getAbstract Summary: Get the key points from this book in less than 10 minutes. This is an accessible introduction to bonds by a financial professional whose first book - as unlikely as it may seem - was a study of Max Jacob, the French poet. The literary background of the author, Annette Thau, may account for her book's clear, easy-to-read style. Most authors who write about bonds tend to get lost in the complex mathematics and specialized jargon of the bond markets. Not Annette Thau. Whether you are an individual investor trying to balance your portfolio with bonds, or a student of finance looking for a more lucid explanation of the subject than you can find in your textbooks, getAbstract highly recommends this book to you. Book Publisher: 2001 McGraw-Hill

In three different case studies, the effect of heterogeneous time preferences, heterogeneous beliefs and imperfect information about the economy's growth on the term structure of interest rates are studied. The initial chapter gives an introduction to the theory of financial markets in continuous time under imperfect information and establishes the existence of an equilibrium with complete markets.
