

The Encyclopedia Of Infant And Toddlers Activities For Children Birth To 3 Written By Teachers For Teachers

Currently, there are two types of pediatric disorder books available: high level technical books geared toward pediatric specialists, and self-help books for parents. The technical books cover diagnosis and treatment, while the self-help books cover general problems, are single authored, and speak little to the research of any given disorder. This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that cover the research information on common disorders in age 0-3. Topics include those most typically occurring, making them of great interest to both specialists and nonspecialists. Disorders and dysfunction of a variety of types are discussed, whether cognitive, social, emotional, or physiological. Coverage includes asthma, allergies, colic, bedwetting, diarrhea, genetic disorders, SIDS and learning disabilities, and provides an essential, affordable reference for researchers in developmental psychology, as well as allied health fields. Written at a level for general understanding—allows for easy and quick grasp of information to both specialists and non specialists alike Covers disorders across many systems (neurological, immunological etc) providing quicker access to info that would normally be dispersed across a wide literature Written by research experts ensuring accuracy that is sometimes lacking in non-specialist books Covers disorders, dysfunctions, and abnormal

development in one place saving time looking at multiple sources for these related items
Three owl babies whose mother has gone out in the night try to stay calm while she is gone.
Infancy is a unique period, in that at no other state is there greater growth and development. During this time, growth is occurring at a physical level, but equally impressive are the socio-emotional and cognitive developments during this time. Genetics, the womb environment, and the physical environment after birth all combine to impact the rate and manner of growth. Who we ultimately become as individuals begins here. Intended for university and public libraries...
Etc.

others. Most books available now either tend to be extremely broad in the areas of all infant development including physical and social development, or specialize in cognitive development, language acquisition, or memory. Rarely do you find all three together, despite the fact that they all relate to each other. This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development, and specifically targets the ages 0-3. Providing summary overviews of basic and cutting edge research, coverage includes attention, assessment, bilingualism, categorization skills, critical periods, learning disabilities, reasoning, speech development, etc. This collection of articles provides an essential, affordable reference for researchers, graduate students, and clinicians interested in cognitive development, language development, and memory, as well as those developmental psychologists interested in all aspects of development. Focused content on age 0-3- saves time searching for and wading through lit on full age range for developmentally relevant info Concise, understandable, and authoritative—easier to comprehend for immediate applicability in research

Babies and toddlers will have a blast discovering the world in this first encyclopedia! Divided into themes of home, school, city, farm, ocean, mountains, and jungle, this large format board book teaches young children more than 900 words, perfectly matched with fun, clear illustrations, encouraging interactive learning between parents and their children. A spread showing a cozy living room features simple text for a door, table, sofa, vacuum, lamp, and dozens more objects. In a busy classroom, find clearly labeled desks, chairs, books, colored pencils, and anything else children might encounter at school. On a bright, sunny beach, a seagull, beach towel, sand castle, boat, and more can be found.

Following each themed spread is a corresponding spread with facts and further information to introduce more advanced learning. Readers will learn that eagles are birds with large wings, that tow trucks help move cars when they're broken, and that if you go to the mountains in winter, you'll need a jacket. Little ones will build their vocabulary and stimulate their mind while enjoying colorful art. And with hundreds of people, animals, and objects to discover on its pages, kids will want to explore Baby Encyclopedia over and over again!
