The story of Oxford University Press spans five centuries of printing and publishing. Beginning with the first presses set up in Oxford in the fifteenth century and the later establishment of a university printing house, it leads through the publication of bibles, scholarly works, and the Oxford English Dictionary, to a twentieth-century expansion that created the largest university press in the world, playing a part in research, education, and language learning in more than 50 countries. With access to extensive archives, the four-volume History of OUP traces the impact of long-term changes in printing technology and the business of publishing. It also considers the effects of wider trends in education, reading, and scholarship, in international trade and the spreading influence of the English language, and in cultural and social history - both in Oxford and through its presence around the world. In the decades after 1970 Oxford University Press met new challenges but also a period of unprecedented growth. In this concluding volume, Keith Robbins and 21 expert contributors assess OUP's changing structure, its academic mission, and its business operations through years of economic turbulence and continuous technological change. The Press repositioned itself after 1970: it brought its London Business to Oxford, closed its Printing House, and rapidly developed new publishing for English language teaching in regions far beyond its traditional markets. Yet in an increasingly competitive worldwide industry, OUP remained the department of a major British university, sharing its commitment to excellence in scholarship and education. The resulting opportunities and sometimes tensions are traced here through detailed consideration of OUP's business decisions, the vast range of its publications, and the dynamic role of its overseas offices. Concluding in 2004 with new forms of digital publishing, The History of OUP sheds new light on the cultural, educational, and business life of the English-speaking world in the late twentieth century.

For this study a corpus-linguistic approach was chosen, requiring the compilation of a text corpus of radio news bulletins from linguistically very different countries, Algeria, Egypt and Saudi Arabia.

Human Conscience and Muslim-Christian Relations puts forward a discussion of how the notion of conscience may unite Muslim and Christians across religious divides, as well as examining the relation between selfhood and otherness in interfaith dialogue. The author explores how the notion of conscience has been dealt with by modern Egyptian authors and discusses their works in light of how Christian-Muslim relations in Egypt have evolved during the modern period.

Most dictionaries have forerunners, and all have imitators; an understanding of the historical foundations of dictionary-making is therefore one of the preconditions of further progress in academic lexicography. The papers in this volume, which were presented at the 1986 Exeter Seminar, survey most of the lexicographical traditions in the world, some tracing them right back to their beginnings. The programme was divided into eight sessions, with the following concentrations of topics: (1) three classical traditions, (2) the early history of European lexicography, (3) the beginnings of English lexicography, (4) further aspects of English lexicography, (5) the background of diverse national developments, (6) specific features of national developments, (7) pioneers of three genres, (8) recent trends in the English dictionary.

This ebook is a selective guide designed to help scholars and students of Islamic studies find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In Islamic studies, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is a static version of an article from Oxford Bibliographies Online: Islamic Studies, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study of the Islamic religion and Muslim cultures. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit www.aboutobo.com.

The papers collected in this volume are a selection of papers presented at a conference on Language and Translation (Irbid, Jordan, 1992). In their revised form, they offer comparisons between Western and Arabic language usage and transfer. The articles bring together linguistic and cultural aspects in translation in a functional discourse framework set out in Part One: Theory, Culture, Ideology. Part Two addresses aspects for comparisons among translations and their cultural contexts (equivalence, stylistics and paragraphing). Part Three features Arabic-English language contact, specifically in technical writing, the media and academia. Part Four deals with problems in lexicography and grammar: terminology, verb-particle combinations and semantic diversity of radical-doubling forms and includes a proposal for a new approach to English/Arabic dictionaries. Part Five turns to issues of interest to language teachers with practical proposals and demonstrations. Part Six deals with geopolitical factors linking the West and Middle East, focusing on equality in communication and exchange of information.

TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to

neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

This is a shortened version of the three volume Walford's Guide to Reference Material, 5th edition: Volume 1, Science and Technology (1989), Volume 2, Social and historical sciences, philosophy and religion (1990), and Volume 3, Generalia, language and literature, the arts (1991). There are more than 3,000 entries, forming an updated compilation of what are considered to be the basic items in the main volumes, plus some more recent material up to April 1992.

"Based on the seventh edition of The Oxford Companion to English Literature (2009)"--Preface.

Queering the Medieval Mediterranean analyzes the forgotten exchange of sexualities that was brought forth through the Mediterranean and its bordering landmasses. It highlights the importance of queerness and sexuality developed on the Mediterranean trade routes.

This book investigates several aspects of translation, including literary, political, legal, and machine translation, and it covers a diversity of languages, including Arabic, English, French and Greek. With the whole world becoming a global village, translation has acquired a remarkable dynamicity that encapsulates time and space, bridging gaps between cultures, despite all geographical boundaries. Contributions to this collection cross various spaces, including Jordan, Greece, Egypt, Malaysia, Romania, and the United Arab Emirates. This volume provides researchers interested in translation studies with detailed insight into translation as a product and a process. The pedagogical implications of some of the chapters are expected to trigger future work on translators' training in all types of translation.

A.J. Racy, a scholar of ethnomusicology, provides an intimate portrayal of the Arab musical experience in this pioneering book. Racy focuses on tarab, a multifaceted concept that has no exact equivalent in English and refers to the indigenous music and the ecstasy associated with it. His book examines aspects of musical craft, including basic skills, musician's inspiration, love lyrics as tools of ecstasy, and the relationship between performers and listeners.

The thesis explores the syntactic and semantic dimensions of four linguistic elements that appear in Modern Greek arguably as quantifiers and modifiers, i.e., in the form of Quantificational Modifiers (QMods) olos 'all, whole, overall' and its extension olikos 'total', merikos 'some, a few, partial', ligos 'some, few, little, insignificant' and polis 'many, great, considerable'. Such QMods are analyzed as 'measure' quantifiers of scalar semantics that appear in a syntactic position common to adjectival modifiers. The thesis explores specific sets of reading and their interpretations. Such a phenomenon is common to Modern Greek, English, French and Arabic QMods and gives evidence to the universality of Quantificational Modification. Chapter 1 discusses Quantification as semantic interpretation along with the main questions this research intends to answer, while Chapter 2 reviews recent literature on Quantification within and across languages. Chapter 3 focuses on Modern Greek expressions of Quantification and extends chapter 2 into a further discussion about the various syntactic manifestations. Chapters 4 and 5 are extensions to chapters 2 and 3 as they discuss the semantics of specific QMods as 'total' and 'partial' quantifiers, which operate on homomorphic sets of degrees and amounts. Chapter 6 discusses the broader issues in the thesis from a theoretical and typological perspective that establishes Quantificational Modification as a universal and purely semantic subclass of Quantification. Our findings are summarized in chapter 7, followed by suggestions for expanding our investigation into other related areas.

Providing a single-volume source of information about the English language, this text takes in language examples from Cockney to Creole across a historical range from Chaucer to Chomsky.

Offers definitions for English words and phrases, along with observations about the evolution of the dictionary since its first edition and tables that contain information for such topics as countries and chemical elements.

A pioneering volume addressing issues related to cultures, ideologies, and the dictionary. A cross-cultural and cross-linguistic study with focus on selected Western and non-Western languages. A number of in-depth case studies illustrates the dominant role ideology and other types of bias play in the making of a dictionary. The volume includes invited papers of 40 internationally recognized scholars.

This convenient pocket dictionary--an abridged and updated edition of the acclaimed Oxford English-Arabic Dictionary of Current Usage--is designed for both the English speaker learning Arabic and the Arabic speaker learning English. It records the different levels of usage found in newspapers, radio, television, and films, providing major Arabic dialectal equivalents for familiar, colloquial, and slang words. Ideal for the student or traveler, the dictionary includes: * Nearly 40,000 entries providing English headwords with multiple meanings and their nearest Arabic equivalent * For Arabic speakers: phonetic equivalents for headwords, phrases illustrating unexpected and alien idioms, and explanations of headwords denoting concepts new to the Arab world * For English speakers: vowels and diacritics included in the Arabic text, irregular plurals of nouns, and simple verb conjugations in the imperfect tense * Meticulously transcribed Arabic characters for easy reading

The largest and most up-to-date collection of English words and multiword units borrowed from the Arabic, directly or indirectly, totalling 2338 items. All major dictionaries in English were surveyed, including new-word collections, and college dictionaries. Each dictionary entry gives the first recorded date of the loan in English, the semantic field, variant forms, etymology, the English definitions, derivative forms, and sometimes grammatical comment. The major sources of

each entry are noted, along with the approximate degree of assimilation in English. A substantial part of the book is devoted to nontechnical analytical essays, which treat the forty-six semantic areas so as to embrace all disciplines and throw light on the individual subject. Other essays treat the phonological and linguistic aspects of the data, so as to show how languages in contact interact and ultimately influence each other's culture. This is a wide-ranging, innovational book that advances the study of comprehensive borrowing within languages over the centuries.

The Lexicon brings together lexical material from a wide range of published and non-published sources to create an extensive compilation of the vocabulary of Fulfulde as it is spoken in that part of central Mali known as Masina (in Fulfulde, Maasina). The Lexicon is intended primarily for non-Fulfulde speakers who are learning the language at the intermediate or advanced levels and who need access to a comprehensive reference source on Fulfulde vocabulary. Scholars, development workers, and others whose research or fieldwork involves use of the Fulfulde of Masina may find it helpful as well in clarifying nuances of meaning and standardized spelling for the less familiar terms they might encounter. It is also intended that the present work, beyond the matter of organizing vocabulary, will contribute significantly to the expanding lexicographical and linguistic investigations of Fulfulde.

Endorsed by academics worldwide, the Oxford Arabic Dictionary is the most authoritative English-Arabic / Arabic-English dictionary ever published. Based on real modern evidence and computational analysis of hundreds of millions of words of both English and Modern Standard Arabic (the standardized variety of Arabic used in writing and in most formal speech), the dictionary boasts more than 130,000 words and phrases and 200,000 translations. This up-to-date resource has been designed for both Arabic and English native speakers and includes the latest vocabulary from computing, business, the media, and the arts, across both languages. The organization and layout have been designed for maximum clarity and ease of use. The most commonly used sense of each word is shown first, helping you to identify and understand the correct meaning, and more than 70,000 real-life example phrases help you interpret meaning and usage accurately. All Arabic text is shown with vowels to aid the learner of Arabic in pronunciation and comprehension and the Arabic-English section of the dictionary is usefully organised by root, which are listed alphabetically. The dictionary is also packed with extra features including tables of Arabic verbs, Arabic numbers, dates, and years, and irregular English verbs. Produced using the unique dictionary resources of Oxford University Press with an international team of expert advisors, the Oxford Arabic Dictionary is a ground-breaking work, essential for any serious student of Arabic and English, as well as academics, professionals, business people, teachers, and translators. Readership: Ideal for editors, translators, business people, teachers, academics, and students.

The Companion to Jewish Culture - From the Eighteenth Century to the Present was first published in 1989. It is a single-volume encyclopedia containing biographical and topic entries ranging from 200 to 1000 word each.

Idioms represent a fascinating linguistic phenomenon that has captured the attention of many linguists for decades. This corpus-based study of idioms in Modern Standard Arabic sheds light on their intricate nature, establishes the major patterns of their linguistic behaviour, and provides explanations for these patterns. Adopting a descriptive framework, the study addresses two main issues with regard to the discursive behaviour of idioms: the discursive functions that they perform and the ways in which they contribute to the cohesion of their texts. Examining primary data with regard to the semantic, discursive, lexical and grammatical properties of Arabic idioms, the author touches on the ubiquity of these expressions in language use, the wide range of functions they perform in discourse, the problems they often cause in domains such as foreign language learning and translation, and their typical divergence from the normal rules of grammar and semantic compositionality. Providing explanations for major linguistic phenomena, this analysis will be accessible to linguists, translators, lexicographers, translation software developers, and language teachers as well as learners.

Islam is a very mysterious and complex faith, one of intellectual depth in prayer and practice. It is unfortunate that the teachings of Islam have been marred by centuries of intellectual malaise, political misdirection, extremism, and disunity, leaving many spiritual wanderers both Muslim and non-Muslim to ponder a plethora of unaddressed questions about these sacred teachings. In his newest book, *The Muslim Book of Why: What Everyone Should Know about Islam*, author, scholar, and leading jihad theorist Warithudeen Umar highlights the concept of *ijtihad* in an attempt to help answer many of today's most pressing questions about Islam. *Ijtihad* is described as a creative and disciplined intellectual effort to derive legal rulings from Islamic sources while taking into consideration the variables brought on by the fluctuating circumstances of the Muslim world. Though the world has changed and expanded, humanity's need for these teachings viewed through the clarifying concept of *ijtihad* has not. To right these wrongs of gross misguidance within Muslim society, we must deconstruct history in order to discern what went wrong after the revelation of the Qur'an was shared with the world. *The Muslim Book of Why* seeks to do so, refocusing Muslim thought on a life of faith, family development, and worship.
