Harrison Ford has been labeled one of the top 100 stars of all time, the sexiest man alive, and the highest-grossing actor in the history of film, yet he still has the appeal of an average guy to whom the common man can relate. He has won more than two dozen awards, including the Lifetime Achievement Award in 2000. It examines in great detail more than 30 films, including American Graffiti, the several Star Wars outings, Blade Runner, The Fugitive, and Air Force One. It discusses the films' inceptions, writing, casting, sets, schedules, stunts, filming obstacles, openings, earnings, controversies, and reviews. While the history of Israel during the period from ca. 1200 to 586 B.C.E. has been in the forefront of biblical research, little attention has been given to questions of daily life. Where did the Israelites live? What did people do for a living? What did

they eat and what affected their health? How did the family function? These and similar questions form the basis for this book. The book introduces different aspects of daily life. It describes the natural setting and the people who occupied the land. It deals with the economy, both rural and urban, emphasizing the main sources of livelihood such as agriculture, herding, and trade. These topics are discussed in relation to the family in particular and the social structure in general. Other topics include urban society, the bureaucracy and the military. Beyond material culture, the book delves into daily and seasonal cultural, social and religious activities, art, music, and the place of writing in Israelite society. Drawing on textual and archaeological evidence, and written with nontechnical language, the book will be especially helpful for undergraduates, seminarians, pastors, rabbis, and other interested nonspecialist readers as well as graduate students and faculty in Hebrew Bible.

The Genius of Japanese Carpentry tells the story of the 1200-year-old Yakushiji monastery in Nara and the dedicated modern-day craftsmen who are working to restore what has been lost to the depredations of time, fire and warfare. Although the full monastery reconstruction will not be completed until 2030, one of the main temples, the Picture Hall, has been completely restored employing the same woodworking technology used to create the original building. This new edition of an architectural classic is by Azby Brown—one of the world's leading experts on Japanese architecture. It contains a new preface and many new text materials and photographs—most of them now available in color for the first time. Azby Brown chronicles the painstaking restoration of the temple through extensive interviews with the carpenters and woodworkers along with original drawings based on the plans of master carpenter Tsunekazu Nishioka. An inspiring testament to the dedication of these craftsmen and their philosophy of carpentry work as a form of personal fulfillment, The Genius of Japanese Carpentry offers detailed documentation of this singular project and a moving reminder of the unique cultural continuity found in Japan.
