It was a time of happiness, but it was also a time of fear as the white wolf cubs are born into the Wilds. Animals of all sorts begin streaming into the Wilds; fleeing the violence of the black wolves. Tor and his army have been gone for months checking to see if the rumors of the refugees were true. Were there still black wolves out there? Somewhere in the distance were the Blackstone Mountains. Is that what the wind was telling him, warning him about? Yes, it was speaking to him about things that no animal, wolf, or otherwise could stop. Tor and his army are captured by Warrior and Snuffer, who lived through the avalanche brought on by the oryx during the Blackstone War. Tor is to be executed for stealing the land called the Wilds and killing Deuce and Staver. Khoa sets out to find Tor. While he is gone, his son, Tristian, and Tor's son, Challenger, are taken hostage along with other animals. Saved from drowning in their cages by a young raccoon, the two pups set out to make it back to the Wilds. Everyone, from Pieces and his 'wild bunch,' to the black wolves are in on the search for the stolen cubs. Tristian and Challenger meet friends and foes along their trek across the Black Lake Road. Just as it seems they will make it back to the Wilds, Knox, the beaver, betrays them. As all seems lost, the cubs find an unlikely ally. In an ironic twist, Warrior learns that the white wolves hold his two sons as captives. An arrangement for a trade is made, but the dark wolves bring no white wolf cubs to the exchange; claiming they were taken by a lone black wolf in their camp. By the slip of a slingshot and a single stone, the war begins anew.

The Yukon is a land of remarkable wilderness, diverse ecosystems, and profound beauty. It is also home to a unique assemblage of birds. As of 2002, 288 bird species have been documented in the Yukon, with 223 occurring regularly. They occupy an amazing range of habitats, from the most barren mountain peaks to lush valley bottom forests, and are an integral part of the cultural heritage of Yukon First Nations people. The vast areas of natural habitat with limited road access can make the study of birds challenging, but are key in defining the nature of birding in the Yukon. Birds of the Yukon Territory is the result of a decade-long project initiated to gather and share what is known about the Yukon's birdlife. Lavishly illustrated with 600 colour photographs and 223 hand-drawn bird illustrations, the book presents a wealth of information on bird distribution, migration and breeding chronology, nesting behaviour, and habitat use, and on conservation concerns. Two hundred and eighty-eight species of birds are documented, including 223 regular species, and 65 casual and accidental species. In compiling this meticulously researched volume, the authors consulted over 166,000 records in a database created by the Canadian Wildlife Service, with information dating back to 1861. Sections on birds in Aboriginal culture and history, and bird names in the Yukon First Nations and Inuvialuit languages, enhance the book, as do the numerous easily interpreted charts and graphs. Destined to become a basic reference work on the avifauna of the North, Birds of the Yukon Territory is a must-have for bird enthusiasts and anyone interested in the natural history of the Yukon and the North.

New approaches to both cultural landscapes and historic urban landscapes increasingly recognize the need to guide future change, rather than simply protecting the fabric of the past. Challenging traditional notions of historic preservation, Conserving Cultural Landscapes takes a dynamic multifaceted approach to conservation. It builds on the premise that a successful approach to urban and cultural landscape conservation recognizes cultural as well as natural values, sustains traditional connections to place, and engages people in stewardship where they live and work. It brings together academics within the humanities and humanistic social sciences, conservation and

preservation professionals, practitioners, and stakeholders to rethink the meaning and practice of cultural heritage conservation, encourage international cooperation, and stimulate collaborative research and scholarship.

After moving to Billings, Montana, things are finally looking up for the Shannon family—Frank, Eileen, and their two children—nine-year-old Jimmy Lee and seven-year-old Jodie. But when Jimmy is unjustly accused of stealing a gold medallion from his father's workplace, he runs away to the mountain wilderness. After being mistreated by his parents for years, Jimmy feels this is the best option for him. Mr. Shannon organizes a search party to look for Jimmy. After two weeks of looking, the sheriff asks a local Indian tribe for its help. The two men assigned to the task find Jimmy's tracks, and they follow them for days. At the end of the trail, they discover a large pool of blood where a fight has taken place. All signs indicate Jimmy was attacked by a wild animal, but no remains are found. Meanwhile, with Bear, a wolf pup, Jimmy struggles to survive on what he knows, encountering an array of challenging situations—foraging for food, fighting off wild animals, braving the ever-changing weather conditions, and finding makeshift shelter. Like the mountain men in the 1800s, Jimmy survives by relying on his wits and wonders every day whether he will live or die.
