Rev. ed. of: Oxford handbook of practical drug therapy / Duncan Richards, Jeffrey K. Aronson. 2005.

The subject of this publication, thyroid cancer, was the topic chosen for the First Symposium on Clinical Oncology, organized by the Royal College of Radiologists, London, on 26 and 27 January 1979. The papers collected here are based on the presentations made at that meeting, but have been expanded in most cases to provide a more complete review. Thyroid cancer is an uncommon tumor, but as a result of well-directed collaborative efforts our knowledge of its pathogenesis, natural history, and management has increased enormously in the last decade. Consideration of this progress in our understanding of thyroid cancer well illustrates the main theme to be promoted in this and future symposia, which is the encouragement of a multidisciplinary approach to the solution of the many outstanding problems in clinical oncology. The need is recognized for close and sustained collaboration between clinicians of many speciality groups and research workers

of many scientific disciplines, to accelerate further progress in the prevention, early detection, and management of all forms of malignant disease. Thyroid cancer provides an excellent example of the present achievements of such a multidisciplinary approach, where British research and experience have made a contribution that has received world wide recognition.

This innovative textbook provides a concise and accessible guide for undergraduate students specializing in children and young people's nursing in the UK and further afield. Each chapter has been fully updated to reflect current knowledge and practice. The wide range of topics covered includes all the essentials, such as contemporary child health policy and legal issues; knowledge and skills for practice; and caring for children with special needs. Students will learn how to recognize the deteriorating child, use procedural play and distraction, and consider the mental health of children and young people. A Textbook of Children's and Young People's Nursing is written by multidisciplinary experts, rooted in child-centred healthcare within a family context, and draws upon best contemporary practice. It is an invaluable resource that will help nursing students provide effective, evidence-based care. Key points, summary boxes and clearly defined aims, objectives and learning outcomes to support learning Conversation boxes to enliven the text Patient scenarios to relate theory to practice New chapters on skin health and the use of therapeutic play Suggestions for seminar discussion topics to help teachers Resource lists and online resources for further study or research Online slides to complement chapters within book

Best of Five MCQs for the Geriatric Medicine SCE is the first revision guide designed specifically for this new high-stakes exam. It contains 300 best of five questions with explanatory answers, each accurately reflecting the layout of questions in the exam. The book is divided into three exams for trainees to test themselves on, providing a thorough assessment of the candidate's geriatric medicine knowledge and covering all the main themes of the exam, for example, falls, dementia and delirium, palliative care, nutrition, and stroke. The explanatory answers include references to guidelines and other sources to enable candidates' further reading and study. Ideal for Geriatric Medicine Specialty Registrars, trainees revising for the Geriatric Medicine Specialty Certificate Examination or the Diploma in geriatric medicine.

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Providing an overview on the field of otolaryngology, this work features a bulleted, summary-style format that facilitates study and understanding. This is a useful book for Otolaryngology and head and neck surgery residents. It explains: techniques for paranasal sinus surgery; examples of imaging; and minimally surgical techniques.
