This book analyzes pitfalls of flipping houses, explains how to find the right houses to flip for profits, getting the best price on a house, and finding foreclosed houses, amongst a host of other great investment strategies.

Let's face it—fixing and flipping houses is sexy. Who doesn't love the idea of buying a rundown, mold-infested shack and transforming it into someone's dream home for massive profits? Reality TV shows make it look so easy. A little paint here, some new kitchen cabinets there, and presto! The house is sold for big bucks and everyone lives happily ever after. If only it were that simple. Fixing and flipping houses is a business. In order for a business to survive, prosper, and grow, systems must be put in place. Fixing and Flipping Real Estate: Strategies for the Post-Boom Era is a book that breaks down

the four essential components of a fix-and-flip business, giving you the building blocks to efficiently buy and sell 1 to 20 properties a month in today's post-boom era housing market. You'll learn about each of the boxes: Acquisition—How to find and buy a profitable real estate deal. Rehabbing—How to systematically remodel a house and how not to underimprove, or overimprove, your property. Sales—How to sell your flip for the highest possible price in the shortest possible time. Raising Capital—How to get the capital you need to grow your business, including using other people's money, for your real estate deals without getting sued or going to jail. In the post-real estate boom era, fixing and flipping is again a solid business--especially in the "sand" states—Arizona, California, Nevada, Texas, and Florida, among others. It's also a good bet in states as diverse as North Carolina and Washington State. And with the real estate market projected to bottom out nationally in 2012 (this time for real), there are plenty of houses to be renovated and plenty of money to be made by the enterprising in all fifty states. This book shows real estate investors everything they need to know to get started fixing and reselling houses either as a substantial sideline or a full-on business. In the world of real estate investing, two of the most common profit strategies are acquiring rental properties and flipping homes. Unfortunately, most people are not successful using these strategies. In *Stop Flipping, Stop Renting, Seller Finance Your Way to Financial Freedom*, authors Michael Arch and Erik Saengerhausen present a superior and more profitable strategy for investing: Seller Financing. With chapters such

Having grown up in a small town of five to six thousand residents, I totally appreciate life's simplicities. This work was created to simplify what most people would complicate: a house renovation with the goal of flipping. To be honest, real estate is a very complicated field with

Where To Download The Business Of Flipping Homes Short Term Real Estate Investing For Long Term Wealth

multiple sub-industries that do not necessarily correlate. Yet the home renovation and house flipping industry has, in recent times, gotten the general population excited about real estate investing. I like to call it the rebranding of an industry. House flipping has a silver lining so rarely mentioned that many active flippers do not fully understand the advantages until putting in several years of work. This is because the benefits of flipping are almost always seen as huge profit margins. Big profits are absolutely obtainable, but they are actually not the best benefit nor reason to start a house flipping business. The key to expanding any business is leverage. Flipping homes consistently helps you gain experience. That experience can then be used as a bargaining tool with lending institutions to allow you to leverage, or get financing, for larger and larger sums of money. Going into house flipping to make vast profits is not a strategy that fits the business model of 2020 and beyond. While liquidity (cash on hand) expedites one's ability to acquire properties, the access to leverage allows one to buy larger, more valuable and usually more profitable assets. For example, if you could put up \$100,000 of your cash and gain control of \$1 million worth of properties to renovate, you could end up with a much bigger check to deposit. The goal of any business is to first understand its industry and then use that knowledge to create a system of processes. If the blood of a business is money, the heart of a business is its systems. One cannot function properly without the other. In the following pages, I will teach you a method for flipping houses that will simplify the way you think about this industry. I will also teach you system design techniques that will place you years ahead of most of your competition. This short book is designed to obliterate your fears and misconceptions of the house-flipping process. It is also a blueprint for checks and balances that you can even use to flip remotely.
