics, religion, warfare, exploration, technology, &, chiefly, material culture -- that occurred in the known parts of the world during those 500 years. Emphasizes the arts and architecture but also outlines the historical background to each century, introducing the major events and the social and political forces that were instrumental in shaping the cultures of the world. Color and B&W illustrations.

This book emphasizes past and current research efforts about principles of natural control of major parasites affecting humans, animals, and crops. Each chapter is a complete and integrated subject that presents a problem and confers on the safe alternatives to chemicals. This book discusses and updates information about three major topics of natural remedies. The first topic is represented in a chapter outlining important information on biological control of parasites, the second topic is represented in three chapters dealing with botanicals as promising antiparasitic agents, and the last four chapters deal with miscellaneous control strategies against parasites. This easily readable book is designed precisely for students as well as professors linked with the field of parasitic control. We enhanced words with breathing areas in the form of graphical abstracts, figures, photographs, and tables.

Arthropods act as hosts to and transmit some of the most troublesome and, in many cases, lethal diseases that afflict humans and animals.

As such, and because they represent four fifths of all named species of animals, they are of considerable importance to human and veterinary medicine, both in warmer climates and in temperate zones, due to the substantial increase in inter-continental travel.

Epilepsy is one of the most common serious disorders of the brain, affecting about 50 million people worldwide. Epilepsy accounts for 1 per cent of the global burden of disease; 80 per cent of the burden of epilepsy is in the developing world, where in some areas 80-90 per cent of people with epilepsy receive no treatment at all. The Epilepsy Atlas provides an illustrative presentation of data and information on the current status of epilepsy services and care available from 160 countries, areas or territories covering 97.5 per cent of the world population. The information is primarily gathered from key persons in the area of epilepsy care in each country identified by International Bureau for Epilepsy and the International League against Epilepsy, and, in some cases, by WHO regional offices.

In CranioSacral Therapy: Touchstone for Natural Healing, John E. Upledger, DO, OMM, recounts his development of CranioSacral Therapy. He shares poignant case studies of restored health: a five-year-old autistic boy, a man with Erb's palsy, a woman with a fifteen year history of severe headaches, and numerous others. And he offers simple CranioSacral Therapy techniques you can perform at home on yourself or loved ones.

Der Sammelband ist aus einem Panel beim Deutschen Orientalistentag in Marburg 2010 hervorgegangen und beleuchtet aus unterschiedlichen Perspektiven Körpererfahrungen, -kulturen, -diskurse und -techniken in islamisch geprägten Kulturen der Vergangenheit und Gegenwart. Leitgedanke ist dabei die Frage danach, wie Individuen ihr Wissen über Körper/Sexualität im sozialen Feld konstruieren und welche Deutungssysteme (z. B. Islam, graeco-islamische Medizin) dabei wirksam werden. The present volume, product of a conference panel at the German Orientalists' Conference in Marburg 2010, aims at throwing light on the experiences, discourses and body techniques prevailing in Muslim bodily culture. It combines historical with contemporary case studies and explores the individual and collective patterns of knowledge construction related to body and sexuality, in a social field where different and sometimes conflicting knowledge systems (e.g. Islam, Graeco-Islamic Medicine) can be found at work.

The idea behind this book is to produce a fully comprehensive and highly illustrated "how to" technical reference manual, demonstrating surgical procedures in a step by step manner. This book also covers assessment and investigations, but focuses on the surgical and non surgical management of all aspect of maxillofacial trauma. It will include most, if not all, of the surgical approaches and techniques used, for all injuries. This volume includes emergency procedures and the various techniques in repair of fractures and soft tissue injuries, from the simple to the complex. Each step is illustrated photographically or with line diagrams, with explanatory text. This will enable surgical trainees and surgeons with limited trauma experience to understand how and why any particular procedure is undertaken.
