Discussions have suggested the following: far from losing its significance with the break-up of the universal church and the universal empire, the European university really came into its own in the early modern period (the age of confessional strife).

The Reformation was the seismic event in European history over the past 1000 years, and one which tore the medieval world apart. Not just European religion, but thought, culture, society, state systems, personal relations - everything - was turned upside down. Just about everything which followed in European history can be traced back in some way to the Reformation and the Counter-Reformation which it provoked. The Reformation is where the modern world painfully and dramatically began, and MacCulloch's great history of it is recognised as the best modern account.

The volume features a comprehensive introduction, and provides a broad survey of the beginnings and progress of the Catholic and Protestant Reformations in Northern Europe, while also highlighting themes of comparison that are common to all of the bloc under consideration, which will be of interest to Reformation scholars across this geographical region.

Throughout the history of the Church, music has regularly been placed under the critical microscope. Nonetheless, the intensity of thought concerning music's role in the liturgy and in spiritual life in general reached a peak during the period of the European Reformations. This multidisciplinary collection examines the debates and controversies around music and theology during that

time from both Catholic and various Protestant perspectives. It includes twenty essays from musicologists, theologians, Biblical scholars, and Church historians that attempt to answer the following questions: What difference did the theological and ecclesiological developments of the sixteenth century make to musical forms and practices? What continuities of practice existed with former times? How was the desire to restore the church to an imagined pristine state manifest in music and liturgy? How did developments in exegesis arising from the massively increased knowledge and access to the Bible in Hebrew and Greek affect the way composers wrote and congregations heard? Why did some reformers embrace music, while others rejected it? An expert re-interpretation of how religious toleration and conflict developed in early modern Europe.

Initiated in 1517 by the radical German monk Martin Luther, the Reformation would reshape Europe not only religiously but also politically. In this account, Vivian Green looks at the main personalities, events and ideas of this ferment of change, revealing the medieval background to many of the leading ideas of the Reformation, and considering the long-term legacy of radicalism and individualism which it created.

Recent decades have witnessed the fragmentation of Reformation studies. High-level research has tended to be

confined within specific geographical, confessional or chronological boundaries. By bringing together scholars working on a wide variety of topics, this volume aims to counteract this centrifugal trend and to provide a broad perspective on the impact of the European reformation. The essays present new research from historians of politics, of the church and of belief. Their geographical scope ranges from Scotland and England via France and Germany to Transylvania and their chronological span from the 1520s to the 1690s. Together, they demonstrate that movements for religious reform left no sphere of European life untouched. Written by an experienced university history lecturer, this book presents key facts of the European Reformation in a straightforward fashion to help the student understand the key reformers and their basic reforming principles.

This book is a survey and analysis of the European Reformation of the sixteenth century. During this period western Christianity underwent the most dramatic changes in its entire history. From Iceland to Transylvania, from the Baltic to the Pyrenees, the Reformation divided churches and communities into 'Catholic' and 'Protestant', and created varying regional and national traditions. The new Protestant creed rejected traditional measures of piety--vows, penances, pardons, and masses--in favor of sermons and catechisms, and an everyday morality of diligence, neighborly charity, and prayer. In the process, it involved many of Europe's people for the first time in a political movement inspired by an ideology and nourished by mass communication. Using the most recent research, Cameron provides a thematic and narrative synthesis of the events and ideas of the Reformation. He examines its social and religious background, its teachers and their message, and explores its impact on contemporary society.

This title presents the European Reformation as seen through

the life of an important but little-known participant—Philipp of Hesse, a nobleman who became a Reformation leader in Germany.

Between the religious massacres, conflicts and martyrdoms that characterized much of Reformation Europe, there seems little room for a consideration of the concept of moderation. Yet it was precisely because of this extremism that many Europeans, both individuals and regimes, were forced into positions of moderation as they found themselves caught in the confessional crossfire. This is not to suggest that such people refused to take sides, but rather that they were unwilling or unable to conform fully to emerging confessional orthodoxies. By conducting an investigation into the idea of 'moderation', this volume raises intriguing concepts and offers a fuller understanding of the pressures that shaped the confessional landscape of Reformation Europe. A number of essays present case studies examining 'moderates' who existed uneasily in the space between coercion and persuasion in Britain, France and the Holy Roman Empire. Others look more broadly at local and national attempts at conciliation, and at the way the rhetoric of moderation was manipulated during confessional conflict. These are all drawn together with a substantial introduction and analytical conclusion, which not only tie the volume together, but which also pose wider conceptual and methodological questions about the meaning of moderation.

This collection provides a thorough introduction to and critical commentary on recent scholarship on the Reformation. Thirteen leading British, American and

Australian scholars discuss the variety of Reformations across Europe, and provide overviews of key problems and themes. In addition to surveying the 'long' historiographical background, these essays offer a detailed synthesis of research published in the last twenty or thirty years, including material not normally available to a non-specialist readership. This book will be an invaluable introduction to the field for students at all levels.

In this widely praised history, noted scholar James D. Tracy offers a comprehensive, lucid, and masterful exploration of early modern Europe's key turning point. Establishing a new standard for histories of the Reformation, Tracy explores the complex religious, political, and social processes that made change possible, even as he synthesizes new understandings of the profound continuities between medieval Catholic Europe and the multi-confessional sixteenth and seventeenth centuries. This revised edition includes new material on Eastern Europe, on how ordinary people experienced religious change, and on the pluralistic societies that began to emerge. Reformation scholars have in recent decades dismantled brick by brick the idea that the Middle Ages came to an abrupt end in 1517. Martin Luther's Ninety-five Theses fitted into an ongoing debate about how Christians might better understand the Gospel and live its teachings more faithfully. Tracy shows how Reformation-era religious conflicts tilted the balance in church-state relations in favor of the latter, so that the secular power was able to dictate the doctrinal loyalty of its subjects. Religious reform, Catholic as well as Protestant, reinforced the bonds of community, while creating new divisions within towns, villages, neighborhoods, and families. In some areas these tensions were resolved by allowing citizens to profess loyalty both to their separate religious communities and to an overarching body-politic. This compromise, a product of the Reformations, though not willed by the reformers, was the historical foundation of modern, pluralistic society. Richly illustrated and

elegantly written, this book belongs in the library of all scholars, students, and general readers interested in the origins, events, and legacy of Europe's Reformation.
